The Science of Sci-Fi Music Andrew May,2020-06-30 The 20th century saw radical changes in the way serious music is composed and produced, including the advent of electronic instruments and novel compositional methods such as serialism and stochastic music. Unlike previous artistic revolutions, this one took its cues from the world of science. Creating electronic sounds, in the early days, required a wellequipped laboratory and an understanding of acoustic theory. Composition became increasingly "algorithmic", with many composers embracing the mathematics of set theory. The result was some of the most intellectually challenging music ever written – yet also some of the best known, thanks to its rapid assimilation into sci-fi movies and TV shows, from the electronic scores of Forbidden Planet and Dr Who to the other-worldly sounds of 2001: A Space Odyssey. This book takes a close look at the science behind science fiction music, as well as exploring the way sci-fi imagery found its way into the work of musicians like Sun Ra and David Bowie, and how music influenced the science fiction writings of Philip K. Dick and others.

<u>American Silent Horror, Science Fiction and Fantasy Feature</u> <u>Films, 1913–1929</u> John T. Soister, Henry Nicolella, Steve Joyce, 2014-01-10 During the Silent Era, when most films dealt with dramatic or comedic takes on the "boy meets girl, boy loses girl" theme, other motion pictures dared to tackle such topics as rejuvenation, revivication, mesmerism, the supernatural and the grotesque. A Daughter of the Gods (1916), The Phantom of the Opera (1925), The Magician (1926) and Seven Footprints to Satan (1929) were among the unusual and startling films containing story elements that went far beyond the realm of "highly unlikely." Using surviving documentation and their combined expertise, the authors catalog and discuss these departures from the norm in this encyclopedic guide to American horror, science fiction and fantasy in the years from 1913 through 1929.

Science Fiction Stars and Horror Heroes Tom Weaver,2006-09-28 Twenty-eight terrific interviews with some of the sharpest and most talkative stars and movie makers of the classic (and c-r-a-z-y!) The problem is not better movies, or bigger ones. It's more effectively marketed movies. It's better movie trailers! That goes doubly so for horror movies. Never before have the secrets of Hollywood trailer-making been revealed-until now. INCLUDED: The universal appeal of all blockbuster films The secret ingredient of successful movies How to sell story with film Capture the audience's imagination Examples from popular horror movie trailers Persuade audiences with images Capture the imagination with sound Create blockbuster movie titles The making of a horror movie trailer - And more!

Return of the B Science Fiction and Horror Heroes Tom Weaver,2000 The people who directed, produced, and starred in the scary and fantastic movies of the genre heyday over thirty years ago created memorable experiences as well as memorable movies. This McFarland Classic brings together over fifty interviews with the directors, producers, actors, and make-up artists of science fiction and horror films of the 1940s, 1950s, and 1960s. From B movies to classics, Samuel Z. Arkoff to Acquanetta, these veteran vampire baits, swamp monsters, and flying saucers attackees share their memories. This classic volume represents the union of two previous volumes: Interviews with B Science Fiction and Horror Movie Makers (more fun than the lovably cheap movies that inspired it--Booklist/RBB); and Science Fiction Stars and Horror Heroes (candid...a must --ARBA). Together at last, this combined collection of interviews offers a candid and delightful perspective on the movies that still make audiences squeal with fear, and occasionally, howl with laughter.

The Computer's Voice Liz W. Faber, 2020-12-22 A deconstruction of gender through the voices of Siri, HAL 9000, and other computers that talk Although computer-based personal assistants like Siri are increasingly ubiquitous, few users stop to ask what it means that some assistants are gendered female, others male. Why is Star Trek's computer coded as female, while HAL 9000 in 2001: A Space Odyssey is heard as male? By examining how gender is built into these devices, author Liz W. Faber explores contentious questions around gender: its fundamental constructedness, the rigidity of the gender binary, and culturally situated attitudes on male and female embodiment. Faber begins by considering talking spaceships like those in Star Trek, the film Dark Star, and the TV series Quark, revealing the ideologies that underlie space-age progress. She then moves on to an intrepid decade-by-decade investigation of computer voices, tracing the evolution from the masculine voices of the '70s and '80s to the feminine ones of the '90s and '00s. Faber ends her account in the present, with incisive looks at the film Her and Siri herself. Going beyond current scholarship on robots and AI to focus on voiceinteractive computers, The Computer's Voice breaks new ground in questions surrounding media, technology, and gender. It makes important contributions to conversations around the gender gap and the increasing acceptance of transgender people.

