A Color for Sketch Orli Zuravicky,2011-09-20 In A Color for Sketch, Mister Doodle tries to figure out what color to paint his dog Sketch's doghouse. This house needs a touch up, he thought. Paint would do the trick! But what color would Sketch like best? What color would he pick? Maybe a refreshing shade of blue, like the color of the sea. Or the golden yellow of a humming honeybee. As his search for a color that Sketch would approve of comes to an end, Mister Doodle soon realizes that he's actually known the perfect color all along!

The Language of Color in the First Goetheanum Hilde Raske, 2023-05-25 Rudolf Steiner's architectural masterpiece, the double-domed building known as the first Goetheanum, featured decorated ceilings that were designed and partly painted by Steiner himself, utilizing vegetable colors and a new layering technique. Steiner emphasized that he was seeking a new artistic conception based on a conscious understanding of the nature of color. Contemporaries report the extraordinary effect of the domed ceilings' paintings combined with the multicolored light emanating from the engraved glass windows. The cupolas depicted the creation and ages of the world, the initiators of the various cultural epochs and the figure of Christ. Tragically, the 'complete work of art' that was the first Goetheanum burned down on New Year's Eve 1922 – so today we can only get an impression of the lost paintings and windows from Rudolf Steiner's pastel sketches and drawings and a handful of photographs. In this lavish volume, the result of decades of research and study, Hilde Raske provides a detailed examination of the artistic work on the two cupolas, including Rudolf Steiner's draft sketches and his written and verbal statements. Featuring 30 color and more than 100 black-and-white illustrations, this printing is a high-quality facsimile of the long out-of-print original edition from 1983.

Internet Multimedia Search and Mining Xian-Sheng Hua, Marcel Worring, Tat-Seng Chua, 2013-09-17 With the explosion of video and image data available on the Internet, desktops and mobile devices, multimedia search has gained immense importance. Moreover, mining semantics and other useful information from large-scale multimedia data to facilitate online and local multimedia content analysis, search, and other related applications has also gained an increasing attention from the academia and industry. The rapid increase of multimedia data has brought new challenges to multimedia content analysis and multimedia retrieval, especially in terms of scalability. While on the other hand, large-scale multimedia data has also provided new opportunities to address these challenges and other conventional problems in multimedia analysis. The massive associated metadata, context and social information available on the Internet, desktops and mobile devices, and the large number of grassroots users, are a valuable resource that could be leveraged to solve

the these difficulties. This is the first reference book on the subject of internet multimedia search and mining and it will be extremely useful for graduates, researchers and working professionals in the field of information technology and multimedia content analysis.
