Education Pack "all different - all equal" 2021 Rui Gomes,Anca-Ruxandra Pandeia,Patricia Brander,Laure de Witte,Gavan Titley,2021-11-22 It is easy to say I have no prejudices, I'm not racist, so it has nothing to do with me, I didn't invite those refugees. It is hard to say I may not be to blame for what happened in the past but I want to take responsibility for making sure it doesn't continue in the future. The Education Pack all different - all equal was originally produced in 1995 as an educational resource for the European youth campaign against racism, antisemitism, xenophobia and intolerance. Soon after its publication it became a reference work for those involved in intercultural education and training with young people across Europe and beyond. Translated into many languages, it remains today one of the most successful and most sought after publications of the Council of Europe. The usefulness of the pack stems from the variety and creativity of the methodologies proposed. More than twenty years after the all different - all equal campaign, the role plays, simulation exercises, case studies and cooperative group work that it proposes remain an inspiration to many youth workers, trainers, teachers and other people actively involved in intercultural education. European societies continue to suffer from a growth of racist hostility and intolerance towards minorities and foreigners; the necessity for intercultural youth work remains undiminished and the relevance of this pack remains unquestionable. Little bit has been changed in this new edition of the pack, apart from an updating of references. Most changes are visible and usable only in the online version, which offers relevant links with other resources for human rights education which continue the legacy of the campaign: equality in dignity and rights, respect for broader appreciation of diversity.

*Keeping It R.E.A.L.* Carla D. Martin, Anthony Tongen, 2011-12-31 Keeping it R.E.A.L.: Research Experiences for All Learners is a collection of computational classroom projects carefully designed to inspire critical thinking and mathematical inquiry. This book also contains background subject information for each project, grading rubrics, and directions for further research. Instructors can use these materials inside or outside the classroom to inspire creativity and encourage undergraduate research. R.E.A.L. projects are suitable for a wide-range of college students, from those with minimal computational exposure and precalculus background to upper-level students in a numerical analysis course. Each project is class tested, and most were presented as posters at regional conferences.

Education Pack "all different - all equal" Pat Branders, Carmen Cardenas, Juan Civate Abad, Rui Gomes, Mark Taylor, 2016-12-19 It is easy to say I have no prejudices, I'm not racist, so it has nothing to do with me, I didn't invite those refugees. It is hard to say I may not be to blame for what happened in the past but I want to take responsibility for making sure it doesn't continue in the future. *MAPPING: Management and Processing of Images for Population ImagiNG* Michel Dojat, Wiro Niessen, David N. Kennedy, 2017-09-04 Several recent papers underline methodological points that limit the validity of published results in imaging studies in the life sciences and especially the neurosciences (Carp, 2012; Ingre, 2012; Button et al., 2013; Ioannidis, 2014). At least three main points are identified that lead to biased conclusions in research findings: endemic low statistical

power and, selective outcome and selective analysis reporting. Because of this, and in view of the lack of replication studies, false discoveries or solutions persist. To overcome the poor reliability of research findings, several actions should be promoted including conducting large cohort studies, data sharing and data reanalysis. The construction of large-scale online databases should be facilitated, as they may contribute to the definition of a “collective mind” (Fox et al., 2014) facilitating open collaborative work or “crowd science” (Franzoni and Sauermann, 2014). Although technology alone cannot change scientists’ practices (Wicherts et al., 2011; Wallis et al., 2013, Poldrack and Gorgolewski 2014; Roche et al. 2014), technical solutions should be identified which support a more “open science” approach. Also, the analysis of the data plays an important role. For the analysis of large datasets, image processing pipelines should be constructed based on the best algorithms available and their performance should be objectively compared to diffuse the more relevant solutions. Also, provenance of processed data should be ensured (MacKenzie-Graham et al., 2008). In population imaging this would mean providing effective tools for data sharing and analysis without increasing the burden on researchers. This subject is the main objective of this research topic (RT), cross-listed between the specialty section “Computer Image Analysis” of Frontiers in ICT and Frontiers in Neuroinformatics. Firstly, it gathers works on innovative solutions for the management of large imaging datasets possibly distributed in various centers. The paper of Danso et al. describes their experience with the integration of neuroimaging data coming from several stroke imaging research projects. They detail how the initial NeuroGrid core metadata schema was gradually extended for capturing all information required for future metaanalysis while ensuring semantic interoperability for future integration with other biomedical ontologies. With a similar preoccupation of interoperability, Shanoir relies on the OntoNeuroLog ontology (Temal et al., 2008; Gibaud et al., 2011; Batrancourt et al., 2015), a semantic model that formally described entities and relations in medical imaging, neuropsychological and behavioral assessment domains. The mechanism of “Study Card” allows to seamlessly populate metadata aligned with the ontology, avoiding fastidious manual entrance and the automatic control of the conformity of imported data with a predefined study protocol. The ambitious objective with the BIOMIST platform is to provide an environment managing the entire cycle of neuroimaging data from acquisition to analysis ensuring full provenance information of any derived data. Interestingly, it is conceived based on the product lifecycle management approach used in industry for managing products (here neuroimaging data) from inception to manufacturing. Shanoir and BIOMIST share in part the same OntoNeuroLog ontology facilitating their interoperability. ArchiMed is a data management system locally integrated for 5 years in a clinical environment. Not restricted to Neuroimaging, ArchiMed deals with multi-modal and multi-organs imaging data with specific considerations for data long-term conservation and confidentiality in accordance with the French legislation. Shanoir and ArchiMed are integrated into FLI-IAM1, the national French IT infrastructure for in vivo imaging.

**HCI International 2022 Posters** Constantine Stephanidis,Margherita Antona,Stavroula Ntoa,2022-06-16 The four-volume set CCIS 1580, CCIS 1581, CCIS 1582, and CCIS 1583 contains the extended abstracts of the posters presented during the 24th International Conference on Human-Computer Interaction, HCII 2022, which was held virtually in June - July 2022. The total of 1276 papers and 275 posters included in the 40 HCII 2021 proceedings volumes was carefully reviewed and selected from 5583 submissions. The posters presented in these four volumes are organized in topical sections as follows: Part I: user experience design and evaluation; visual design and visualization; data, information and knowledge; interacting with AI; universal access, accessibility and design for aging. Part II: multimodal and natural interaction; perception, cognition, emotion and psychophysiological monitoring; human motion modelling and monitoring; IoT and intelligent living environments. Part III: learning technologies; HCI, cultural heritage and art; eGovernment and eBusiness; digital commerce and the customer experience; social media and the

metaverse. Part IV: virtual and augmented reality; autonomous vehicles and urban mobility; product and robot design; HCI and wellbeing; HCI and cybersecurity.
