Europe and the Governance of Global Finance Daniel Mügge, 2014-06-12 The European Union (EU) has emerged as a central actor in financial governance. Hardly any corner of European financial markets remains untouched by EU rules, and key regulatory competences have been shifted from national authorities to supranational ones. At the same time, the global context has become ever more important for how and to what effect the EU regulates its financial markets. On the one hand, EU policymaking is embedded in global initiatives such as the Basel Committee on Banking Supervision. On the other hand, the EU now rivals the USA in its ability to shape global rules. Scholars and practitioners cannot make sense of EU rulemaking without studying its links to global financial governance, just as to understand how global initiatives evolve they have to appreciate the rise of the EU as a global regulatory force. This book charts and analyses this centrality of the European-global link in financial governance for the first time. Its chapters, written by experts in the specific fields, cover the whole breadth of financial markets. They range from banking, auditing and accounting to derivatives trading, money laundering, and tax governance. This book offers comprehensive coverage of: how and why global and European financial governance have co-evolved over time; how global and European rules, institutions, and actors are linked today; and what this implies for future global and European financial governance. It is essential reading for anyone who wants to understand the dynamics of either global or European financial regulation.

Macroprudential Regulation and Policy for the Islamic Financial Industry Muhamed Zulkhibri, Abdul Ghafar Ismail, Sutan Emir Hidayat, 2016-05-25 This volume aims to discuss the current research, theory, methodology and applications of macroprudential regulation and policy for the Islamic financial industry. Published in cooperation with the Islamic Research and Training Institute (IRTI), this book features contributions from a workshop presented in collaboration with the University College of Bahrain (UCB) in Manama, Bahrain, aimed to bring together experts in Islamic banking and regulation and financial economics. This resulting book sheds light on how macroprudential policy may be implemented in the Islamic financial system, and indicates current challenges and their effects on economic growth, financial stability and monetary regulation. Macroprudential policy is increasingly seen as a way of dealing with the different dimensions of systemic risk. But many central banks, bank supervisors and regulators have

limited experience with macroprudential tools, particularly in the Islamic financial industry. Given the complementarities between monetary policy and financial stability, it appears that central banks would always play an important role in macroprudential policy. But how should macroprudential policy best interact with monetary policy? It is becoming more pressing for the central banks to conduct monetary policy in which its conventional banking system operates side by side with Islamic banking system. This question has received increasing attention in the research literature but there is much we still need to learn. This is why new insights from research on macroprudential policy – which has gained important impetus in recent years – are so valuable. Featuring contributions on topics such as macroprudential regulation, policy, tools and instruments; governance, systematic risk, monetary policy, and bank leverage, the editors provide a collection of comprehensive research covering the most important issues on macroprudential policy and regulation for the Islamic financial industry. This volume is expected to be a significant contribution to the literature in the field of Islamic finance and evaluation of public policies to promote the development for Islamic financial industry. It is also served as a key text for students, academics, researchers, policy-makers in the field of Islamic finance.
