

Improving Kids Confidence

Jack Perconte

Kid Confidence Eileen Kennedy-Moore, 2019-01-02 A wise and realistic program for instilling genuine self-esteem in children.

—Kirkus Reviews, starred review Help your child cultivate real, lasting confidence! In *Kid Confidence*, a licensed clinical psychologist and parenting expert offers practical, evidence-based parenting strategies to help kids foster satisfying relationships, develop competence, and make choices that fit who they are and want to become. As parents, it's heartbreaking to hear children say negative things about themselves. But as children grow older and begin thinking about the world in more complex ways, they also become more self-critical. Alarming, studies show that self-esteem, for many children, takes a sharp drop starting around age eight, and this decline continues into the early teen years. So, how can you turn the tide on this upsetting trend and help your child build genuine self-esteem? With this guide, you'll learn that self-esteem isn't about telling kids they're "special." It's about helping them embrace the freedom that comes with a quiet ego—a way of being in the world that isn't preoccupied with self-judgment, and instead embraces a compassionate view of oneself and others that allows for both present awareness and personal growth. When kids

are less focused on evaluating and comparing themselves with others, they are freer to empathize with others, embrace learning, and connect with the values that are bigger than themselves. You'll also discover how your child's fundamental needs for connection, competence, and choice are essential for real self-esteem.

Connection involves building meaningful and satisfying relationships that create a sense of belonging. Competence means building tangible skills. And choice is about being able to make decisions, figure out what matters, and choose to act in ways that are consistent with personal values. When children are able to fulfill these three basic needs, the question of "Am I good enough?" is less likely to come up. If your child is suffering from low self-esteem, you need a nuanced parenting approach. Let this book guide you as you help your child create unshakeable confidence and lasting well-being.

Building Confidence in Your Child Dr. James

Dobson, 2015-06-02 A solid sense of self-worth helps children make good choices, develop healthy relationships, and work to achieve their dreams. Based on a biblical understanding of human value, *Building Confidence in Your Child* teaches moms and dads

how to parent positively to help their children grow into secure adults who are poised for success in life. Deftly balancing the principles of humility and pride, trusted author and parenting expert Dr. James Dobson offers practical pointers that break through the theories and get right down to the decisions parents have to make every day.

I Believe I Can Grace Byers, 2020-06-23 From the #1 New York Times bestselling creators of *I Am Enough* comes an empowering follow-up that celebrates every child's limitless potential. *I Believe I Can* is an affirmation for boys and girls of every background to love and believe in themselves. Actress and activist Grace Byers and artist Keturah A. Bobo return with another gorgeously illustrated new classic that's the perfect gift for baby showers, birthdays, or just for reading at home again and again. My presence matters in this world. I know I can do anything, if only I believe I can.

Scaffold Parenting Harold S. Koplewicz, MD, 2021-02-02 Prevent and counteract the general anxiety and emotional fragility prevalent in children and teenagers today—a new parenting philosophy and strategies that give children the tools to flourish on their own (previously published as *The Scaffold Effect*). “A master

synthesizer of attachment science, medical practice, and his own experience as a father, Harold Koplewicz capably and compassionately leads us through the art of scaffolding, from early childhood through the important adolescent period.”—Daniel J. Siegel, MD, author of *The Whole Brain Child*

Just as sturdy scaffolding is necessary when erecting a building and will come down when the structure grows stable, good parenting provides children with steady and warm emotional nourishment on the path toward independence. Never-ending parental problem-solving and involvement can have the opposite effect, enabling fragility and anxiety over time. In *Scaffold Parenting*, world-renowned child psychiatrist Harold Koplewicz introduces the powerful and clinically tested idea that this deliberate build-up and then gradual loosening of parental support is the single most effective way to encourage kids to climb higher, try new things, grow from mistakes, and develop character and strength. Explaining the building blocks of an effective scaffold from infancy through young adulthood, he expertly guides parents through the strategies for raising empowered, capable people, including:

