**Japanese Naval Air Force Fighter Units and Their Aces, 1932–1945** Ikuhiko Hata,Yasuho Izawa,Christopher Shores,2012-09-20 An extensive guide to Japan’s Naval Air Force Fighter Units and their ace pilots during conflicts in the 1930s and ‘40s, now in English. The book begins by looking at the land- and aircraft carrier-based navy fighter units and their operations from 1932 to 1945, as well as their history and achievements. This is followed with biographical details for all pilots who claimed eight or more aerial victories. The thorough appendix provides detailed listings of all pilots known to have claimed five or more victories (and thus considered to be “aces”), listings of the graduation from training of all Japanese Navy fighter pilots, and of fighter pilot casualties. Photographs, maps, and artist’s side-view drawings and paintings of aircraft relevant to each of the units are also included. This revised edition is a companion volume to Japanese Army Air Force Fighter Units and Their Aces, 1931–1945.

**Modern Fighter Aircraft** Francis Crosby,2004 This book consists of an A-Z of modern fighters, from 1945 to the present day. From the propeller-driven Hawker SEa Fury to the jet-powered Eurofighter Typhoon, all the principal post-war fighters are described, illustrated and analyzed.

**Mission and Combat Reports of the 5th Fighter Command 1942–1945** United States. National Archives and Records Service,1979

**Fighter Aircraft Since, 1945** Frank Schwede,2017-11-30 The world's first jet engines were already available shortly before the end of the Second World War, but they had not been developed to a high enough standard to take part. This changed after 1945 when, on both sides of the Iron Curtain, one technological development surpassed the others and records tumbled almost every week. The era of the piston engine was finally over and jet fighters now dominated the skies. By the mid-1950s their speed had already reached double that of the speed of sound; an achievement which a few years earlier, would have sounded to many like science fiction.

**Fighter Pilots of the RAF 1939–1945** Chaz Bowyer,2000-09-13 The author has selected some twenty RAF fighter pilots of the Second World War, not only to give overdue recognition to their prowess and courage, but also to exemplify the wide diversity of the individual characters of those men whose war was fought from the cockpit of an RAF fighter. A few were familiar names but most received little or no public acclaim, being part of the silent majority which provided the real spine of the RAF's fighter effort throughout the conflict.

**506th Fighter Group** Robert J. Grant,Zbigniew Kolacha,2011-03

**The Last Fighter Pilot** Don Brown,2017-07-31 \*A NATIONAL BESTSELLER!\* The New York Post calls The Last Fighter Pilot a must-read book. From April to August of 1945, Captain Jerry Yellin and a small group of fellow fighter pilots flew dangerous bombing and strafe missions out of Iwo Jima over Japan. Even days after America dropped the atomic bombs on Hiroshima on August 6 and Nagasaki on August 9, the pilots continued to fly. Though Japan had suffered unimaginable devastation, the emperor still refused to surrender. Bestselling author Don Brown (Treason) sits down with Yellin, now ninety-three years old, to tell the incredible true story of the final combat mission of World War II. Nine days after Hiroshima, on the morning of August 14th, Yellin and his wingman 1st Lieutenant Phillip Schlamberg took off from Iwo Jima to bomb Tokyo. By the time Yellin returned to Iwo Jima, the war was officially over—but his young friend Schlamberg would never get to hear the news. The Last Fighter Pilot is a harrowing first-person account of war from one of America's last living World War II veterans.

**Modern Fighter Aircraft** Mike Sharpe,2014-08 This engaging title provides readers with a comprehensive overview of how modern fighter aircraft have been used in military combat around the world. The title begins with a discussion of modern fighter aircraft, their importance and use in battles, and how this has changed over time. This section is followed by almanac-style entries that highlight featured fighter aircraft through the modern era, including specifications and performance statistics, and contributions in battle.

**Luftwaffe Night Fighter Combat Claims, 1939-1945** John Foreman,Simon W. Parry,Johannes Matthews,2003 A definitive list of nearly 7,000 claims submitted by Luftwaffe night fighter pilots for Allied aircraft shot down in WW2. These claims are listed with the following details; Date, Time, Location, Type of aircraft shot down, Claiming Pilot and his Unit. Entries feature claims against Russian, American as well as Bomber Command aircraft.

**Alarmstart East** Patrick G. Eriksson,2018-10-15 The experiences of the German fighter pilots in the Second World War, based on extensive recollections of veterans as well as primary documents, and diary and flying log book extracts, with photographs from the veterans themselves, many never previously published.

