Jody LeHeup, Sebastian Girner

The Weatherman Vol. 1 Jody Leheup, 2019-02-27 The future's only hope has a zero percent chance. Nathan Bright had it all: an awesome girlfriend, a kickass dog, and a job as the #1 weatherman on terraformed Mars. But when he's accused of carrying out the worst terrorist attack in human history an event that wiped out nearly the entire population of Earth Nathan becomes the target of a manhunt that spans the galaxy. But is Nathan truly responsible for such a horrific crime? And why can't he remember? Confused, terrified, and totally unprepared for life on the run, Nathan's fate lies in the hands of Amanda Cross, the disavowed government agent assigned to his case. Together the unlikely duo will have to rely on each other as they battle their way through the solar system in search of the truth, and the key to stopping a second extinction-level attack. A full-throttle, wide-screen, science fiction epic about the damage we do in the name of justice and what it truly means to be redeemedÉ you don't want to miss THE WEATHERMAN! Collects THE WEATHERMAN #1-6

Sex Educator Andrea Falcinelli, Andrea Falcinelli Jeko, 2021-02-08 SEX EDUCATOR will take you on a journey to discover your sexuality: creativity and imagination, freedom of expression and introspection; be single, soul mates, couples who have just joined or have been married for many years. Be lovers in a sexual friendship or participating in a group sex session. Because you are just as you are, without any discrimination of race or gender; you can identify yourself in every nuance of the infinite range of sexual personalities that the human being can manifest. We will relive my travels together to discover Southeast Asia, Italy and other nations of the world. I will tell you stories about magical places, about cultures and spirituality, about women, couples or groups; wonderful people met on the way. Extreme compulsivity or total absence are conditions that should make us think a little. The title of the serie is just provocative, because I would never want to claim the right to instruct you, or initiate you, into the art of sex and eroticism; at the most you will decide independently whether to take cues from my erotic and sometimes pornographic stories. I want to share with the whole world to bring down the wall of bigotry and censorship that in part the societies and the related religions impose on us. These closures lead to widespread and dangerous sexual rudeness. I would be really happy if I could stimulate the innate imagination in each of you, maybe trigger a spark of passion in those who do not feel satisfied or able to honor the personal beauty, of the partner or partners. In this journey we will talk about sexuality as a union between two or more souls connected to each other. Because sex and eroticism are a fusion of energy fields that cooperate to create an experience of imponderable greatness. Release of chemicals that bring multiple benefits, a festival of emotions, sensations, erotic altruism and sharing, until the ultimate goal is reached: the orgasmic explosion, given to the other or even better, shared together.

Walking the Woods and the Water Nick Hunt, 2014-03-20 Nick Hunt pays homage to Patrick Leigh Fermor by walking the same route across Europe in this glorious book.

Pillar Of Sand Sandra Postel, 1999-07-06 Pillar of Sand points the way toward protecting rivers and vital ecosystems even as we aim to produce enough food for a projected 8 billion people by the year 2030. Postel shows how innovative irrigation technologies and strategies can alleviate hunger and environmental stress at the same time. And she calls for a new ethic of sufficiency and sharing in response to impending water limits.--BOOK JACKET.

The Economics of Tourism Destinations Guido Candela, Paolo Figini, 2012-06-30 The book aims at providing an overview of the main economic issues related to tourism activities. While tourism is an important sector, contributing to more than 10% of the European Union's GDP, research and teaching at the university level has only recently grown to a considerable level, and the field still lacks a firm research methodology. This book approaches tourism economics as an applied field of study in which tourism markets are represented as imperfect markets, with asymmetric and incomplete information among agents, bounded rationality, and with a strong presence of externalities and public goods. The economic issues studied in the book are approached both intuitively, largely using examples and case studies, and formally, with mathematical formalizations in text boxes.

Fuzzy Logic and Soft Computing Applications Alfredo Petrosino, Vincenzo Loia, Witold Pedrycz, 2017-02-06 This book constitutes the proceedings of the 11th International Workshop on Fuzzy Logic and Applications, WILF 2016, held in Naples, Italy, in December 2016. The 22 revised full papers presented together with 2 invited lectures were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on fuzzy measures and transforms; granularity and multi-logics, clustering and learning; knowledge systems; and soft computing and applications.