- Lay a solid foundation: The parent-child relationship needs to be made from the concrete mixture of emotional availability, positive reinforcement, clear

messaging, and consistent rules. From this supportive base, your will forge a bond that will survive adolescence and grow stronger into adulthood. • Empower growth: Skyscraper or sprawling ranch—the style of your child’s construction is not up to you! Scaffold parenting validates and accommodates the shape the child is growing into. Any effort to block or control growth will actually stunt it. • Stay on their level: Imagine being on the ground floor of a house and trying to talk to someone on the roof. The person on the roof will have to “talk down” to you or yell. If your child’s building and your scaffold are on the same level, you can speak directly, look each other in the eye, and keep the lines of communication open. Drawing on Dr. Koplewicz’s decades of clinical and personal experience, Scaffold Parenting is a compassionate, street-smart, and essential guide for the ages. All of the author’s proceeds from the sale of this book will be donated to the Child Mind Institute.

Confident Parents, Confident Kids Jennifer S. Miller, 2019-11-05
Confident Parents, Confident Kids lays out an approach for helping parents—and the kids they love—hone their emotional intelligence

so that they can make wise choices, connect and communicate well with others (even when patience is thin), and become socially conscious and confident human beings. How do we raise a happy, confident kid? And how can we be confident that our parenting is preparing our child for success? Our confidence develops from understanding and having a mastery over our emotions (aka emotional intelligence)—and helping our children do the same. Like learning to play a musical instrument, we can fine-tune our ability to skillfully react to those crazy, wonderful, big feelings that naturally arise from our child’s constant growth and changes, moving from chaos to harmony. We want our children to trust that they can conquer any challenge with hard work and persistence; that they can love boundlessly; that they will find their unique sense of purpose; and they will act wisely in a complex world. This book shows you how. With author and educator Jennifer Miller as your supportive guide, you'll learn: the lies we’ve been told about emotions, how they shape our choices, and how we can reshape our parenting decisions in better alignment with our deepest values. how to identify the temperaments your child was born with so you can support those tendencies rather than fight them. how to align your biggest hopes and dreams for your kids with specific

skills that can be practiced, along with new research to support those powerful connections. about each age and stage your child goes through and the range of learning opportunities available. how to identify and manage those big emotions (that only the parenting process can bring out in us!) and how to model emotional intelligence for your children. how to deal with the emotions and influences of your choir—the many outside individuals and communities who directly impact your child’s life, including school, the digital world, extended family, neighbors, and friends. Raising confident, centered, happy kids—while feeling the same way about yourself—is possible with Confident Parents, Confident Kids.

Real-Time Parenting Beth Miller, Mary Funari, Amy

Armstrong, 2021-03-16 Real-Time Parenting is the antidote to our comparison culture. Parents increase self-awareness and develop trust in themselves by taking inventory of their personality, values, and past experiences. They craft a unique vision for their family and choose action steps to meet their children's needs in the heat of everyday moments. There is no one-size-fits-all approach to parenting. Real-Time Parenting is written by three parent coaches who understand the demands of parenthood and empower moms and dads to discover their personal best. Through stories and

practice, they respond to their family with intention instead of reacting from stress. They build self-confidence as they embrace a positive mindset, celebrate wins, and engage with a supportive community. Referencing well-known experts and professional experience, Real-Time Parenting presents a versatile toolkit of ten best practices based in positive communication, effective discipline, and problem-solving. Parents become influential guides for their unique children through teaching, modeling, and setting healthy boundaries. They focus on connection and encouraging do behaviors instead of trying to control their children. Moms and dads realize it is never too late to improve the parent-child relationship. Parents propel their children toward healthy independence and find renewed joy in real time.

Resiliency Bonnie Benard, 2004 A few years ago, resiliency theory was relatively new to the fields of prevention and education. Today, it is at the heart of hundreds of school and community programs that recognize in all young people the capacity to lead healthy, successful lives. The key, as Benard reports in this synthesis of a decade and more of resiliency research, is the role that families, schools, and communities play in supporting, and not undermining, this biological drive for normal human development.

