OpenGL ES 2 for Android Kevin Brothaler,2013-06-26 Printed in full color. Android is booming like never before, with millions of devices shipping every day. It's never been a better time to learn how to create your own 3D games and live wallpaper for Android. You'll find out all about shaders and the OpenGL pipeline, and discover the power of OpenGL ES 2.0, which is much more feature-rich than its predecessor. If you can program in Java and you have a creative vision that you'd like to share with the world, then this is the book for you. This book will teach you everything you need to know to create compelling graphics on Android. You'll learn the basics of OpenGL by building a simple game of air hockey, and along the way, you'll see how to initialize OpenGL and program the graphics pipeline using shaders. Each lesson builds upon the one before it, as you add colors, shading, 3D projections, touch interaction, and more. Then, you'll find out how to turn your idea into a live wallpaper that can run on the home screen. You'll learn about more advanced effects involving particles, lighting models, and the depth buffer. You'll understand what to look for when debugging your program, and what to watch out for when deploying to the market. OpenGL can be somewhat of a dark art to the uninitiated. As you read this book, you'll learn each new concept from first principles. You won't just learn about a feature; you'll also understand how it works, and why it works the way it does. Everything you learn is forward-compatible with the just-released OpenGL ES 3, and you can even apply these techniques to other platforms, such as iOS or HTML5 WebGL.

Playing at a Distance Sonia Fizek,2022-11-01 An essential exploration of video game aesthetic that decenters the human player and challenges what it means to play. Do we play video games or do video games play us? Is nonhuman play a mere paradox or the future of gaming? And what do video games have to do with quantum theory? In *Playing at a Distance*, Sonia Fizek engages with these and many more daunting questions, forging new ways to think and talk about games and play that decenter the human player and explore a variety of play formats and practices that require surprisingly little human action. Idling in clicker games, wandering in walking simulators, automating gameplay with bots, or simply watching games rather than playing them—Fizek shows how these seemingly marginal cases are central to understanding how we play in the digital age. Introducing the concept of distance, Fizek reorients our view of computer-mediated play. To “play at a distance,” she says, is to delegate the immediate action to the machine and to become participants in an algorithmic spectacle. Distance as a media aesthetic framework enables the reader to come to terms with the ambiguity and aesthetic diversity of play. Drawing on concepts from philosophy, media theory, and posthumanism, as well as cultural and film studies, *Playing at a Distance* invites a wider understanding of what digital games and gaming are in all their diverse experiences and forms. In challenging the common perception of video games as inherently interactive, the book contributes to our understanding of the computer’s influence on practices of play—and prods us to think more broadly about what it means to play.

Experimental Writing Lawrence Lenhart,Will Cordeiro,2024-02-22 An inspiring guide to the practices of contemporary experimental creative writing, this book explores

experimentation within both traditional writing genres and 'post-genre' modes such as hybrid texts, Non-creative writing, textual materiality, creative re-purposing, performance and new media technologies. Combining the practices, history, social context, and philosophical backgrounds of experimental work with a broad anthology of models in-book and online, *Experimental Writing* gives you the toolkit of techniques and skills to confidently engage with forms previously perceived as intimidating so that you can reinvigorate your craft. In addition, the book includes sections on new approaches to the workshop model, emphasis on community and collaboration, and institutional critique. These chapters will provide you with a “big picture” perspective and the motivation to question the templates you work within, giving you the where-with-all to shape your own ideals for writing, no matter what their stylistic choices. Within its broad scope, *Experimental Writing* covers: - a comprehensive survey of relevant movements, texts, authors, and techniques of non-traditional forms - a survey of evolving trends with exemplars of how genres can be disrupted to help you appreciate experimental styles - demonstrations of how more diverse and innovative pedagogical interventions have the potential to inspire your creativity and create more original work - an examination of the institutional forces that have shaped the creative writing landscape you inhabit, to prompt you to re-examine the pressures, cultural biases, and power structures that have shaped both your aesthetic vision and potential future career paths - frameworks for independent research, practitioner interviews, and motivating questions to get you thinking and questioning before you encounter each new topic With each chapter accompanied by stimulating pedagogical features such as a timeline of experimental writing, free writes, games and constraints, reflections, exercises, prompts and case studies throughout, this invaluable text reveals wider horizon for your artistic endeavors and will activate your critical thinking about a range of issues and ideas. Additional online resources for this book can be found at <http://www.bloomsburyonlineresources.com/experimental-writing-a-writers-guide-and-anthology>.