The Transmission of Epidemic Influenza R.E. Hope-Simpson, 2013-11-11 THE PLAGUE YEARS Mankind has always been fascinated by origins, and biologists are no exception. Darwin is our most famous example. What is the origin of mankind, of species, of infectious diseases? In the last few years we have seen the emergence and spread of some apparently new viruses, such as HIV -1 and the virus causing bovine spongiform encephalomyelopathy. But are these, in fact, entirely new agents, or mutated forms of old viruses that have evolved along with us for eons? Edgar Hope-Simpson could not have written this book at a more opportune moment. He is a firm believer in gradual evolution, rather than the sudden arrival of new agents. I suspect that he would also have a naturalist's Darwinian approach for the origin of AIDS. It has been a source of some amazement to me over the years how even the most innovative scientists conform to a current hypothesis. Pioneer thinking comes more easily to persons outside the scientific mainstream. Edgar Hope Simpson has always struck me as a modern-day naturalist of the classic style, observant and perhaps a little maverick in line of thought. Certainly, the central hypothesis propounded in this book will be controversial to many scientists. From his unique citadel, the Epidemiological Research Unit in Cirencester, he has carefully reexamined mortality data from old records as well as new.

Shenzhen Guy Delisle, 2021-05-04 Shenzhen is entertainingly compact with Guy Delisle's observations of life in urban southern China, sealed off from the rest of the country by electric fences and armed guards. With a dry wit and a clean line, Delisle makes the most of his time spent in Asia overseeing outsourced production for a French animation company. By translating his fish-out-of-water experiences into accessible graphic novels, Delisle skillfully notes the differences between Western and Eastern cultures, while also conveying his compassion for the simple freedoms that escape his colleagues in the Communist state. Shenzhen has been translated from the French by Helge Dascher. Dascher has been translating graphic novels from French and German to English for over twenty years. A contributor to Drawn & Quarterly since the early days, her translations include acclaimed titles such as the Aya series by Marguerite Abouet and Clément Oubrerie, Hostage by Guy Delisle, and Beautiful Darkness by Fabien Vehlmann and Kerascoët. With a background in art history and history, she also translates books and exhibitions for museums in North America and Europe. She lives in Montreal.

Between the Woods and the Water Patrick Leigh Fermor,2010-10-10 The acclaimed travel writer's youthful journey - as an 18-year-old - across 1930s Europe by foot began in A Time of Gifts, which covered the author's exacting journey from the Lowlands as far as Hungary. Picking up from the very spot on a bridge across the Danube where his readers last saw him, we travel on with him across the great Hungarian Plain on horseback, and over the Romanian border to Transylvania. The trip was an exploration of a continent which was already showing signs of the holocaust which was to come. Although frequently praised for his lyrical writing, Fermor's account also provides a coherent understanding of the dramatic events then unfolding in Middle Europe. But the delight remains in travelling with him in his picaresque journey past remote castles, mountain villages, monasteries and towering ranges.

Choice Modelling Stephane Hess,Andrew Daly,2013-01-01 'This collection of papers, by leading researchers in the field, provides an excellent view of the current state of research and applications. Exciting new techniques are presented, and realistic solutions are offered to issues that arise in applied work. It is an admirably rich volume, offering valuable insights for all readers of choice modeling.' Kenneth Train, University of California, Berkeley and NERA Economic Consulting, Inc., San Francisco, California, US 'I'm an enthusiastic fan of the ICMC, where researchers are friendly, genuinely interested in learning from and helping one another. There is much to learn because each discipline brings a different perspective to the field and to theoretical and applied problems in decision-making and choice behavior. The ICMC embodies the philosophy that most real choice problems are complex and require a cross-disciplinary approach. The papers in this volume represent an eclectic cross-section of the topics covered by key researchers in the field. I look forward to getting our PhD students and postdocs stuck into them.' Jordan Louviere, University of Technology Sydney, Australia Choice modelling has been one of the most active fields in economics over recent years. This valuable new book contains leading contributions from academics and practitioners from across the different areas of study where choice modelling is a key analytical technique, drawn from a recent international conference. Choice models explain the behaviour of individuals by quantifying their values, responses and perceptions of attributes describing the various options (alternatives) available to them. Policy makers and planners have long since recognised the potential of using choice models for guidance purposes, with applications in fields as diverse as transport analysis, healthcare, telecommunications, public service evaluation and energy. The unique mix of theoretical and applied chapters will appeal to academics, students, researchers and practitioners in various fields, as well as anyone with a general interest in the subject.
