Design of Fishways and Other Fish Facilities Charles H. Clay,2017-12-14 This new edition of the best-selling book describes the main types of fishways and fish facilities used around the world to assist the passage of fish over dams and other obstructions to their migration. It also focuses on the protection of fish (mainly young fish) from the hazards encountered in their downstream migrations. The book brings together the type of knowledge and research needed to decide on the facility used as well as its design and operation. It emphasizes the need for both biologists and engineers to collaborate in the design and indicates in what fields such collaboration would benefit fisheries conservation in the future. This is the Second Edition of the only book to bring together all of these topics worldwide under one cover.

Minimally Processed Foods Mohammed Wasim Siddiqui,Mohammad Shafiur Rahman,2014-10-29 The safety and efficacy of minimal food processing depends on the use of novel preservation technologies. This book first examines what is meant by minimally processed foods, including fresh-cut, cooked-chilled, and part-baked products. Next explored are the technologies or methods to produce quality products in terms of safety and nutrition, including: edible coating, natural preservatives (i.e., antimicrobial, flavour enhancer, anti-browning), advanced packaging (active, antimicrobial, and modified or controlled atmosphere), and selected non-thermal techniques (high pressure, pulsed electric field, ultrasound, light). Preservation of food is crucial to achieving a secure and safe global food supply with the desired sensory quality. In addition, the increasing consumer demand for safe, ready-to-serve, ready-to-eat-and-cook products with minimal chemical preservatives has raised expectations. However, foods deemed minimally processed, such as fresh-cut fruits and vegetables, cooked-chilled, and half-baked foods, are delicate products that need special care in preparation, processing, storage, and handling. As a result, new technologies to develop minimally processed foods have aggressively advanced. Minimally Processed Foods: Technologies for Safety, Quality, and Convenience explores both the definition of minimally processed foods and the methods and technologies used to achieve the safety and nutritional value consumers demand. The Fictions of Satire Ronald Paulson,2019-12-01 Originally published in 1967. In this study of the English Augustan satirists, and the Roman and subsequent authors who were their models, Professor Paulson shows how rhetoric relates to imitation, persuasion to presentation, and the imitation of the satirist to the imitation of the satiric object. He illustrates the tendency of the satirist to invade his own fiction and imitate not the prime object of his satire but the satiric persona, which consequently takes on a life of its own. By analyzing the satiric fictions of the precursors of the Augustans, the author reveals the elements they bequeathed to those who rode the high crest of the satiric wave in England, before the art of satire became submerged in the deepening trough of sentimental romanticism. Paulson shows the Tories Dryden, Pope, and Swift and the Whigs Addison and Steele to be the heirs of a long line of satirists ancient and modern, from Horace, Juvenal, Lucian, Apuleius, and Petronius to Rabelais, Cervantes and the English Elizabethan and Civil War poets. Taking Swift as his main example, Paulson examines the dualism of satire in its most interesting and ambiguous modes, and as the embodiment of rhetorical devices that are as complex mimetically as they are rhetorically.

A Chinese Bestiary Richard E. Strassberg,2023-11-03 A Chinese Bestiary presents a fascinating pageant of

mythical creatures from a unique and enduring cosmography written in ancient China. The *Guideways through Mountains and Seas*, compiled between the fourth and first centuries b.c.e., contains descriptions of hundreds of fantastic denizens of mountains, rivers, islands, and seas, along with minerals, flora, and medicine. The text also represents a wide range of beliefs held by the ancient Chinese. Richard Strassberg brings the *Guideways* to life for modern readers by weaving together translations from the work itself with information from other texts and recent archaeological finds to create a lavishly illustrated guide to the imaginative world of early China. Unlike the bestiaries of the late medieval period in Europe, the *Guideways* was not interpreted allegorically; the strange creatures described in it were regarded as actual entities found throughout the landscape. The work was originally used as a sacred geography, as a guidebook for travelers, and as a book of omens. Today, it is regarded as the richest repository of ancient Chinese mythology and shamanistic wisdom. The *Guideways* may have been illustrated from the start, but the earliest surviving illustrations are woodblock engravings from a rare 1597 edition. Seventy-six of those plates are reproduced here for the first time, and they provide a fine example of the Chinese engraver's art during the late Ming dynasty. This beautiful volume, compiled by a well-known specialist in the field, provides a fascinating window on the thoughts and beliefs of an ancient people, and will delight specialists and general readers alike.

Snack Foods Processing Edmund W. Lusas,Lloyd W. Rooney,2001-06-05 Providing a clear, comprehensive overview of the industry, *Snack Foods Processing* is the definitive handbook on developing, preparing, and processing shelf-stable savory snack foods. Contributors from leading companies and academic institutions provide practical information and guidance based on years of industry experience. Collectively, they review the principles and critical specifics of processing savory snacks, starting from raw materials selection and care, through types of equipment used and its proper operation, to product seasoning, and packaging. The book covers every major product type, including potato and corn chips, alkali-cooked corn tortilla chips, pretzels, popcorn, extruder puffed and baked/fried products, half-products, meat snacks, and rice-based snacks. It also discusses international snack foods, including those of China, India, and Japan. It details post shaping and drying operations, covering seasonings, flavorings application, product protection and packaging materials, and filling and cartoning equipment. Whether you are new to the field or you are a pro facing broader responsibilities, *Snack Foods Processing* provides valuable information gained through first-hand experience. It presents a clear introduction to the snack foods industry and its terminology and explains the technical interrelationships between the many materials and processes used in making the finished snack food.
