Through numerous practical examples and illustrations, this book examines a comprehensive review of the latest science on indoor environmental health, energy requirements for buildings, and the greening of infrastructure. Also, it provides a discussion on the underlying properties of biomass and its influence on furthering energy conversion technologies. Air Pollution Modeling and Its Application VII Han Van Dop, 2013-11-11 Air pollution remains a major environmental issue despite many years of study and much legislative control. In recent times, pollution on a global scale has become of particular concern. The gradually changing concentration of trace gases in the global troposphere due to man's activity is becoming a matter of serious concern. No scientist would dare to predict in detail the consequences of this gradual change due to its immense complexity involving social and economic factors and near countless chemical and physical cycles in our biosphere. In this chain of processes, the transport of pollution is an important factor, but only a factor. Therefore, I would like to emphasize that the modelling of atmospheric transport is becoming more and more an activity which fits into larger frameworks and can no longer be exercised as a single step, which bridges the gap between emissions and policy measures. This is also reflected in the topics and papers which were presented at this conference. The topics were: - emission inventories for and source treatment in air pollution dispersion models; - modelling of accidental releases; - regional and global scale dispersion modelling; including boundary layer-free troposphere exchange processes and subgrid scale parameterisations; - model verification and policy implications; - new developments in dispersion modelling and theory. 56 papers were presented in these sections. While many posters were discussed in a special session.

Outdoor Kids in an Inside World Steven Rinella, 2022-05-03 NEW YORK TIMES BESTSELLER • "An imperative call to action" (Nick Offerman) to get children off their screens and into nature, with tips for bonding activities that teach the importance of outside time and build tough, curious, competent kids—from the New York Times bestselling author and host of the TV series and podcast

MeatEater “A revelation for families struggling to get kids to GO OUTSIDE, or to just stop using the darn smartphone.”—Michaelleen Doucleff, PhD, New York Times bestselling author of *Hunt, Gather, Parent* In the era of screens and devices, the average American spends 90 percent of their time indoors, and children are no exception. Not only does this phenomenon have consequences for kids’ physical and mental health, it jeopardizes their ability to understand and engage with anything beyond the built environment. Thankfully, with the right mind-set, families can find beauty, meaning, and connection in a life lived outdoors. Here, outdoors expert Steven Rinella shares the parenting wisdom he has garnered as a father whose family has lived amid the biggest cities and wildest corners of America. Throughout, he offers practical advice for getting kids radically engaged with nature in a muddy, thrilling, hands-on way, with the ultimate goal of helping them see their own place within the natural ecosystem. No matter their location—rural, suburban, or urban—caregivers and kids will bond over activities such as:

- Camping to conquer fears, build tolerance for dirt and discomfort, and savor the timeless pleasure of swapping stories around a campfire.
- Growing a vegetable garden to develop a capacity to nurture and an appreciation for hard work.
- Fishing local lakes and rivers to learn the value of patience while grappling with the possibility of failure.
- Hunting for sustainably managed wild game to face the realities of life, death, and what it really takes to obtain our food.

Living an outdoor lifestyle fosters in kids an insatiable curiosity about the world around them, confidence and self-sufficiency, and, most important, a lifelong sense of stewardship of the natural world. This book helps families connect with nature—and one another—as a joyful part of everyday life.