Sound Design is the New Score Danijela Kulezic-Wilson, 2019-11-01 The practice of blurring the line between score and sound design has transformed contemporary film soundscape by challenging not only the long-established hierarchical relationships between dialogue, music, and sound effects, but also the modes of perception shaped by classical soundtrack practices. The methods of this new trend rely on the language of contemporary popular and art music, producing soundtracks in which it is difficult to tell the difference between score and ambient sound, where pieces of electroacoustic music are merged with diegetic sound, sound effects are absorbed into the score or treated as music, and diegetic sound is treated as musique concrète. In Sound Design is the New Score, Kulezic-Wilson explores theoretical, aesthetic, and sensuous dimensions of this new trend, providing a multifaceted portrait of a practice which recognizes the interconnectedness of all soundtrack elements and emphasizes their inherent musicality. The aesthetic concerns of this practice are illuminated through the concept of the aesthetics of reticence which rejects classical narrative and scoring conventions and uses integrated soundtrack strategies to create the space for mystery in art and for individuality in the cinematic experience. The book's emphasis on sensuous and musical aspects of this practice, informed by the feminist discourse on the erotics of art, challenges popular notions about sensory cinema, demonstrating that the sensuousness of film form and its soundscapes is more sophisticated than simply being the result of excessive sensory stimulation facilitated by the use of digital technology or the intensified aesthetics

it inspires. The discussion is supported by a wide range of case studies from American Independent, Asian, Australian, and European cinemas, including films by Shane Carruth, Claire Denis, Hou Hsiao-Hsien, Harmony Korine, David Michôd, Gus Van Sant, and Peter Strickland.

Contemporary British Horror Cinema Walker Johnny Walker,2015-10-01 Combining industrial research and primary interview material with detailed textual analysis, Contemporary British Horror Cinema looks beyond the dominant paradigms which have explained away British horror in the past, and sheds light on one of the most dynamic and distinctive - yet scarcely talked about - areas of contemporary British film production. Considering high-profile theatrical releases, including The Descent, Shaun of the Dead and The Woman in Black, as well as more obscure films such as The Devil's Chair, Resurrecting the Street Walker and Cherry Tree Lane, Contemporary British Horror Cinema provides a thorough examination of British horror film production in the twenty-first century.

Reading Without Maps? Den Tandt Christophe (ed.),2005 Among the intellectual debates of the last forty years, the critique of cultural canons has attracted the highest share of public attention, stirring academic, educational, and media controversies on both sides of the Atlantic. Postmodernism, feminism, postcolonialism, and multiculturalism have refashioned the attitudes of educators and audiences towards cultural memory, opening up curricula to subjects and traditions previously excluded from the humanities. Predictably, these new critical practices have triggered heated responses from commentators fearing that culture and education might thereby be deprived of their capacity to provide audiences and learners with proper groundings and landmarks. The present volume gathers contributions that throw light on multiple aspects of this reconfiguration of cultural memory. It brings together essays focusing on the dynamics of canon formation in several fields - literature, drama, film, and music. Contributors examine how writers and communities find their bearings in a cultural landscape more complex than that previously envisaged by advocates of the Great Tradition. Specifically, the present essays throw light on the status of modernist writing, drama in English, or popular genres within the new canonical topography elaborated at the turn of the twenty-first century.

The Science Fiction Film Reader Gregg Rickman,2004 (Limelight). An illustrated collection of essays by masters such as H.G. Wells, Luis Bunuel, Jorge Luis Borges, Arthur C. Clarke, Anthony Burgess, Joseph Campbell, Pauline Kael, George F. Will, Robin Wood, and Susan Sontag.

<u>Celluloid Symphonies</u> Julie Hubbert,2011-03-02 Celluloid Symphonies is a unique sourcebook of writings on music for film, bringing together fifty-three critical documents, many previously inaccessible. It includes essays by those who created the music—Max Steiner, Erich Korngold, Jerry Goldsmith, Elmer Bernstein and Howard Shore—and outlines the major trends, aesthetic choices, technological innovations, and commercial pressures that have shaped the relationship between music and film from 1896 to the present. Julie Hubbert's introductory essays offer a stimulating overview of film history as well as critical context for the close study of these primary documents. In identifying documents that form a written and aesthetic history for film music, Celluloid Symphonies provides an astonishing resource for both film and music scholars and for students.
