Takayama,2006-08-24 This book constitutes the refereed proceedings of the Second International Congress on Mathematical Software, ICMS 2006. The book presents 45 revised full papers, carefully reviewed and selected for presentation. ICMS 2023 Robbi Rahim,Nasib Marbun,2023-12-15 The 2nd International Conference of Multidisciplinary Studies (ICMS) was held on July 12, 2023 in Semarang, Indonesia. Our theme was “Smart Technology and Creative Economy Transformation to Support Post-Pandemic Development”. We used a double-blind review to ensure the quality of papers. Reviewers were not allowed to know the identity of the authors. Contributions of the ICMS conference to academia and society are: 1. Building a network between universities in Asia, 2. Increase interest in research in the fields of Information Technology, Economics, Tourism, Law, Engineering, and Linguistics, 3. Building networks between researchers, academics, professionals, and postgraduate students, particularly in the fields of Technology, Economics, Tourism, Law, Engineering, and Languages, 4. A means of disseminating scientific ideas and research results to be documented in scientific publications.

Mathematical Software - ICMS 2010 Komei Fukuda,Joris van der Hoeven,Michael Joswig,Nobuki Takayama,2010-08-30 The ICMS Developer's Meeting is an international congress for which the main theme is mathematical software. The 2010 meeting was the third of a series of meetings of similar theme, the first being

held in Beijing, China in 2002, and the second in Castro-Urdiales, Spain in 2006. The field of mathematics has numerous branches, and in each branch we find that algorithms, and also implementations and applications of software systems, are studied. Researchers who endeavor to make such studies also have international meetings within their specific branches of mathematics, and these meetings have made significant contributions to the fields in which they lie. The ICMS (International Congresses on Mathematical Software), on the other hand, is a general (not branch specific) meeting on mathematical software, which is held every four years, and is a rare opportunity for developers of mathematical software from different branches of mathematics, as well as mathematicians who are interested in mathematical software, to gather together.

Fiscal Incentives for Biodiversity Conservation Maryanne Grieg-Gran,2000

Fiscal Incentives for Biodiversity Conservation Maryanne Grieg-Gran,2014 This paper evaluates an innovative tax revenue-sharing scheme in Brazil, designed to promote the conservation and management of protected areas. Known as the ICMS Ecologico, the scheme was introduced by the state of Parana in Brazil and subsequently by several other states. The scheme aims to compensate municipal governments for the loss of potential tax revenue from the designation of protected areas (mainly by the state and federal government). It is also intended to have an incentive effect, encouraging both better management of existing protected areas as well as the designation of new conservation areas. The paper examines the experience with the ICMS Ecologico in the states of Minas Gerais and Rondonia, two states which present a marked contrast in terms of land use, population density and forest resources. It considers the extent to which the compensation and incentive objectives have been achieved in the two states. The distributional impact of the ICMS Ecologico is also examined through an analysis of the characteristics of the counties which are winners or losers under the scheme.

Benefícios fiscais do ICMS Ivan Ozai, 2019-10-31 O ICMS é um dos impostos mais complexos do sistema tributário brasileiro, em parte em razão de seu caráter plurifásico e não cumulativo, mas especialmente devido à numerosa e diversificada gama de benefícios fiscais presentes nas diversas legislações tributárias estaduais. A escassez de produção acadêmica que procure dar sistematicidade à matéria tem resultado na proliferação de equívocos conceituais e gerado tormentosas divergências interpretativas entre advogados, fisco e judiciário. Este livro é o primeiro a dar tratamento jurídico abrangente e sistemático aos diversos institutos desonerativos relacionados ao ICMS, como a

isenção, o diferimento, a suspensão, a redução de base de cálculo e o crédito presumido. Partindo de recentes desenvolvimentos da teoria do direito, mas sem perder de vista as normas constitucionais e infraconstitucionais brasileiras, a obra fornece uma análise jurídica rigorosa das diversas modalidades de benefícios fiscais do ICMS e propõe desdobramentos teóricos inéditos a diversas questões relativas ao tema. Tendo atuado como advogado, consultor, juiz titular do Tribunal de Impostos e Taxas e diretor adjunto da Consultoria Tributária da Secretaria da Fazenda do Estado de São Paulo, o autor se vale de sua experiência cotidiana com o ICMS para trazer conteúdo relevante a advogados, consultores, juízes e servidores públicos que trabalham com impostos indiretos ao fornecer subsídios para compreender algumas das questões mais controversas envolvendo o ICMS, como as diferentes hipóteses de aproveitamento de crédito nos casos de diferimento e isenção, a convivência entre crédito regular e crédito presumido, o estorno proporcional de créditos, e as distinções entre o crédito adicional concedido e o regime tributário substitutivo.
