**A History of Arab Graphic Design** Bahia Shehab,Haytham Nawar,2020-12-15 The first-ever book-length history of Arab graphic design PROSE AWARD WINNER, ART HISTORY & CRITICISM Arab graphic design emerged in the early twentieth century out of a need to influence, and give expression to, the far-reaching economic, social, and political changes that were taking place in the Arab world at the time. But graphic design as a formally recognized genre of visual art only came into its own in the region in the twenty-first century and, to date, there has been no published study on the subject to speak of. A History of Arab Graphic Design traces the people and events that were integral to the shaping of a field of graphic design in the Arab world. Examining the work of over eighty key designers from Morocco to Iraq, and covering the period from pre-1900 to the end of the twentieth century, Bahia Shehab and Haytham Nawar chart the development of design in the region, beginning with Islamic art and Arabic calligraphy, and their impact on Arab visual culture, through to the digital revolution and the arrival of the Internet. They look at how cinema, economic prosperity, and political and cultural events gave birth to and shaped the founders of Arab graphic design. Highlighting the work of key designers and stunningly illustrated with over 600 color images, A History of Arab Graphic Design is an invaluable resource tool for graphic designers, one which, it is hoped, will place Arab visual culture and design on the map of a thriving international design discourse.

**Handbook of Literacy in Diglossia and in Dialectal Contexts** Elinor Saiegh-Haddad,Lior Laks,Catherine McBride,2022-03-14 This volume is the first published collection of papers on the impact of diglossia and dialectal variations on language and

literacy acquisition, impairment, and education. The authors are pioneering in this field and are leading researchers with substantial experience in conducting research in this area. A wide range of areas and languages are covered, including the US, South Africa, Israel, and various European countries. The chapters present novel data and insights regarding the role of dialectal variations on language and literacy, from a wide range of countries and perspectives. These insights have significant theoretical and practical implications. A majority of literacy learners worldwide are taught to read and write in a language variety or a dialect that is not the same as their spoken language. Not only is this the global norm, but it is probably also the greatest obstacle to literacy learning. This volume is the first published collection of papers on the role of dialect in language and literacy acquisition, impairment, and education in a variety of languages and situations across Europe, the Middle East, North America, Africa, and Asia.The authors are pioneers in this field.

**Keyboard Warriors** Graham Edward Geddes,2016-08-17 The far-right English Defence League (EDL) is a strange product of global and local dynamics, most prominently the 'War on Terror'. While the EDL has become well known for its high-profile Islamophobic demonstrations within local communities, the bulk of its day-to-day activity occurs online within its social networking sites, between supporters – referred to as 'keyboard warriors'. 'Keyboard warriors'' activities are confined to the virtual realm and they are unlikely to attend EDL events in physical space, such as demonstrations. This book explores the kind of Islamophobic identity that is produced by EDL supporters within the networking sites, and focuses on how this identity is constructed around insecurities that are central to the lives of this population. EDL supporters can be identified as members of the working class that have experienced significant ontological insecurity since the 1980s, as a consequence of globalisation and related deindustrialisation. Working class identity has been weakened in contrast to the post-war era when stronger

roles could be located for such groups. Adrift in a post-industrial landscape, located in an ethno-religious war attached to feelings of class and national pride and now mediated by new social networking systems, the insecurities of these sections of the white working class have become attached to a construct of Islamic identity that is defined as essentially immoral and dangerous. This attribution of 'otherness', however, is not restricted merely to Muslims, but is applied to any perceived anti-EDL agent, including the government and the police, which are aggregated into a hegemonic foe that persecutes the English nation and facilitates Islamic expansionism. The central theme of the book is that new media systems have become critical to an understanding of extreme political identities and the expansion of worldviews in which inter-group conflict is amplified, while also offering a sense of meaning and self-esteem for those involved.