Serious Games, Interaction and Simulation Carlos Vaz de Carvalho,Paula Escudeiro,António Coelho,2016-12-07 This book constitutes the thoroughly refereed post-conference proceedings of the 6th International Conference on Serious Games, Interaction and Simulation, SGAMES 2016, held in Porto, Portugal, in June 2016. Machine-to-Machine Marketing (M3) via Anonymous Advertising Apps Anywhere Anytime (A5) Jesus Mena,2012-05-02 In today’s wireless environment, marketing is more frequently occurring at the server-to-device level—with that device being anything from a laptop or phone to a TV or car. In this real-time digital marketplace, human attributes such as income, marital status, and age are not the most reliable attributes for modeling consumer behaviors. A more effective approach is to monitor and model the consumer’s device activities and behavioral patterns. Machine-to-Machine Marketing (M3) via Anonymous Advertising Apps Anywhere Anytime (A5) examines the technologies, software, networks, mechanisms, techniques, and solution providers that are shaping the next generation of mobile advertising. Discussing the interactive environments that comprise the web, it explains how to deploy Machine-to-Machine Marketing (M3) and Anonymous Advertising Apps Anywhere Anytime (A5). The book is organized into four sections: Why – Discusses the interactive environments and explains how M3 can be deployed How – Describes which technologies and solution providers can be used for executing M3 Checklists – Contains lists of techniques, strategies, technologies, and solution providers for M3 Case Studies – Illustrates M3 and A5 implementations in companies across various industries Providing wide-ranging coverage that touches on data mining, the web, social media, marketing, and mobile communications, the book’s case studies show how M3 and A5 are being implemented at JP Morgan Chase, Hyundai, Dunkin’ Donuts, New York Life, Twitter, Best Buy, JetBlue, IKEA, Urban Outfitters, JC Penney, Sony, eHarmony, and NASCAR just to name a few. These case studies provide you with the real-world insight needed to market effectively and profitably well into the future. Each company, network, and resource mentioned in the book can be accessed through the hundreds of links included on the book’s companion site: www.jesusmena.com

Transnational Contexts of Culture, Gender, Class, and Colonialism in Play Alexis Pulos,S. Austin Lee,2016-12-24 This book examines the local, regional and transnational contexts of video games through a focused analysis on gaming communities, the ways game design regulates gender and class relations, and the impacts of colonization on game design. The critical interest in games as a cultural artifact is covered by a wide range of interdisciplinary work. To highlight the social impacts of games the first section of the book covers the systems built around high score game competitions, the development of independent game design communities, and the formation of fan communities and cosplay. The second section of the book offers a deeper analysis of game structures, gender and masculinity, and the economic constraints of empire that are built into game design. The final section offers a macro perspective on transnational and colonial discourses built into the cultural structures of East Asian game play.

ECAI 2020 G. De Giacomo,A. Catala,B. Dilkina,2020-09-11 This book presents the proceedings of the 24th European Conference on Artificial Intelligence (ECAI 2020), held in Santiago de Compostela, Spain, from 29 August to 8 September 2020. The conference was postponed from June, and much of it conducted online due to the COVID-19 restrictions. The conference is one of the principal occasions for researchers and practitioners of AI to meet and discuss the latest trends and challenges in all fields of AI and to demonstrate innovative applications and uses of advanced AI technology. The book also includes the proceedings of the 10th Conference on Prestigious Applications of Artificial Intelligence (PAIS 2020) held at the same time. A record number of more than 1,700 submissions was received for ECAI 2020, of which 1,443 were reviewed. Of these, 361 full-papers and 36 highlight papers were accepted (an acceptance rate of 25% for full-papers and 45% for highlight papers). The book is divided into three sections: ECAI full papers; ECAI highlight papers; and PAIS papers. The topics of these papers cover all aspects of AI, including Agent-based and Multi-agent Systems; Computational Intelligence; Constraints and Satisfiability; Games and Virtual Environments; Heuristic Search; Human Aspects in AI; Information Retrieval and Filtering; Knowledge Representation and Reasoning; Machine Learning; Multidisciplinary Topics and Applications; Natural Language Processing; Planning and Scheduling; Robotics; Safe, Explainable, and Trustworthy AI; Semantic Technologies; Uncertainty in AI; and Vision. The book will be of interest to all those whose work involves the use of AI technology.

Social Networking and Computational Intelligence Rajesh Kumar Shukla,Jitendra Agrawal,Sanjeev Sharma,Narendra S. Chaudhari,K. K. Shukla,2020-03-21 This book

presents a selection of revised and extended versions of the best papers from the First International Conference on Social Networking and Computational Intelligence (SCI-2018), held in Bhopal, India, from October 5 to 6, 2018. The Future Architect Srinivasulu Kopparapo, Rupesh Nellore, 2020-12-10 After interviewing, talking and surveying with many mid-level managers, technical leads and engineers who are looking for upscaling their career paths, we found a big gap in bridging the business problem understanding and technology solutioning. Especially asking the right questions, factors influenced for choosing the approach, understanding assumptions, finding the low hanging and high fruits and creating an MVP roadmap. This book will help them to connect the dots and uplift the new thought process. The use-cases and problems are being picked up based on real life business scenarios and are widely used in everyday life.

