Lignins Lise Jouanin,Catherine Lapierre,2012-07-30 Lignins are nature's aromatic polymers and are the second most abundant organic constituent of the biosphere next to cellulose. Lignification mainly occurs in the walls of terrestrial vascular plants, mainly in the secondarily thickened cells of supportive or conductive tissues, which thus acquire novel properties. This new volume of Advances in Botanical Research gives a special emphasis to the bioengineering of these enigmatic polymers. It is divided in nine chapters containing up-to-date reviews by expert groups in their field. Ancient Chinese Thought, Modern Chinese Power Yan Xuetong,2013-08-25 From China's most influential foreign policy thinker, a vision for a Beijing Consensus for international relations The rise of China could be the most important political development of the twenty-first century. What will China look like in the future? What should it look like? And what will China's rise

mean for the rest of world? This book, written by China's most influential foreign policy thinker, sets out a vision for the coming decades from China's point of view. In the West, Yan Xuetong is often regarded as a hawkish policy advisor and enemy of liberal internationalists. But a very different picture emerges from this book, as Yan examines the lessons of ancient Chinese political thought for the future of China and the development of a Beijing consensus in international relations. Yan, it becomes clear, is neither a communist who believes that economic might is the key to national power, nor a neoconservative who believes that China should rely on military might to get its way. Rather, Yan argues, political leadership is the key to national power, and morality is an essential part of political leadership. Economic and military might are important components of national power, but they are secondary to political leaders who act in accordance with moral norms, and the same holds true in determining the hierarchy of the global order. Providing new insights into the thinking of one of China's leading foreign policy figures, this book will be essential reading for anyone interested in China's rise or in international relations.

The Lena Goldfields Massacre and the Crisis of the Late Tsarist State Michael S. Melancon, 2006 In 1912 a thin line of Russian soldiers, confronted by a large crowd of gold miners on strike for several weeks, reacted with fear and anger. At their officers' orders, they opened fire, shooting five hundred unarmed protestors. The event reverberated across Russia. The Lena goldfields massacre can be viewed from several distinct viewpoints, each presenting a contrasting story. Author Michael Melancon avoids prematurely picking a right way of looking at the massacre. Instead, he explores all aspects of the incident, from the despair of the miners at the poor conditions they faced, to the calculations and priorities of the mining entrepreneurs and state officials, and even the rationale of the soldiers who pulled the triggers. The Lena Goldfields Massacre and the Crisis of the Late Tsarist State will appeal to anyone interested in labor relations, in revolutionary movements, and in transitions associated with modernization. Its comparative framework will be helpful for generalists and Europeanists. It will also provide food for thought for those who seek a carefully researched examination of Russian society during the early twentieth century.
