Hierarchic Electrodynamics and Free Electron Lasers Victor V. Kulish,2018-09-03 Hierarchic Electrodynamics and Free Electron Lasers: Concepts, Calculations, and Practical Applications presents intriguing new fundamental concepts in the phenomenon of hierarchical electrodynamics as a new direction in physics. Concentrating on the key theory of hierarchic oscillations and waves, this book focuses on the numerous applications of nonlinear theory in different types of high-current Free Electron Lasers (FEL), including their primary function in the calculation methods used to analyze various multi-resonant, multi-frequency nonlinear FEL models. This is considered the first book to: Completely and systematically describe the foundation of hierarchical electrodynamics as a new direction of physics Fully represent the physics of high-current FEL—and associated models—from the hierarchic oscillation wave perspective Cover the multi-harmonic nonlinear theory of new types of electronic devices, such as plasma-beam and two-stream FEL Formulate and substantiate the concept of cluster femtosecond FEL Analyze practical prospects for a new generation of a global Star Wars strategic defense systems These subjects involve a wide range of disciplines. Using numerous real-world examples to illustrate information and concepts, the book offers a mathematical foundation to explore FEL applications as well as analyze hierarchic plasma-like electrodynamic systems and femto-second clusters of electromagnetic energy. Assembling fragmented concepts from existing literature, the author re-examines classic approaches in order to develop new insights and achieve scientific breakthroughs.

Engaging Ideas John C. Bean,Dan Melzer,2021-06-03 Use your course's big ideas to accelerate students' growth as writers and critical thinkers The newly revised third edition of Engaging Ideas delivers a step-by-step guide for designing writing assignments and critical thinking activities that engage students with important subject-matter questions. This new edition of the celebrated book (now written by the co-author team of Bean and Melzer) uses leading and current research and theory to help you link active learning pedagogy to your courses' subject matter. You'll learn how to: Design formal and informal writing assignments that guide students toward thinking like experts in your discipline Use time-saving strategies for coaching the writing process and handling the paper load including alternatives to traditional grading such as portfolio assessment and contract grading Help students use self-assessment and peer response to improve their work Develop better ways than the traditional research paper to teach undergraduate reading and research Integrate social media, multimodal genres, and digital technology into the classroom to promote active learning This book demonstrates how writing can easily be integrated with other critical thinking activities such as inquiry discussions, simulation games, classroom debates, and interactive lectures. The reward of this book is watching students come to class better prepared, more vested in the questions your course investigates, more apt to study purposefully, and more likely to submit high-quality work. Perfect for higher education faculty and curriculum designers across all disciplines, Engaging Ideas will also earn a place in the libraries of graduate students in higher education.

We Want Land to Live Amy Trauger,2017 We Want Land to Live explores the current boundaries of radical approaches to food sovereignty. First coined by La Via Campesina (a global movement whose name means the peasant's way), food sovereignty is a concept that expresses the universal right to food. Amy Trauger uses research combining ethnography, participant observation, field notes, and interviews to help us understand the material and definitional struggles surrounding the de commodification of food and the transfor-mation of the global food system's political-economic foundations. Trauger's work is the first of its kind to analytically and coherently link a dialogue on food sovereignty with case studies illustrating the spatial and territorial strate-gies by which the movement fosters its life in the margins of the corporate food regime. She discusses community gardeners in Portugal; small-scale, independent farmers in Maine; Native American wild rice gatherers in Minnesota; seed library supporters in Pennsylvania; and permaculturists in Georgia. The problem in the food system, as the activists profiled here see it, is not markets or the role of governance but that the right to food is conditioned by what the state and corporations deem to be safe, legal, and profitable--and not by what eaters think is right in terms of their health, the environment, or their communities. Useful for classes on food studies and active food movements alike, We Want Land to Live makes food sovereignty issues real as it illustrates a range of methodological alternatives that are consistent with its discourse: direct action (rather than charity, market creation, or policy changes), civil disobedience (rather than compliance with discriminatory laws), and mutual aid (rather than reliance on top-down aid).

The Giving Tree Shel Silverstein,2014-02-18 As The Giving Tree turns fifty, this timeless classic is available for the first time ever in ebook format. This digital edition allows young readers and lifelong fans to continue the legacy and love of a classic that will now reach an even wider audience. Once there was a tree...and she loved a little boy. So begins a story of unforgettable perception, beautifully written and illustrated by the gifted and versatile Shel Silverstein. This moving parable for all ages offers a touching interpretation of the gift of giving and a serene acceptance of another's capacity to love in return. Every day the boy would come to the tree to eat her apples, swing from her branches, or slide down her trunk...and the tree was happy. But as the boy grew older he began to want more from the tree, and the tree gave and gave and gave. This is a tender story, touched with sadness, aglow with consolation. Shel Silverstein's incomparable career as a bestselling children's book author and illustrator began with Lafcadio, the Lion Who Shot Back. He is also the creator of picture books including A Giraffe and a Half, Who Wants a Cheap Rhinoceros?, The Missing Piece, The Missing Piece Meets the Big O, and the perennial favorite The Giving Tree, and of classic poetry collections such as Where the Sidewalk Ends, A Light in the Attic, Falling Up, Every Thing On It, Don't Bump the Glump!, and Runny Babbit. And don't miss the other Shel Silverstein ebooks, Where the Sidewalk Ends and A Light in the Attic!

Gardeners' World: 101 Ideas for a Wildlife-friendly Garden Mick Lavelle,2016-05-12 If you yearn to watch blackbirds feeding their young, and butterflies flitting amongst the flowers but you don't have the space for a meadow or want to give your whole garden over to nature, don't despair: with just a few clever tricks you can bring the countryside and its residents to your garden, even in the most urban of locations. Encouraging a little wildlife into your garden can bring a lot of benefits for the gardener. Having a wildlife-friendly garden isn't just about letting nature do its thing so that you can enjoy watching it from your window or the patio, it has a far more important contribution to make. Let nature do the hard work of gardening for you: ladybirds and blue tits will make short work of aphids, while birds, bats and hedgehogs will feast on larger insects. It's biological control at its best; leaving you more time to sit in your deck chair and listen to the dawn chorus of the birds, the croaking of frogs, and the nighttime grunting of visiting hedgehogs. If the natural look of a wildlife garden isn't your thing, you'll be pleased to know that even the most modern, minimalist garden can

include features which will bring in wildlife without cramping your style. In this book, the team at Gardeners' World Magazine bring you tips and advice on simple ways in which you can create a haven for wildlife - whatever your garden style.

This Book Was a Tree Marcie Chambers Cuff,2014-04-01 At no time in human history have we been more disconnected with what lies outside our front doors. Within just a century, our relationship with our surroundings has transformed from one of exploration to one of disassociation. In *This Book Was a Tree*, science teacher Marcie Cuff issues a call for a new era of pioneers—not leathery, backwoods deerskin-wearing salt pork and hominy pioneers, but strong-minded, clever, crafty, mudpie-making, fort-building individuals committed to examining the natural world and deciphering nature’s perplexing puzzles. Within each chapter, readers will discover a principle for reconnecting with the natural world around them, from learning to be still to discovering the importance of giving back. With a mix of science and hands-on crafts and activities, readers will be encouraged to brainstorm, imagine, and understand the world as inventive scientists—to touch, collect, document, sketch, decode, analyze, experiment, unravel, interpret, compare, and reflect.