Evangelist Marketing Alex L. Goldfayn, 2012-01-03 In Evangelist Marketing, Alex Goldfayn argues that technology companies succeed in spite of their marketing, not because of it. He says that if consumer tech makers ceased all marketing activity today, they would not see a significant decline in sales. In this book, Alex presents why the current state of overly-technical, features-oriented tech marketing, branding, communications and public relations is costing the industry billions of dollars—easy money that's voluntarily being left on the table. Then he lays out a step-by-step system for creating intensely loyal brand evangelists based on deep consumer insights and simple, emotional language. Evangelist Marketing is written for consumer tech companies big and small—from PC manufacturers to Web-based services. It's also sure to improve the work of their marketing and public relations agencies.

The book discusses the latest innovation and advanced research in the diverse field of Mechanical Engineering such as materials, manufacturing processes, evaluation of materials properties for the application in automotive, aerospace, marine, locomotive and energy sectors. The topics covered include advanced metal forming, Energy Efficient systems, Material Characterization, Advanced metal forming, bending, welding & casting techniques, Composite and Polymer Manufacturing, Intermetallics, Future generation materials, Laser Based Manufacturing, High-Energy Beam Processing, Nano materials, Smart Material, Super Alloys, Powder Metallurgy and Ceramic Forming, Aerodynamics, Biological Heat & Mass Transfer, Combustion & Propulsion, Cryogenics, Fire Dynamics, Refrigeration & Air Conditioning, Sensors and Transducers, Turbulent Flows, Reactive Flows, Numerical Heat Transfer, Phase Change Materials, Micro- and Nano-scale Transport, Multi-phase Flows, Nuclear & Space Applications, Flexible Manufacturing Technology & System, Non-Traditional Machining processes, Structural Strength and Robustness, Vibration, Noise Analysis and Control, Tribology. In addition, it discusses industrial applications and cover theoretical and analytical methods, numerical simulations and experimental techniques in the area of Mechanical Engineering. The book will be helpful for academics, including graduate students and researchers, as well as professionals interested in interdisciplinary topics in the areas of materials, manufacturing, and energy sectors.

Mobile Sensors and Context-Aware Computing Manish J. Gajjar, 2017-02-22 Mobile Sensors and Context-Aware Computing is a useful guide that explains how hardware, software, sensors, and operating systems converge to create a new generation of context-aware mobile applications. This cohesive guide to the mobile computing landscape demonstrates innovative mobile and sensor solutions for platforms that deliver enhanced, personalized user experiences, with examples including the fast-growing domains of mobile health and vehicular networking. Users will learn how the convergence of mobile and sensors facilitates cyber-physical systems and the Internet of Things, and how applications which directly interact with the physical world are becoming more and more compatible. The authors cover both the platform components and key issues of security, privacy, power management, and wireless interaction with other systems. Shows how sensor validation, calibration, and integration impact application design and power management Explains specific implementations for pervasive and context-aware computing, such as navigation and timing Demonstrates how mobile applications can satisfy usability concerns, such as know me, free me, link me, and express me Covers a broad range of application areas, including ad-hoc networking, gaming, and photography

Recent Advances in Technologies for Inclusive Well-Being Anthony Lewis Brooks, Sheryl Brahmam, Bill Kapralos, Lakhmi C. Jain, 2017-02-18 This book presents current innovative, alternative and creative approaches that challenge traditional mechanisms in and across disciplines and industries targeting societal impact. A common thread throughout the book is human-centered, uni and multi-modal strategies across the range of human technologies, including sensing and stimuli; virtual and augmented worlds; games for serious applications; accessibility; digital-ethics and more. Focusing on engaging, meaningful, and motivating activities that at the same time offer systemic information on human condition, performance and progress, the book is of interest to anyone seeking to gain insights into the field, be they students, teachers, practicing professionals, consultants, or family representatives. By offering a wider perspective, it addresses the need for a core text that evokes and provokes, engages and demands and stimulates and satisfies.

Design for People Living with Dementia Paul A. Rodgers, 2022-05-05 This book presents the latest research that shows how design thinking, making, and acting contribute to the co-designing and development of products, spaces, and services with people living with dementia. We know that there is currently no cure for the 130+ kinds of dementia that millions of people live with all over the world, but the designed interventions such as the products, spaces, and services described in this book can address stigma, isolation, loss of confidence, and raise awareness and greater understanding of dementia. This book showcases a range of innovative and creative design interventions that have been developed to break the cycle of well-established opinions, strategies, mindsets, and ways of doing that tend to remain unchallenged in the health and social care of people living with dementia. The book will be of interest to scholars working in product design, service design, experience design, architecture, design research, information design, user-centred design, and design for health.
