Dark Moon David Gemmell, 2003-12-02 "Gemmell not only knows how to tell a story, he knows how to tell a story you want to hear. He does high adventure as it ought to be done."—Greg Keyes, author of *The Briar King* One awesome night, the sadistic, seemingly invincible Daroth vanished from the face of the earth. Gone were their cities, their armies, their reigns of terror. Not a trace of this conquering race remained. Until a thousand years later. . . . With the rising of a dark moon above the Great Northern Desert, comes a black tidal wave that sweeps across the land. Suddenly, the desert vanishes beneath lush fields and forests and a great city glitters in the morning light. From this city reemerges the blood-hungry Daroth, powerful and immortal, immune to spear and sword. They have only one desire: to rid the world of humankind forever. Now the fate of the human race rests on the talents of three heroes: Karis, warrior-woman and strategist; Tarantio, the deadliest swordsman of the age; and Duvodas the Healer, who will learn a gruesome truth. "Gemmell's great reading; the action never lets up; he's several rungs above the good-right into the fabulous!"—Anne McCaffrey

Journalism and Eyewitness Images Mette Mortensen, 2014-12-17 Building on the vast research conducted on war and media since the 1970s, scholars are now studying the digital transformation of the production of news. Little scholarly attention has been paid, however, to non-professional, eyewitness visuals, even though this genre holds a still greater bearing on the way conflicts are fought, communicated, and covered by the news media. This volume examines the power of new technologies for creating and disseminating images in relation to conflicts. Mortensen presents a theoretical framework and uses case studies to investigate the impact of non-professional images with regard to essential issues in today's media landscape: including new media technologies and democratic change, the political mobilization and censorship of images, the ethics of spectatorship, and the shifting role of the mainstream news media in the digital age.

Death as Entertainment Gareth R. Schott, 2023-06-06 This book explores the moral and representational issues associated with engaging young people with popular media depictions of death and dying. Emotionally charged depictions of death play an important role in contemporary media directed toward teen and young adult audiences. Across creative works as diverse as interactive digital games, graphic novels, short form serial narratives, television and films, young people gain opportunities to engage with representations of death. In some cases, representations of death, dying, and the decision to end one's own life have been subject to public outcry and criticism related to its perceived potential impact on impressionable audiences. Death in/as entertainment can also be fleeting, commonplace and used for humour making it trivial. The chapters in this volume particularly consider the types of engagement made possible through different contemporary creative mediums and the ways in which they might distinctively capture or arouse thoughts and feelings on the end and loss of a human life. *Death as Entertainment* will

appeal to researchers and students interested in new media and its cultural and psychological impact. The chapters in this book were originally published as a special issue of *Mortality*.

BOOM! SPLAT! Jim Coby, Joanna Davis-McElligatt, 2024-03-15 Contributions by Lawrence Abrams, Diana Álvarez Amell, Partha Bhattacharjee, Natalja Chestopalova, Jim Coby, Rita Costello, Sam Cowling, Joanna Davis-McElligatt, Elisabetta Di Minico, Kiera M. Gaswint, Vincent Haddad, Kaleb Knoblauch, Christina M. Knopf, Leah Milne, Jacob Murel, Priyanka Tripathi, and Steven S. Vrooman In 1954, the culture, distribution, and content of comics forever changed. Long a mainstay of America's reading diet, comic books began to fall under the scrutiny of parent groups, church leaders, and politicians. The bright colors and cheaply printed pulp pages of comic books that had once provided an escape were suddenly presumed to house something lascivious, insidious, and morally corrosive. While anxieties about representations of violence in comics have largely fallen to the wayside since the moral panic of the 1950s, thematic and symbolic visual depictions of violence remain central to the comics form. **BOOM! SPLAT! Comics and Violence** examines violence in every iteration—physical violence enacted between people and their environments, formal and structural violence embedded in the comics language itself, representations of historical violence, and ways of reading and seeing violence. **BOOM! SPLAT!** is composed of fifteen essays from renowned comics scholars and is organized thematically into four sections, including an examination of histories of violence, forms of violence, modes and systems of violence, and political and social violence. Chapters focus on well-known comics and comics creators, such as Steve Ditko, Hulk, X-Men, and the Marvel universe, to newspaper cartoon strips, postwar graphic novels, revolution, civil rights, trauma, #blacklivesmatter, and more. **BOOM! SPLAT!** serves as a resource to scholars and comics enthusiasts who wish to contemplate and confront the permutations, forms, structures, and discourses of violence that have always animated cartoons. Through this interrogation, our understanding of violence moves beyond the immediately physical and interpersonal into modes of ephemeral, psychological, and ideological violence. Contributors fill critical gaps by offering sustained explorations of the function of manifold violences in the comics language—those seen, felt, and imagined. The essays in this collection are critically necessary for understanding the current and historical role that violence has played in comics and will help recognize how cartooning imbricates, resists, and expands our thinking about and experiences of violence.

