Radio Diplomacy and Propaganda Gary D. Rawnsley,2016-07-27 Radio Diplomacy and Propaganda investigates the role of international radio broadcasting in diplomacy during the Cold War period and, in particular, the contribution of the BBC and the Voice of America in the construction and projection of foreign policy, together with their role in the dissemination of international propaganda. In addition the radio broadcasts which were monitored in Britain and the US are scrutinized to ascertain how they contributed to the formulation of foreign policy objectives and reactionary propaganda.

Media law in Hungary Judit Bayer,Ágnes Urbán,Gábor Polyák,2019-05-15 Derived from the renowned multi-volume International Encyclopaedia of Laws, this analysis of media law in Hungary surveys the massively altered and enlarged legal landscape traditionally encompassed in laws pertaining to freedom of expression and regulation of communications. Everywhere, a shift from mass media to mass self-communication has put enormous pressure on traditional law models. An introduction describing the main actors and salient aspects of media markets is followed by in-depth analyses of print media, radio and television broadcasting, the Internet, commercial communications, political advertising, concentration in media markets, and media regulation. Among the topics that arise for discussion are privacy, cultural policy, protection of minors, competition policy, access to digital gateways, protection of journalists' sources, standardization and interoperability, and liability of intermediaries. Relevant case law is considered throughout, as are various ethical codes. A clear, comprehensive overview of media legislation, case law, and doctrine, presented from the practitioner's point of view, this book is a valuable time-saving resource for all concerned with media and communication freedom. Lawyers representing parties with interests in Hungary will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative media law.

The Long 1968 in Hungary and Romania Adrian-George Matus,2023-12-31 This book advances a local, regional, and comparative analysis of the history of the sixty-eighters from Hungary and Romania between 1956 and 1975. The aim of the book is to answer to the following research question: to what extent does 'the long 1968' mark and change protest history? Another axis of my research, equally important, is: how can one genuinely distinguish between a protest, an opposition, and a pastime? Where did radicalisation truly begin, and when was it solely an auto-perception as a dissident? In other words, how can one truly distinguish between a leisure activity like listening to Radio Free Europe or exploring an altered state of consciousness, and an explicit political activity like organising a protest or writing subversive texts? Among other aims, the books's scope is to understand where a leisure activity ends, and a protest starts. By 'practicing counterculture,' did the youth wish to contest the system or simply express themselves? As method, oral history plays a crucial part. On a superficial level, the interviews helped to fill in the archival gap. However, oral testimonies proved to reveal much more than essential factual information. Oral history clarified how political and social events influenced the subjects' memory formation.

Radio Wars Linda Risso,2017-10-02 During the Cold War, radio broadcasting played an important role in the ideological confrontation between East and West. As archival documents gathered in this volume reveal, radio broadcasting was among the most pressing concerns of contemporary information agencies. These broadcasts could penetrate the Iron Curtain and directly address the 'enemy'. Radio was equally important in keeping sustained levels of support among the home public and the public of friendly nations. In the early Cold War in particular, listeners in the West had to be persuaded of the need for higher defence spending levels and a policy of containment. Later, even if other media – and in particular television – had become more important, radio continued to be used widely. The chapters gathered here investigate both the institutional history of the radio broadcasting corporations in the East and in the West, and their relationship with other propaganda agencies of the time. They examine the 'off-air' politics of radio broadcasting, from the choice of theme to the selection of speakers, singers and music pieces. The key issue tackled by contributors is the problem of measuring the impact of, and qualifying the success of, information policies and propaganda programmes produced during the Cultural Cold War. This book was originally published as a special issue of Cold War History.

Hungary and NATO Jeffrey Simon,2003 Since the revolutions of 1989-1990, most Central and Eastern European states have been striving to adhere to Euro-Atlantic institutions; and when NATO developed its own 'criteria' for membership, democratic control of the military was considered an essential precondition. Based on firsthand participatory and observational insight, *Hungary and NATO: Problems in Civil-Military Relations* closely follows Hungary's early work to secure an invitation to join the Alliance in July 1997, preparations for accession in March 1999, and its first four years as a NATO ally. While charting the successes, shortcomings, and continuing challenges faced in its quest to become a full NATO member, Jeffrey Simon presents a comprehensive and original study of civil-military relations in Hungary and simultaneously provides a conceptual framework of civil-military relations that draws upon the lessons of post-communist transition in the entire Central and East European region.

Bartok, Hungary, and the Renewal of Tradition David E. Schneider,2006-11-06 It is well known that Béla Bartók had an extraordinary ability to synthesize Western art music with the folk music of Eastern Europe. What this rich and beautifully written study makes clear is that, contrary to much prevailing thought about the great twentieth-century Hungarian composer, Bartók was also strongly influenced by the art-music traditions of his native country. Drawing from a wide array of material including contemporary reviews and little known Hungarian documents, David Schneider presents a new approach to Bartók that acknowledges the composer's debt to a variety of Hungarian music traditions as well as to influential contemporaries such as Igor Stravinsky. Putting representative works from each decade beginning with Bartók's graduation from the Music Academy in 1903 until his departure for the United States in 1940 under critical lens, Schneider reads the composer's artistic output as both a continuation and a profound transformation of the very national tradition he repeatedly rejected in public. By clarifying why Bartók felt compelled to obscure his ties to the past and by illuminating what that past actually was, Schneider dispels myths about Bartók's relationship to nineteenth-century traditions and at the same time provides a new perspective on the relationship between nationalism and modernism in early-twentieth century music.

Culture and Customs of Hungary Oksana Ritz-Buranbaeva,Vanja Mladineo,2011-09-22 This book provides a one-stop introduction to the history, culture, and personalities of Hungary, a fascinating country located at the heart of Europe and born at the crossroads of civilizations. Hungary today is most certainly a Central European nation in terms of a modern geopolitical and cultural understanding of Europe. Additionally, it has occupied a central position in the constellation of European kingdoms for centuries. The story of Hungary is about a country at the heart of Europe, geographically as well as culturally, and of a people quite distinct from their eastern and western neighbors yet irrevocably intertwined with them in terms of their histories and futures. Culture and Customs of Hungary is an absolute must-have for high school, public, and undergraduate library bookshelves. Readers will explore Hungary's fascinating contemporary life and culture in this unique and all-encompassing reference work that highlights the most important Hungarian historical personalities and explains their role in the development of Hungarian culture and society, as well as their standing in modern Hungary. Topics covered include history; art, including literature, architecture, film, and music; customs and traditions; modern society and culture; media; gender roles; language; and religion.

The Transition to Democracy in Hungary Dae Soon Kim,2013-07-18 Unlike in other countries of Eastern Europe where the opposition to communism came in the form of single mass movements led by charismatic leaders such as Václav Havel and Lech Wałęsa, in Hungary the opposition was very fragmented, brought together and made effective only by the authoritative, significant but relatively unknown Árpád Göncz, who subsequently became Hungary's first post-communist president. This book charts the political career of Árpád Göncz, outlining the outstanding contribution he made to Hungary's transition to democracy. Drawing on a wide range of sources, including archives and interviews with Göncz himself and others, it shows how Göncz, unlike Havel who was a playwright and whose political role was largely symbolic, was a campaigning politician all his life, consistently advocating social democratic, but not communist, values. Imprisoned from 1956 for his participation in the 1956 uprising, Göncz was a highly-effective political operator in the transition period around 1989, and as president wielded real power effectively. As politics in Hungary are again marred by deep division and fragmentation, Göncz's success in bringing rival groups together is even more pronounced.
