AQAR TO RAR : BRIDGING THE GAP Laxmibai Bhaurao Patil Mahila Mahavidyalaya, Solapur,
Active Listening Michael Rost,J. J.

Wilson,2013-11-04 Listening is now regarded by researchers and practitioners as a highly active skill involving prediction, inference, reflection, constructive recall, and often direct interaction with speakers. In this new theoretical and practical guide, Michael Rost and JJ Wilson demonstrate how active listening can be developed through guided instruction. With so many new technologies and platforms for communication, there are more opportunities than ever before for learners to access listening input, but this abundance leads to new challenges: how to choose the right input how to best use listening and viewing input inside and outside the classroom how

to create an appropriate syllabus using available resources Active Listening explores these questions in clear, accessible prose, basing its findings on a theoretical framework that condenses the most important listening research of the last two decades. Showing how to put theory into practice, the book includes fifty innovative activities, and links each one to relevant research principles. Sample audio recordings are also provided for selected activities, available online at the series website

www.pearsoned.co.uk/rostrwilson. As a bridge between theory and practice, Active Listening will encourage second language teachers, applied linguists, language curriculum coordinators, researchers, and materials designers to become more active practitioners themselves, by more fully utilising research in the field of second language listening.

Repair Work Ethnographies Ignaz Strebel, Alain Bovet, Philippe Sormani, 2018-12-14 This pioneering book homes in on repair as an everyday practice. Bringing together exemplary ethnographies of repair work around the world, it examines the politics of repair, its work settings and intricate networks, in and across a wide range of situations, lay and professional. The book evidences the topical relevance of situated inquiry into breakdown, repair, and maintenance for engaging with the contemporary world more broadly. Airplanes and artworks, bicycles and buildings, cars and computers, medical devices and mobile phones, as virtually any commodity, infrastructure or technical artifact, have in common their occasional breakdown, if not inbuilt

obsolescence. Hence the point and purpose of closely examining how and when they are fixed.