   *Inside Arabic Music* Johnny Farraj,Sami Abu Shumays,2019 What makes hundreds of listeners cheer ecstatically at the same instant during a live concert by Egyptian diva Umm Kulthum? What is the unspoken language behind a taqsim (traditional instrumental improvisation) that performers and listeners implicitly know? How can Arabic music be so rich and diverse without resorting to harmony? Why is it so challenging to transcribe Arabic music from a recording? Inside Arabic Music answers these and many other questions from the perspective of two insiders to the practice of Arabic music, by documenting a performance culture and a know-how that is largely passed on orally. Arabic music has spread across the globe, influencing music from Greece all the way to India in the mid-20th century through radio and musical cinema, and global popular culture through Raqs Sharqi, known as Bellydance in the West. Yet despite its popularity

and influence, Arabic music, and the maqam scale system at its heart, remain widely misunderstood. Inside Arabic Music de-mystifies maqam with an approach that draws theory directly from practice, and presents theoretical insights that will be useful to practitioners, from the beginner to the expert - as well as those interested in the related Persian, Central Asian, and Turkish makam traditions. Inside Arabic Music's discussion of maqam and improvisation widens general understanding of music as well, by bringing in ideas from Saussurean linguistics, network theory, and Lakoff and Johnson's theory of cognition as metaphor, with an approach parallel to Gjerdingen's analysis of Galant-period music - offering a lens into the deeper relationships among music, culture, and human community.

*African Discourse in Islam, Oral Traditions, and Performance* Abdul-Rasheed Na'Allah,2010-09-13 Through an engaged analysis of writers such as Wole Soyinka, Ola Rotimi, Niyi Osundare, and Tanure Ojaide and of African traditional oral poets like Omoekee Amao Ilorin and Mamman Shata Katsina, Abdul-Rasheed Na'Allah develops an African indigenous discourse paradigm for interpreting and understanding literary and cultural materials. Na'Allah argues for the need for cultural diversity in critical theorizing in the twenty-first century. He highlights the critical issues facing scholars and students involved in criticism and translation of marginalized texts. By returning the African knowledge system back to its roots and placing it side by side with Western paradigms, Na'Allah has produced a text that will be required reading for scholars and students of African culture and literature. It is an important contribution to scholarship in the domain of mobility of African oral tradition, and on African literary, cultural and performance

discourse.

**The Love of Stones** Tobias Hill,2015-06-02 Burrowing through the goldsmiths' quarters and hidden archives of London, Tokyo, and Istanbul, Katharine Sterne is on the trail of a ruby, diamond, and pearl brooch once worn by Queen Elizabeth I. Interwoven with the tale of her hunt is that of a pair of Iraqi Jewish brothers who traveled to London two hundred years earlier with fortunes made from an unearthed jar of priceless stones. Spanning two continents and six centuries, The Love of Stones follows three very different people, each consumed by the same desire-possession of the legendary jewel-which binds their stories together in an irresistible quest.

*Time of White Horses* Ibrahim Nasrallah,2016-03 This comi-tragic fictional-factual saga takes place in the environs of Jerusalem, from late Ottoman times to the establishment of the State of Israel in 1948. A vivid picture of Palestinian villagers' preoccupations and aspirations--their ties to their land, to their animals, and to one another. Relives the realities of the Palestinian village in the early twentieth century, Zionist colonization and its impact on Arab rural life, the trauma that accompanied the

British mandate and its aftermath, the Palestinians' struggle to maintain the autonomy and dignity they had known for centuries on end, and the beginnings of life under the Zionist state.

*The Diffusion of "Small" Western Technologies in the Middle East* Uri M. Kupferschmidt,2023-10-02 In recent years we have become interested in the diffusion of "small" Western technologies in the countries of the Middle East during the 19th and 20th centuries, the era of Imperialism and first globalization. We postulated a contrast between "small" and "big" technologies. Under the latter category we may understand railway systems, electricity grids, telegraph networks, and steam navigation, imposed by foreign powers or installed by connected local entrepreneurs. But many "small" Western technologies, such as sewing machines, typewriters, pianos, eyeglasses, and similar consumer goods, which had been developed and manufactured in Europe and America, were wanted, and willingly acquired by the agency of individual users elsewhere. In a few cases, however, the inventions had to be adapted, or were overstepped, and even delayed. Some were adopted as social markers or status symbols only by elites who could afford them. Processes of adoption and diffusion therefore differed according to cultural settings, preferences, and needs. Social and cultural historians, and social scientists, not only of the Middle East, will find in this collection of essays a new approach to the impact of Western technological inventions on the Middle East.

