Anti-suit Injunctions in International Arbitration Emmanuel Gaillard, 2005-03-01 IAI Series No. 2 The International Arbitration Institute (IAI) series on international arbitration is a new periodic series of publications that will focus on cutting edge issues and developments in international arbitration. About the IAI: The International Arbitration Institute (IAI), an organization created under the auspices of the Comité Français de  Arbitrage (CFA), was created to promote exchanges in international arbitration. The IAI is designed to promote exchanges on current issues in the field of international commercial arbitration. Its activities include the regular organization of international conferences, colloquiums, as well as conducting various research projects. About the Book: Anti-suit injunctions are a device, originally found in common law countries, whereby a court - which retains its jurisdiction or anticipates to do so and which seeks to protect that jurisdiction or, more generally, the jurisdiction of the forum it deems to be the most appropriate - orders a party to refrain from bringing a claim before the courts of another State or before an arbitral tribunal or, if the party has already brought such a claim, orders that party to withdraw from, or the arbitrators to suspend, the proceedings. In the past few years, the use of anti-suit injunctions in the context of international arbitration has been spreading at a disturbing pace. The courts of many common law countries but also those of civil law tradition frequently resort to this device at a party's request, in order to disrupt the arbitration process or resist the enforcement of the award. How best to resolve those conflicts arising as a result of national courts' differing perspectives on the validity and scope of certain arbitration agreements? Are anti-suit injunctions in conformity with the requirements of public international law? When the courts of certain States enjoin a party to refrain from proceeding with an arbitration, should other courts enjoin them not to enjoin, or should they, like the U.S. Court of Appeal for the 5th Circuit in the Pertamina case, exercise a commendable self-restriction? These are just a few of the issues addressed in Anti-Suit Injunctions in International Arbitration.

Meeting Global Challenges through Better Governance International Co-operation in Science, Technology and Innovation OECD, 2012-06-15 Based on case studies, this book presents lessons and good practices on a range of governance mechanisms used for international co-operation in STI to address global challenges.

Precedent in International Arbitration Emmanuel Gaillard, Yas Banifatemi, International Arbitration Institute, 2008-06-01 IAI Series No. 5 The

International Arbitration Institute (IAI) series on international arbitration is a new periodic series of publications that will focus on cutting edge issues and developments in international arbitration. About the IAI: The International Arbitration Institute (IAI), an organization created under the auspices of the Comite Francais de l'Arbitrage (CFA), was created to promote exchanges international arbitration. The IAI is designed to promote exchanges on current issues in the field of international commercial arbitration. Its activities include the regular organization of international conferences, colloquiums, as well as conducting various research projects. About the book: Arbitrators routinely refer in their decisions to awards rendered by other arbitral tribunals that deal with the same issues. However natural it may seem to arbitrators and to parties who will refer to arbitral precedents in an attempt to support their position, such an approach raises many practical and theoretical questions: Is there such a thing as arbitral precedent? What weight should arbitrators give to decisions previously rendered by other arbitral tribunals? Can arbitral case law exist without consistency? Does such consistency exist? Is it necessary or simply desirable? What is the respective weight to be given to arbitral and national case law when arbitrators have to decide a case in accordance with a given law? These are some of the questions that this book explores, in the context of both international commercial arbitration and investment arbitration.
