We Have No Idea Jorge Cham,Daniel Whiteson,2018-05-08 Prepare to learn everything we still don't know about our strange and mysterious universe Humanity's understanding of the physical world is full of gaps. Not tiny little gaps you can safely ignore —there are huge yawning voids in our basic notions of how the world works. PHD Comics creator Jorge Cham and particle physicist Daniel Whiteson have teamed up to explore everything we don't know about the universe: the enormous holes in our knowledge of the cosmos. Armed with their popular infographics, cartoons, and unusually entertaining and lucid explanations of science, they give us the best answers currently available for a lot of questions that are still perplexing scientists, including: * Why does the universe have a speed limit? * Why aren't we all made of antimatter? * What (or who) is attacking Earth with tiny, superfast particles? * What is dark matter, and why does it keep ignoring us? It turns out the universe is full of weird things that don't make any sense. But Cham and Whiteson make a compelling case that the questions we can't answer are as interesting as the ones we can. This fully illustrated introduction to the biggest mysteries in physics also helpfully demystifies many complicated things we do know about, from quarks and neutrinos to gravitational waves and

exploding black holes. With equal doses of humor and delight, Cham and Whiteson invite us to see the universe as a possibly boundless expanse of uncharted territory that's still ours to explore.

Become an Idea Machine Claudia Azula Altucher, 2014-12-27 HOW DO I TRANSFORM MY LIFE? The answer is simple: come up with ten ideas a day. It doesn't matter if they are good or bad the key is to exercise your 'idea muscle', to keep it toned, and in great shape. People say ideas are cheap and execution is everything but that is NOT true. Execution is a consequence, a subset of good, brilliant idea. And good ideas require daily work. Ideas may be easy if we are only coming up with one or two but if you open this book to any of the pages and try to produce more than three, you will feel a burn, scratch your head, and you will be sweating, and working hard. There is a turning point when you reach idea number 6 for the day, you still have four to go, and your mind muscle is getting a workout. By the time you list those last ideas to make it to ten you will see for yourself what sweating the idea muscle means. As you practice the daily idea generation you become an idea machine. When we become idea machines we are flooded with lots of bad ideas but also with some that are very good. This happens by the sheer force of the number, because we are coming up with 3,650 ideas per year (at ten a day). When you are inspired by an extraordinary idea, all of your thoughts break their chains, you go beyond limitations and your capacity to act expands in every direction. Forces and abilities you did not know you had come to the surface, and you realize you are capable of doing great things. As you practice with the suggested prompts in this book your ideas will get better, you will be a source of great insight for others, people will find you magnetic, and they will want to hang out with you because you have so much to offer. When you practice every day your life will transform, in no more than 180 days, because it has no other evolutionary choice. Life changes for the better when we become the source of positive, insightful, and helpful ideas. Don't

believe a word I say. Instead, challenge yourself to try it for the 180 days and see your life transform, in magical ways, in front of your very eyes.

Drive Daniel H. Pink, 2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply

human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

The Templeton Twins Have an Idea Ellis Weiner, 2012-08-03 This special edition of The Templeton Twins Have an Idea: Book One also includes a sneak preview of The Templeton Twins Make a Scene: Book Two and a Q&A with the author. Suppose there were 12-year-old twins, a boy and girl named John and Abigail Templeton. Let's say John was pragmatic and played the drums, and Abigail was theoretical and solved cryptic crosswords. Now suppose their father was a brilliant, if sometimes confused, inventor. And suppose that another set of twins—adults—named Dean D. Dean and Dan D. Dean, kidnapped the Templeton twins and their ridiculous dog in order to get their father to turn over one of his genius (sort of) inventions. Yes, I said kidnapped. Wouldn't it be fun to read about that? Oh please. It would so. Luckily for you, this is just the first in a series perfect for boys and girls who are smart, clever, and funny (just like the twins), and enjoy reading adventurous stories (who doesn't?!).

Come 'ere I've got an Idea Rowland McGabhann, 2021-06-06 This is a heartwarming and

comical story set in post-war Dublin. It follows the trials and tribulations of a family from humble background. The father has illusions of grandeur, which results in them living far beyond their means. This is not helped by his habit of stopping off at the pub almost every night. The schemes that ensue in order to try and achieve this lifestyle lead to hilarious events. The author uses his own experiences to depict a true example of how Irish families of that era used whatever means possible, be it humour and sometimes stretching of the rules, to cope with the hardship of the times. The story centres on the youngest of the three brothers and includes many of the colourful characters that went into making Ireland the unique country it was at that time. The story follows the family's journey from the childhood of the boys through to their adulthood.

Made to Stick Chip Heath, Dan Heath, 2007-01-02 NEW YORK TIMES BESTSELLER • The instant classic about why some ideas thrive, why others die, and how to make your ideas stick. "Anyone interested in influencing others—to buy, to vote, to learn, to diet, to give to charity or to start a revolution—can learn from this book."—The Washington Post Mark Twain once observed, "A lie can get halfway around the world before the truth can even get its boots on." His observation rings true: Urban legends, conspiracy theories, and bogus news stories circulate effortlessly. Meanwhile, people with important ideas—entrepreneurs, teachers, politicians, and journalists—struggle to make them "stick." In *Made to Stick*, Chip and Dan Heath reveal the anatomy of ideas that stick and explain ways to make ideas stickier, such as applying the human scale principle, using the Velcro Theory of Memory, and creating curiosity gaps. Along the way, we discover that sticky messages of all kinds—from the infamous "kidney theft ring" hoax to a coach's

lessons on sportsmanship to a vision for a new product at Sony—draw their power from the same six traits. *Made to Stick* will transform the way you communicate. It's a fast-paced tour of success stories (and failures): the Nobel Prize-winning scientist who drank a glass of bacteria to prove a point about stomach ulcers; the charities who make use of the Mother Teresa Effect; the elementary-school teacher whose simulation actually prevented racial prejudice. Provocative, eye-opening, and often surprisingly funny, *Made to Stick* shows us the vital principles of winning ideas—and tells us how we can apply these rules to making our own messages stick.