Making Games Stefan Werning, 2021-02-16 An argument that production tools shape the aesthetics and political economy of games as an expressive medium. In *Making Games*, Stefan Werning considers the role of tools (primarily but not exclusively software), their design affordances, and the role they play as sociotechnical actors. Drawing on a wide variety of case studies, Werning argues that production tools shape the aesthetics and political economy of games as an expressive medium. He frames game-making as a (meta)game in itself and shows that tools, like games, have their own procedural rhetoric and should not always be conceived simply in terms of optimization and best practices.

The Age of Acrimony Jon Grinspan, 2021-04-27 A penetrating, character-filled history “in the manner of David McCullough” (WSJ), revealing the deep roots of our tormented present-day politics. Democracy was broken. Or that was what

many Americans believed in the decades after the Civil War. Shaken by economic and technological disruption, they sought safety in aggressive, tribal partisanship. The results were the loudest, closest, most violent elections in U.S. history, driven by vibrant campaigns that drew our highest-ever voter turnouts. At the century's end, reformers finally restrained this wild system, trading away participation for civility in the process. They built a calmer, cleaner democracy, but also a more distant one. Americans' voting rates crashed and never fully recovered. This is the origin story of the "normal" politics of the 20th century. Only by exploring where that civility and restraint came from can we understand what is happening to our democracy today. The Age of Acrimony charts the rise and fall of 19th-century America's unruly politics through the lives of a remarkable father-daughter dynasty. The radical congressman William "Pig Iron" Kelley and his fiery, Progressive daughter Florence Kelley led lives packed with drama, intimately tied to their nation's politics. Through their friendships and feuds, campaigns and crusades, Will and Florie trace the narrative of a democracy in crisis. In telling the tale of what it cost to cool our republic, historian Jon Grinspan reveals our divisive political system's enduring capacity to reinvent itself.

Just Here for the Comments Gina Siple, 2024-05-28 This book challenges the conventional perspective of what 'counts' as participatory online culture. Presenting 'lurking' on social media newsfeeds as a communication and literacy practice that resists dominant power structures, it offers an innovative approach to digital qualitative methods.

The Euthanist Alex Dolan, 2015-06-10 "Much more than a brilliant debut thriller. Dolan's mile-a-minute story also gets at one of our species' most important issues—can we choose how to die?" (Dylan Schaffer, author of *I Right the Wrongs*) In this auspicious debut, Alex Dolan announces himself as a virtuoso of psychological suspense and a rightful heir to masters of the genre like Gillian Flynn and Megan Abbott. Kali helps to end the lives of people with terminal diseases, her reasons her own. But she just helped the wrong person. Leland Moon is an FBI agent who couldn't stop the abduction of his own son. "Grabbed me from the first page and showed no signs of letting go. Dark and sinewy, topical and timeless, laced with rich characterization and gallows humor, it showcases Dolan as a thriller writer to watch and follow." —Louis Bayard, bestselling author of *Courting Mr. Lincoln* "Alex Dolan makes an engrossing debut with *The Euthanist* . . . Dolan hooks readers from the very start, ratcheting up the tension and suspense until the shocking ending. As a thriller writer, Alex Dolan is set to be one of the best." —Fresh Fiction "[An] action-packed story . . . Reading the Comments Joseph Michael Reagle, 2015-04-24 What we can learn about human nature from the informative, manipulative, confusing, and amusing messages at the bottom of the web. Online comment can be informative or misleading, entertaining or maddening. Haters and manipulators often seem to monopolize the conversation. Some comments are off-topic, or even topic-less. In this book, Joseph Reagle urges us to read the comments. Conversations "on the bottom half of the Internet," he argues, can tell us much about human nature and social behavior. Reagle visits communities of Amazon reviewers, fan fiction authors, online learners, scammers, freethinkers, and mean kids. He shows how comment can inform us (through reviews), improve us (through feedback), manipulate us (through fakery), alienate us (through hate), shape us (through social comparison), and perplex us. He finds pre-Internet historical antecedents of online comment in Michelin stars, professional criticism, and the wisdom of crowds. He discusses the techniques of online fakery (distinguishing makers, fakers, and takers), describes the emotional work of receiving and giving feedback, and examines the culture of trolls and haters, bullying, and misogyny. He considers the way comment—a nonstop stream of social quantification and ranking—affects our self-esteem and well-being. And he examines how comment is puzzling—short and asynchronous, these messages can be slap-dash, confusing, amusing, revealing, and weird, shedding context in their passage through the Internet, prompting readers to comment in turn, "WTF?!?"