Of special interest is the evidence that resiliency prevails in most cases by far -- even in extreme situations, such as those caused by poverty, troubled families, and violent neighborhoods. An understanding of this developmental wisdom and the supporting research, Benard argues, must be integrated into adults' vision for the youth they work with and communicated to young people themselves. Benard's analysis of how best to incorporate research findings to support young people is both realistic and inspirational. It is an easy-to-read discussion of what the research has found along with descriptions of what application of the research looks like in our most successful efforts to support young people.

Pride and Joy Kenneth Barish Ph.D.,2012-05-28 **Pride and Joy** is a different kind of parenting book. In **Pride and Joy**, child psychologist Kenneth Barish brings together the best of recent advances in clinical and neuroscience research with the author's

three decades of experience working with children and families. He shows how a deeper appreciation of our children's emotions offers parents a new understanding of their children's development and better solutions to the problems in their lives. Barish offers advice to parents on how we can restore more joyfulness and pride in our relationships with our children and how we can help children bounce back from disappointment and defeat. He shows how we can repair family relationships that have been damaged by frequent anger and resentment and how we can preserve our children's idealism and their concern for others--how we can raise children who feel good about themselves and also care about the needs and feelings of others. Barish also offers advice on how to solve problems of daily family life--establishing rules and limits, doing homework and going to sleep, winning and losing at games, our children's reluctance to talk to us, their tantrums and lack of motivation, and their addiction to television and video games. He presents down-to-earth recommendations for solving these common family problems--problems that too often erode the joyfulness of our children and our pleasure in being parents. *Pride and Joy* is both informative and highly practical, and a balanced answer to the extreme methods that too often dominate parenting

debates. Few parenting books address the central issues of concern to today's parents while also offering parents as much day-to-day advice.

Raising an Athlete Jack Perconte, 2009-09 Joe Perconte offers practical strategies for parents, coaches, and sport enthusiasts on how to building confidence and motivation in young athletes.

Kids Confidence Scarlett Steele, 2022-04-30 What are the signs of low self-esteem in a child? What destroys a child's confidence? How do I change my child's negative mindset? Throughout this book we will look at a wide variety of factors that influence self-esteem. Along with defining exactly what it is, we will look at why it is so important. We will also break it down and look at the various life stages that children go through and how self-esteem is important, and developed, during each of these stages. After you finish this book you be able to identify unhealthy self-esteem, as well as how to help build a healthy self-esteem in children. The skills you learn in this book are not only helpful in the home, but anywhere that you may be around children. But it doesn't stop there, because the same basic principle can be applied to adults as well. So if you, or other adults you know, could use a boost in self-esteem, you can adapt these skills to the adult level and apply

them in order to help address the situation. In the field of psychology, self-esteem is an important buzz word that is often used. That's because one's self-esteem plays such a significant role in people's lives. A healthy level of self-esteem is linked to a higher level of confidence, as well as self-respect. Having both of these will usually help people in life, because they will make better choices and be better able to handle many of life's challenges. When people lack self-esteem it can lead to a host of problems. Children who lack a good sense of self-esteem may lack such things as: - A sense of independence - Being able to adequately express their emotions - Assuming responsibility for their actions - Positive social involvement - Difficulty accepting compliments from others - Expecting very little out of one's self or out of life - Being able to trust one's opinions - Not being able to properly handle peer pressure - Healthy relationships with others Additionally, researchers have found that those with low self-esteem are more prone to developing such things as eating disorders, as well as a range of mental health issues, such as depression. When it comes to the self-esteem of children, parents play the biggest role in helping to develop it. However, many parents may have difficulty helping their children to have a healthy self-esteem, simply

because they may lack it themselves, or they may not know what it is that they need to do in order to help their child develop it. Do you want to know more? Then Scroll up, click on Buy now with 1-Click, and Get Your Copy Now!
