Rhetoric and Guns Lydia Wilkes, Nate Kreuter, Ryan Skinnell, 2022-04-01 Guns hold a complex place in American culture. Over 30,000 Americans die each year from gun violence, and guns are intimately connected to issues of public health, as is evident whenever a mass shooting occurs. But guns also play an important role in many Americans' lives that is not reducible to violence and death—as tools, sporting equipment, and identity markers. They are also central to debates about constitutional rights, as seen in ongoing discussions about the Second Amendment, and they are a continuous source of legislative concern, as apparent in annual ratings of gun-supporting legislators. Even as guns are wrapped up with other crucial areas of concern, they are also fundamentally a rhetorical concern. Guns and gun violence occupy a unique rhetorical space in the United States, one characterized by silent majorities, like most gun owners; vocal minorities, like the firearm industry and gun lobby; and a stalemate that fails to stem the flood of the dead. How Americans talk, deliberate, and fight about guns is vital to how guns are marketed, used, and regulated. A better understanding of the rhetorics of guns and gun violence can help Americans make better arguments about them in the world. However, where guns are concerned, rhetorical studies is not terribly different from American culture more generally. Guns are ever-present and exercise powerful effects, but they are commonly talked about in oblique, unsystematic ways. *Rhetoric and Guns* advances more direct, systematic engagement in the field and beyond by analyzing rhetoric about guns, guns in rhetoric, and guns as rhetoric, particularly as they relate to specific instances of guns in culture. The authors attempt to understand rhetoric's relationship to guns by analyzing rhetoric about guns and how they function in and as rhetoric related to specific instances—in media coverage, political speech, marketing, and advertising. Original chapters from scholars in rhetorical studies, communication, education, and related fields elucidate how rhetoric is used to maintain and challenge the deadly status quo of gun violence in the United States and extend rhetoricians' sustained interest in the fields' relationships to violence, brutality, and atrocity. Contributors: Ira J. Allen, Brian Ballentine, Matthew Boedy, Peter Buck, Lisa Corrigan, Rosa Eberly, Kendall Gerdes, Ian E. J. Hill, Nathalie Kuriowa-Lewis, Patricia Roberts-Miller, Craig Rood, Bradley Serber, Catherine R. Squires, Scott Gage

Air Pollution Modeling and Its Application VII Han Van Dop, 2013-11-11 Air pollution remains a major environmental issue despite many years of study and much legislative control. In recent times, pollution on a global scale has become of particular concern. The gradually changing concentration of trace gases in the global troposphere due to man's activity is becoming a matter of serious concern. No scientist would dare to predict in detail the consequences of this gradual change due to its immense complexity involving social and economic factors and near countless chemical and physical cycles in our biosphere. In this chain of processes, the transport of pollution is an important factor, but only a factor. Therefore, I would like to emphasize that the modelling of atmospheric transport is becoming more and more an activity which fits into larger frameworks and can no longer be exercised as a single step, which bridges the gap between emissions and policy measures. This is also reflected in the topics and papers which were presented at this conference. The topics were: - emission inventories for and source treatment in air pollution dispersion models; - modelling of accidental releases; - regional and global scale dispersion modelling; including boundary layer-free troposphere exchange processes and subgrid scale parameterisations; - model verification and policy implications; - new developments in dispersion modelling and theory. 56 papers were presented in these sections. While many posters were discussed in a special session.

Canadian Whitetail Hunting Dragan Vujic, 2004-06 Welcome to Canada-home of the big bucks. Whitetail monarchs freely roam through the hardwood forests and crop fields in the checkered agricultural belt of this vast land. Heredity endows our deer with large bodies and matching massive antlers, but environment dictates behavior. Canadian whitetails are different and behave differently from their southern brethren. No matter where you have hunted before, deer hunting in Canada is a brand new game. Your old, tried-and-true ways will not work here. New tactics and strategies are required. Veteran hunter, Dragan Vujic, shares close to forty years of hunting experience in this comprehensive book on Canadian Whitetail Hunting. The book itself is divided into three parts-The Facts About Canadian Whitetails (general information, game laws, social structure, habitat, communication, breeding behavior, anatomy, kill zones), Critical Factors That Determine Canadian Whitetail Behavior (weather, phases of the moon, hunting pressure, time of year, scents, doe to buck ratios, time of day, food sources), Effective Canadian Whitetail Hunting Strategies (archers, snipers, stalkers, callers, drivers, blockers). Within these sections, Dragan Vujic covers all of the key components for hunting whitetails in Canada. Additional chapters include tactics for all situations, the recently new phenomenon of hunting deer in the suburbs and tracking wounded whitetails. draganvujic1205@gmail.com
