Social Innovations in Post-Soviet Countries Bakhrom Radjabov,2022-06-01 This book evaluates the evolution of social innovation in post-Soviet Central Asia, Eastern Europe and Caucasus. Following the dissolution of the USSR, organisations such as the UNDP have encouraged local communities and governments to innovate in order to find solutions to existing social problems. This book demonstrates that progress with social innovations has varied, with countries with low government support such as Uzbekistan struggling, whereas countries with better government support and a more active civil society, such as Armenia and Ukraine, have seen more positive results. Covering the period 2012-2020 and a broad range of countries, including Kazakhstan, Kyrgyzstan, Tajikistan and Uzbekistan, Moldova, Ukraine, Azerbaijan, Armenia, and Georgia, this book provides an impressively broad-ranging critical analysis of post-Soviet social innovation. Including social innovations emerging as a result of the Covid-19 outbreak, this will be an important comparative study for researchers and practitioners working on social innovation, and to those with an interest in post-Soviet development.

A Practical Hands-on Approach to Database Forensics Nhien-An Le-Khac,Kim-Kwang Raymond Choo,2022-10-21 Adopting an experimental learning approach, this book describes a practical forensic process to acquire and analyze databases from a given device and/or application. Databases hold important, sensitive, and/or confidential information and are a crucial source of evidence in any digital investigation. This also reinforces the importance of keeping up to date on the cyber-threat landscape as well as any associated database forensic challenges and approaches. The book also guides cyber-forensic researchers, educators, and practitioners through the process of conducting database forensics and investigations on mobile devices, Internet of Things (IoT) devices, web browsers, and end-to-end encrypted instant messaging applications. Given the fast-changing database forensics landscape, this book will be of interest to researchers, educators, and practitioners in the field, as well as students who want to learn about the database investigation.

From Light into the Abyss Jim Jacobs,2016-02-29 We've ushered in a new era of the outlaw duo Bonnie and Clyde. There are no pistols or shotguns visible, no banks involved, and few if any wanted posters displayed in your local Post Office. The weapon of choice has become the keyboard and laptop computer. It has become a merging bacteria spreading like wildfire perilously and dangerously close to imploding on God's moral laws and His judgment upon this Nation. Call it scams, live sex cams, or our youth behaving badly, its tentacles reach all socioeconomic households in this country. Adding to this mix of immorality we have prostitution, illegal drug smuggling and its use, human slave trafficking, domestic abuse, abortion, same sex marriage, political chicanery, etc. You've just created a cocktail of criminal behavior as in the days of Sodom and Gomorrah. The question then arises out of this storm of immorality is not if; but when God will exact His wrath upon this Nation.

As humans bring these technologies into their lives in a process of domestication, they tame them and are simultaneously influenced by their presence. In combining domestication research and an empirical analysis of current, digital, and interconnected media, this issue examines the process of taming with an emphasis on practices. The contributions in this issue explore the use of digitally connected media such as vacuum robots, smart speakers, drones, and kitchen appliances with reference to the domestication paradigm from interdisciplinary perspectives including media studies, sociology, anthropology, and human-computer interaction.

Brand Loyalty in Bangladesh Dr. Md. Uzir Hossain Uzir,Profession Dr. Abu Bakar Abdul Hamid,Dr. Ts. Dr. Ahmad Shaharudin Abdul Latiff,Ismail Jerin,2021-05-06 A brand is a valuable asset, and loyalty to a particular brand is the source of revenue and profitability of the business. Brand loyalty is significant for the business growth and expansion of companies in the electronics sector. A populated country, Bangladesh has a substantial expenditure on electronic appliances, and the demand for these household items increases over the period; however, customers are not always loyal to a particular brand. Marketing literature shows that customer satisfaction and brand confidence directly affect brand loyalty, and brand trust mediates their relationship. Due to the technological advance of social media, technology has an essential role in the customer's decision to buy household appliances. The existing literature has not focused on this massive demand for electronic appliances, customer satisfaction, loyalty, trust, and social media's significant role in consumer buying behavior. The book shoed the investigation of the effect of customer satisfaction and brand trust of electronic home appliances on brand loyalty and the mediating role of brand trust in customer satisfaction and trust relationship. The study also examined the extent to which customers believe social media information influences them. The study gathered data from 523 Bangladeshi respondents from Dhaka by conducting a survey. The data were analyzed with SPSS and CB-SEM (AMOS) for the hypothesis test. The findings revealed that customer satisfaction and brand trust significantly impact brand loyalty, and social media moderates those significant relationships. The result of the study contributed to the expectancy-disconfirmation theory, trust-commitment theory, brand loyalty theory, and theory of reasoned action by presenting empirically-based insight into customer satisfaction, brand trust, and brand

loyalty constructs in electronic home appliances in Bangladesh. In addition, the results provided a practical insight into marketing and brand management. They suggested the practicing managers in developing product quality with customer preference, building trust through maintaining brand image and creating awareness among the customers, and considering the significance of social media and its usage. The research used probabilistic sampling techniques, both rural and urban customers, only a single home appliance, and PLS-SEM statistical tool for analysis. Future researchers could focus and include other variables such as price or advertising; consider loyalty separately, and use both urban and rural customers to have better predictions.