Internet for the People Ben Tarnoff, 2022-06-14 For all the informational convenience the internet offers, it is deeply flawed. How can it be improved? Writer Ben Tarnoff proposes one possibility in this intriguing book, which urges the development of 'a public lane on the information superhighway.' It's worth checking out for yourself. – Seth MacFarlane Why is the internet so broken, and what could ever possibly fix it? In *Internet for the People*, leading tech writer Ben Tarnoff offers an answer. The internet is broken, he argues, because it is owned by private firms and run for profit. Google annihilates your privacy and Facebook amplifies right-wing propaganda because it is profitable to do so. But the internet wasn't always like this—it had to be remade for the purposes of profit maximization, through a years-long process of privatization that turned a small research network into a powerhouse of global capitalism. Tarnoff tells the story of the privatization that made the modern internet, and which set in motion the crises that consume it today. The solution to those crises is straightforward: deprivatize the internet. Deprivatization aims at creating an internet where people, and not profit, rule. It calls for shrinking the space of the market and diminishing the power of the profit motive. It calls for abolishing the walled gardens of Google, Facebook, and the other giants that dominate our digital lives and developing publicly and cooperatively owned alternatives that encode real democratic control. To build a better internet, we need to change how it is owned and organized. Not with an eye towards making markets work better, but towards making them less dominant. Not in order to create a more competitive or more rule-bound version of privatization, but to overturn it. Otherwise, a small number of executives and investors will continue to make choices on everyone's behalf, and these choices will remain tightly

bound by the demands of the market. It's time to demand an internet by, and for, the people now.

Liquid Life Rachel Armstrong, 2019-12-11 If we lived in a liquid world, the concept of a machine would make no sense. Liquid life is metaphor and apparatus that discusses the consequences of thinking, working, and living through liquids. It is an irreducible, paradoxical, parallel, planetary-scale material condition, unevenly distributed spatially, but temporally continuous. It is what remains when logical explanations can no longer account for the experiences that we recognize as part of being alive. Liquid life references a third-millennial understanding of matter that seeks to restore the agency of the liquid soul for an ecological era, which has been banished by reductionist, brute materialist discourses and mechanical models of life. Offering an alternative worldview of the living realm through a new materialist and liquid study of matter, it conjures forth examples of creatures that do not obey mechanistic concepts like predictability, efficiency, and rationality. With the advent of molecular science, an increasingly persuasive ontology of liquid technologies can be identified. Through the lens of lifelike dynamic droplets, the agency for these systems exists at the interfaces between different fields of matter/energy that respond to highly local effects, with no need for a central organizing system. Liquid Life seeks an alternative partnership between humanity and the natural world. It provokes a re-invention of the languages of the living realm to open up alternative spaces for exploration: Rolf Hughes' angelology of language explores the transformative invocations of prose poetry, and Simone Ferracina's graphical notations help shape our concepts of metabolism, upcycling, and designing with fluids. A conceptual and practical toolset for thinking and designing, Liquid Life reunites us with the irreducible soul substance of living things, which will neither be simply solved, nor go away. Rachel Armstrong is Professor of Experimental Architecture at Newcastle University (UK), and has also been a Rising Waters II Fellow for the Robert Rauschenberg Foundation (April-May 2016), TWOTY futurist in 2015, Fellow of the British Interplanetary Society, and a Senior TED Fellow in 2010. She is also the coordinator of the Living Architecture project, an EU-funded project that establishes the principles for our buildings to share some of the properties of living things, e.g. metabolism, operating at the intersection of architecture, building construction, bio-energy and synthetic biology. She is also the author of *Vibrant Architecture* (De Gruyter, 2015), *Star Ark: A Living, Self-Sustaining Spaceship* (Springer, 2017), and *Soft Living Architecture: An Alternative View of Bio-informed Design Practice* (Bloomsbury, 2018).