**The Bamboo Stalk** Saud Alsanousi,2015-04-23 Winner of the International Prize for Arabic Fiction Josephine escapes poverty by coming to Kuwait from the Philippines to

work as a maid, where she meets Rashid, an idealistic only son with literary aspirations. Josephine, with all the wide-eyed naivety of youth, believes she has found true love. But when she becomes pregnant, and with the rumble of war growing ever louder, Rashid bows to family and social pressure, and sends her back home with her baby son, José. Brought up struggling with his dual identity, José clings to the hope of returning to his father's country when he is eighteen. He is ill-prepared to plunge headfirst into a world where the fear of tyrants and dictators is nothing compared to the fear of 'what will people say'. And with a Filipino face, a Kuwaiti passport, an Arab surname and a Christian first name, will his father's country welcome him? The Bamboo Stalk takes an unflinching look at the lives of foreign workers in Arab countries and confronts the universal problems of identity, race and religion.

**Omar Khayyam's Secret: Hermeneutics of the Robaiyat in Quantum Sociological Imagination: Book 1: New Khayyami Studies** Mohammad H. Tamdgidi,2021-06-01 Omar Khayyam's Secret: Hermeneutics of the Robaiyat in Quantum Sociological Imagination is a twelve-book series of which this book, subtitled New Khayyami Studies: Quantumizing the Newtonian Structures of C. Wright Mills's Sociological Imagination for A New Hermeneutic Method, is the first volume. Each book is independently readable, although it will be best understood as a part of the whole series. In the overall series, the transdisciplinary sociologist Mohammad H. Tamdgidi shares the results of his decades-long research on Omar Khayyam, the enigmatic 11th/12th centuries Persian Muslim sage, philosopher, astronomer, mathematician, physician, writer, and poet

from Neyshabour, Iran, whose life and works still remain behind a veil of deep mystery. Tamdgidi's purpose has been to find definitive answers to the many puzzles still surrounding Khayyam, especially regarding the existence, nature, and purpose of the Robaiyat in his life and works. To explore the questions posed, he advances a new hermeneutic method of textual analysis, informed by what he calls the quantum sociological imagination, to gather and study all the attributed philosophical, religious, scientific, and literary writings of Khayyam. In this first book of the series, following a common preface and introduction to the series, Tamdgidi develops the quantum sociological imagination method framing his hermeneutic study in the series as a whole. In the prefatory note he shares the origins of this series and how the study is itself a moment in the trajectory of a broader research project. In his introduction, he describes how centuries of Khayyami studies, especially during the last two, have reached an impasse in shedding light on his enigmatic life and works, especially his attributed Robaiyat. The four chapters of the book are then dedicated to developing the quantum sociological imagination as a new hermeneutic method framing the Khayyami studies in the series. The method builds, in an applied way, on the results of Tamdgidi's recent work in the sociology of scientific knowledge, Liberating Sociology: From Newtonian Toward Quantum Imagination: Volume 1: Unriddling the Quantum Enigma (2020), where he explored extensively, in greater depth, and in the context of understanding the so-called "quantum enigma," the Newtonian and quantum ways of imagining reality. In this first book, he shares the findings of that research in summary amid new applied insights developed in relation to Khayyami studies. In the first chapter, Tamdgidi raises a set of eight questions

about the structure of C. Wright Mills's sociological imagination as a potential framework for Khayyami studies. In the second chapter, he shows how the questions are symptomatic of Newtonian structures that still continue to frame Mills's sociological imagination. In the third chapter, the author explores how the sociological imagination can be reinvented to be more in tune with the findings of quantum science. In the last chapter, the implications of the quantum sociological imagination for devising a hermeneutic method for new Khayyam and Robaiyat studies are outlined. In conclusion, the findings of this first book of the Omar Khayyam's Secret series are summarized.
