**DJ Disciple, Henry Kronk**

**This is Our House** Hillegonda C. Rietveld, 2019-01-04 Originally published in 1998. House music has had a considerable influence in shaping the sound of pop music from the late 1980s onwards. From underground dance events to the pop charts, traces of this aesthetic can be found in many guises. This book traces a genealogy of house and maps some of the power structures that are at play in its production and consumption. Places like Chicago, New York, London, Manchester, Amsterdam and Rotterdam have been visited, providing the material to discuss such subjects as contemporary dance culture, DJs and the roles of musical technologies. The author, Hillegonda Rietveld, was already steeped in dance club culture before she decided to write this loving piece of academic prose about house. Taking critical culture studies as its aesthetic fuel, she ram-raids boundaries of academic disciplines, fusing ideas like a meticulous DJing curator.

House Music the Real Story Jesse Saunders, 2007 Jesse Saunders's story is one of the most important in the history of popular culture. From his hometown of Chicago, Jesse created the first original House music record and launched the House music movement across the land. Eventually, his style of music would come to sell millions of records and CDs, take over the popular consciousness of millions of kids across the earth and cement the electronic revolution in music. Written with author James Cummins, this autobiography tells the story of how it all happened. From the streets of Chicago to the biggest music labels in Los Angeles, California, it follows Jesse Saunders as he recreates the musical landscape of America. Touching on the celebrity culture of the 1980s and 1990s and into the twenty-first century, you will read many shocking things about some of your favorite artists. Jesse Saunders is an artist whose influence on modern music will never be forgotten.

*House Rules* Eric Reese, 2017-12-02 While Black and Hispanic communities were jamming and party DJs were spinning records, a new birth of rhythm gave way to music lovers from Chicago and New York in the form known as House Music. Developed in Chicago's underground dance club culture in the early 1980s, DJs spinning in the gay subculture began altering the pop-like disco dance tracks to give them a more mechanical beat and deeper basslines. As well, these DJs began to mix synth pop, dub reggae, rap and even jazz into their tracks. The first pioneers of House Music were Chicago DJ/record producer Frankie Knuckles, the Chicago acid-house electronic music group Phuture, the Tennessee DJ/producer Mr. Fingers, and US-born, UK-based singer Kym Mazelle. House music quickly spread to other American cities such as Detroit, New York City, Baltimore, and Newark - all of which developed their own regional house scenes. Today, house music is worldwide and continues to dominate most club scenes and has expanded beyond its subculture beginning.

**The Beat, the Scene, the Sound** DJ Disciple, Henry Kronk, 2023 This book follows DJ Disciple and his behind-the-scenes story of how DJs, promoters, fans, and others transformed house music from a DIY project into an international sensation. Interweaving interviews, the book dives into glitzy clubs, underground parties, and diverse communities who made up the scene amidst the tumult of 1980s/90s-era NYC.

**The Art of Mixing** David Gibson, 2019-01-10 David Gibson uses 3D visual representations of sounds in a mix as a tool to explain the dynamics that can be created in a mix. This book provides an in-depth exploration into the aesthetics of what makes a great mix. Gibson's unique approach explains how to map sounds to visuals in order to create a visual framework that can be used to

analyze what is going on in any mix. Once you have the framework down, Gibson then uses it to explain the traditions that have been developed over time by great recording engineers for different styles of music and songs. You will come to understand everything that can be done in a mix to create dynamics that affect people in really deep ways. Once you understand what engineers are doing to create the great mixes they do, you can then use this framework to develop your own values as to what you feel is a good mix. Once you have a perspective on what all can be done, you have the power to be truly creative on your own – to create whole new mixing possibilities. It is all about creating art out of technology. This book goes beyond explaining what the equipment does – it explains what to do with the equipment to make the best possible mixes.

**The Routledge Research Companion to Electronic Music: Reaching out with Technology** Simon Emmerson, 2018-05-16 The theme of this Research Companion is 'connectivity and the global reach of electroacoustic music and sonic arts made with technology'. The possible scope of such a companion in the field of electronic music has changed radically over the last 30 years. The

definitions of the field itself are now broader - there is no clear boundary between 'electronic music' and 'sound art'. Also, what was previously an apparently simple divide between 'art' and 'popular' practices is now not easy or helpful to make, and there is a rich cluster of streams of practice with many histories, including world music traditions. This leads in turn to a steady undermining of a primarily Euro-American enterprise in the second half of the twentieth century. Telecommunications technology, most importantly the development of the internet in the final years of the century, has made materials, practices and experiences ubiquitous and apparently universally available - though some contributions to this volume reassert the influence and importance of local cultural practice. Research in this field is now increasingly multi-disciplinary. Technological developments are embedded in practices which may be musical, social, individual and collective. The contributors to this companion embrace technological, scientific, aesthetic, historical and social approaches and a host of hybrids - but, most importantly, they try to show how these join up. Thus the intention has been to allow a wide variety of new practices to have voice - unified through ideas of 'reaching out' and 'connecting together' - and in effect showing that there is emerging a different kind of 'global music'.

*The House of Broken Angels* Luis Alberto Urrea, 2018-03-06 In this raucous, moving, and necessary story by a Pulitzer Prize finalist (San Francisco Chronicle), the De La Cruzes, a family on the Mexican-American border, celebrate two of their most beloved relatives during a joyous and bittersweet weekend. All we do, mija, is love. Love is the answer. Nothing stops it. Not borders. Not death. In his final days, beloved and ailing patriarch Miguel Angel de La Cruz, affectionately called Big Angel, has summoned his entire clan for one last legendary birthday party. But as the party approaches, his mother, nearly one hundred, dies, transforming the weekend into a farewell doubleheader. Among the guests is Big Angel's half brother, known as Little Angel, who must reckon

with the truth that although he shares a father with his siblings, he has not, as a half gringo, shared a life. Across two bittersweet days in their San Diego neighborhood, the revelers mingle among the palm trees and cacti, celebrating the lives of Big Angel and his mother, and recounting the many inspiring tales that have passed into family lore, the acts both ordinary and heroic that brought these citizens to a fraught and sublime country and allowed them to flourish in the land they have come to call home. Teeming with brilliance and humor, authentic at every turn, *The House of Broken Angels* is Luis Alberto Urrea at his best, and cements his reputation as a storyteller of the first rank. Epic . . .
