Cinderella Boys Leo McKinstry,2023-06-08 The remarkable story of the unsung RAF wing who rescued Britain from Hitler's U-boats and made Allied victory possible. In early 1943 Britain was engaged in an epic struggle for survival.

As the deadly wolf packs of German U-boats roamed the Atlantic, supply lines and shipping losses fell victim to the carnage. In desperation, Churchill turned to the RAF's maritime wing - an overlooked, underfunded force known as The Cinderella Service. But the ascendancy of the U-boat forced a change in attitude. Provided with the long-range planes, depth charges, rocket projectiles and radar equipment with which to challenge the enemy. The Cinderella boys provided vital air defence the whole way across the Atlantic. The German hunters were now the hunted, and - in a stunning defeat - had fully retreated by the summer of 1943. The transformation of Coastal Command from a ramshackle outfit into a vast, formidable organisation provided one of the turning points of the war, keeping Britain in the war and opening the way to D-Day in 1944. But they never received the credit they deserved. Based on a wealth of new sources, including from diaries, log books, official records, archives and interviews, Leo McKinstry shines a new light the courageous pilots, ingenious scientists and political risktakers - many of them outsiders - who defended the freezing Atlantic from Nazi rule.

Half the Sky Nicholas D. Kristof, Sheryl WuDunn, 2010-06-01 #1 NATIONAL BESTSELLER • A passionate call to arms against our era's most pervasive human rights violation—the oppression of women and girls in the developing world. From the bestselling authors of *Tightrope*, two of our most fiercely moral voices With Pulitzer Prize winners Nicholas D. Kristof and Sheryl WuDunn as our guides, we undertake an odyssey through Africa and Asia to meet the extraordinary women struggling there, among them a Cambodian teenager sold into sex slavery and an Ethiopian woman who suffered devastating injuries in childbirth. Drawing on the breadth of their combined reporting experience, Kristof and WuDunn depict our world with anger, sadness, clarity, and, ultimately, hope. They show how a little help can transform the lives of women and girls abroad. That Cambodian girl eventually escaped from her brothel and, with assistance from an aid group, built a thriving retail business that supports her family. The Ethiopian woman had her injuries repaired and in time became a surgeon. A Zimbabwean mother of five, counseled to return to school, earned her doctorate and became an expert on AIDS. Through these stories, Kristof and WuDunn help us see that the key to economic progress lies in unleashing women's potential. They make clear how so many people have helped to do just that, and how we can each do our part. Throughout much of the world, the greatest unexploited economic resource is the female half of the population. Countries such as China have prospered precisely because they emancipated women and brought them into the formal

economy. Unleashing that process globally is not only the right thing to do; it's also the best strategy for fighting poverty. Deeply felt, pragmatic, and inspirational, *Half the Sky* is essential reading for every global citizen.

Command Of The Air General Giulio Douhet, 2014-08-15 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision—that command of the air is all important in modern warfare—has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

Three-Ring Circus Jeff Pearlman, 2020 From 1996 through 2004, Kobe Bryant and Shaquille O’Neal combined-- and collided-- to help bring the Lakers three straight championships and restore the franchise as a powerhouse. The eight years of infighting and hostility were by turns mediated and encouraged by coach Phil Jackson.