**Fighter Aircraft Combat Debuts, 1915–1945** Jon Guttman, 2014 An International History of the Development, Competition, and Deployment of High-Speed, Maneuverable, Fighter Aircraft During the Era of the World Wars Of all military aircraft, fighter planes hold a mystique all their own. Perhaps it is because fighters can afford the least compromise: when the goal is to seize and maintain control of the air, the confrontation is direct. During World War I, the concept of air superiority took hold and in the ensuing decades the development of fighter aircraft became an ongoing back-and-forth battle, with adversaries trying to gain an upper hand through innovations in aerodynamics, powerplants, and armament. *Fighter Aircraft Combat Debuts, 1915-1945: Innovation in Air Warfare Before the Jet Age* by prominent aviation expert Jon Guttman explores the first combats for a variety of fighters of World War I, the conflicts of the so-called interwar years, and World War II—a thirty-year period that saw the birth of the fighter concept and its maturity on the threshold of the Jet Age. Most of the aircraft described are fairly well known to aviation historians and a few names, such as Sopwith Camel, Fokker Triplane, Messerschmitt Me-109, Mitsubishi Zero, North American Mustang, and Supermarine Spitfire, are familiar even to the most nonaviation-minded persons. Not so well-known are the circumstances of their combat debuts, in which some, such as the Zero, made their mark almost from the outset, but in which others, like the British Bristol F.2A, showed rather less promise than they would ultimately realize. While a certain amount of space must be devoted to the technical development of these famous fighters, these studies of first combats serve as a reminder that it is the human factor, with all its special quirks, that inevitably came into play when these deadly flying machines first fired their guns. Profusely illustrated, *Fighter Aircraft Combat Debuts* is an authoritative history of one of the most enduring subjects in military aviation.

**JG 7** Manfred Boehme, 1992 Formed in August 1944, Jagdgeschwader 7 was equipped with the revolutionary Me 262 jet fighter, which was faster than any aircraft in existence at the time. This unit experienced all of the highs and lows associated with the introduction of such a radically new design. Thus the history of JG 7 is also the story of the Me 262, and inspired design which broke new ground in many areas of technology, and for which there was simply not enough time for thorough development. The pilots of JG 7 frequently had to make do with improvisation and faced a numerically far superior enemy in an aircraft which was technically immature. Manfred Boehme has collected many documentary sources including first hand accounts, technical records and photo archives - many of the 150 photos are published here for the first time.

**Air Combat 1945** Donald Nijboer, 2015-09-15 The final year of World War II witnessed the decline of the piston-engine fighter and the beginning of the jet age. Taking to the skies were tried-and-true fighters, improved versions of old aircraft, and newly developed jets, including prototypes that flew for the first time just before the war ended.

**Strike From the Sky** Richard P. Hallion, 2010-03-14 Chronicles the history of battlefield air attack from 1911, when the airplane was first used in war, to the end of World War II.

**Fighter Operations in Europe and North Africa, 1939–1945** David Wragg, 2012-02-29 *Fighter Operations in Europe and North Africa 1939–1945* tells the story of Allied and German fighter pilots in Europe, over the Mediterranean and in North Africa during the Second World War. The book starts with the early skirmishes as each side tested the others defenses, moves through the Battle of Britain and then the Blitz, when the emphasis switched from single-engined day fighters to twin-engined night fighters, while increasingly fighters were used to sweep over enemy air fields and lines of communication in occupied France. This overlapped with the need to provide air cover for the besieged island fortress of Malta by day and by night, as well as defensive operations against Axis forces in Crete and North Africa, but as the balance of power changed in North Africa, the Desert Air Force was formed incorporating elements from many Allied air forces and the emphasis moved to offensive operations in support of ground forces. The invasions of Italy and the South of France also called for fighter cover, initially by carrier-based aircraft. The lessons learnt in North Africa were put to good use by the 2nd Allied Tactical Air Force, which accompanied the advancing allied armies towards and eventually into Germany, achieving all important air supremacy which was a major factor in the Allied victory. The book also covers Luftwaffe fighter pilots as they sought to stop the RAF by night and the USAAF by day, against increasingly overwhelming odds.

**History of the German Night Fighter Force, 1917–1945** Gebhard Aders, 1979 Originaludgave: Geschichte der deutschen Nachtjagd 1917-1945

**A Vietnamese Fighter Pilot in an American War** Hoi B. Tran, 2011-03-28 American pseudo history recorded the U.S. had lost the war in Viet Nam. However, “A Vietnamese Fighter Pilot in an American War” vehemently

disagrees. Most Western journalists portrayed Ho Chi Minh as a nationalist patriot. As a former Vanguard Youth Troop in Ha Noi, North Viet Nam, who passionately sang “who loves Uncle Ho more than us children” to praise Ho when he seized power in 1945, the author says: “Ho was a villain.” This book is a truthful account of what actually happened in Viet Nam from 1945, Dien Bien Phu in 1953 to its demise in April 1975.

**F4U Corsair vs Ki-84 “Frank”** Edward M. Young,2016-05-19 The Vought Corsair was the first American single-engined fighter to exceed 400 mph and establish dominance over the legendary Mitsubishi Type Zero-sen. The Ki-84 Hayate was introduced by the Japanese specifically to counter this growing American dominance of the skies over the Pacific. Built in greater numbers than any other late war Japanese fighter, nearly 3000 were completed between 1944 and 1945. This volume examines the clashes between the Corsair and Ki-84 in the closing stages of the war, revealing how Corsair pilots had to adapt their techniques and combat strategies to adapt to these newer types. It also reveals how the kill rate was largely driven by the reduced quality of fighter pilots after the high casualty rates inflicted on the Japanese air force during the air battles over the Solomon Islands.