Imminent Commons: Urban Questions for the Near Future Hyungmin Pai, Alejandro Zaera-Polo, 2022-02-04 The cities of the world stand at a crossroads. Amidst radical social, economic, and technological transformations, will the city become a driving force of creativity, diversity, and sustainability, or will it be a mechanism of inequality, despair, and environmental decay? At this critical moment, where do the stakes lie and what are the agents of change? From the time of its birth, the city has been held together by the commons. The book includes essays by Alejandro Zaera, Hyungmin Pai, Maider Llaguno, Nerea Calvillo, Hyewon Lee, Lindsay Bremner, Alex Ivancic, Iñaki Abalos, Charles Waldheim, David Gissen, Carlo Ratti, Daniele Belleri, Antoine Pico, Saskia Saseen, Adam Greenfield,

Jesse LeCavalier, Philip Rode, Duncan McLaren, Julian Agyeman, Gunter Pauli, Gramazio and Kohler, Mario Carpo, Dirk E. Hebel, Marta H. Wisniewska, Felix Heisel, Mitchell Joachim, and Christian Hubert. The first publication of the Seoul Biennale of Architecture and Urbanism 2017, proposes a framework that sets basic commons ? an evolving network of agencies, resources and technologies ? as the critical issue in the move towards a sustainable and just urbanism. It shows an exploration not of distant utopias, but of the very near future, because the emerging commons is changing the way we connect, make, move, recycle, sense, and share, and the way we manage air, water, energy and the earth. Whether met with fear or hope, they will very soon change the way we live in the city.

Stupid Humanism Christine Hoffmann, 2017-11-08 This book frames the undeniably copious 21st-century performances of stupidity that occur within social media as echoes of rhetorical experiments conducted by humanist writers of the Renaissance. Any historical overview of humanism will associate it with copia—abundance of expression—and the rhetorical practices essential to managing it. This book argues that stupidity was and is a synonym for copia, making the humanism of which copia is a central element an inherently stupid philosophy. A transhistorical exploration of stupidity demonstrates that not only is excess still the surest way to eloquence, but it is also just the kind of spammy, speculative undertaking to generate a more generous and inventive comprehension of human and nonhuman relationships. In chapters exploring the rhetorics of memes, attack ads, public shaming blogs, clickbait and gifs, *Stupid Humanism* outlines the possibilities for a humanism less invested in the normative logics that enshrine knowledge, eloquence and linear development as the chief indicators of an active, articulated selfhood and more supportive of a program for queer knowledge, trivial pursuits, anti-social ethics and the curious relationships that form around and in response to abundance of expression.

The Performative Enterprise Alexander Tsigkas, 2021-10-01 This book is about quality redundancy and its replacement by the “performativity” norm. Performativity is a linguistic, social, and political mechanism that produces the intended performance. The author, Alexander Tsigkas, sees this book as a natural continuation of his prior book *The Lean Enterprise – From the Mass Economy to the Economy of One*. He argues that performativity is the flip side of quality on a coin called identity, and in postmodernism, that is, in the age of Industry 4.0 and beyond, companies should be aiming for performativity and achieve quality as one of its many consequences. The author, therefore, encourages modern businesses to transition from quality orientation as conformance alone to a performance orientation. The author brings forward historic, current, and philosophical perspectives in charting performativity as a new goal for modern businesses. Many examples, case studies, and conceptual constructs are used to drive in the idea of how to create a performative enterprise.

Digital Zombies, Undead Stories Lawrence May, 2021-01-14 Through analysis of three case study videogames – *Left 4 Dead 2*, *DayZ* and *Minecraft* – and their online player communities, *Digital Zombies, Undead Stories* develops a framework for understanding how collective gameplay generates experiences of narrative, as well as the narrative dimensions of players' creative activity on social media platforms. Narrative emergence is addressed as a powerful form of player experience in multiplayer games, one which makes individual

games' boundaries and meanings fluid and negotiable by players. The phenomenon is also shown to be recursive in nature, shaping individual and collective understandings of videogame texts over time. *Digital Zombies, Undead Stories* focuses on games featuring zombies as central antagonists. The recurrent figure of the videogame zombie, which mediates between chaos and rule-driven predictability, serves as both metaphor and mascot for narrative emergence. This book argues that in the zombie genre, emergent experiences are at the heart of narrative experiences for players, and more broadly demonstrates the potential for the phenomenon to be understood as a fundamental part of everyday play experiences across genres.

Movie Title Typos Austin Light, 2015-09-22 In *Movie Title Typos*, artist Austin Light removes just one letter from a well-known movie title to inspire a surprising and hilarious visual scenario.
