**A Revision of the Dulcamaroid Clade of Solanum L. (Solanaceae)** Sandra Knapp,2013-05-10 This volume is a monograph of the 47 species of the Dulcamaroid clade of the large and diverse genus Solanum. Species in the group occur in North, Central and South America, and in Europe and Asia. The group is most species-rich in Peru and Brazil, and three of the component species, Solanum laxum of Brazil, Solanum seforthianum of the Caribbean and Solanum crispum of Chile are cultivated in many parts of the world. All species are illustrated and a distribution map of each is provided. All names are typified and nomenclatural and bibliographic details for all typifications presented. One new species from Ecuador is described. The monograph is the first complete taxonomic treatment of these species since the worldwide monograph of Solanum done by the French botanist Michel-Felix Dunal in 1852.

**Server Component Patterns** Markus Völter,Alexander Schmid,Eberhard Wolff,2002-11-01 A detailed exploration of the basic patterns underlying today's component infrastructures. The latest addition to this best-selling series opens by providing an Alexandrian-style pattern language covering the patterns underlying EJB, COM+ and CCM. It addresses not only the underlying building blocks, but also how they interact and why they are used. The second part of the book provides more detail about how these building blocks are employed in EJB. In the final section the authors fully explore the benefits of building a system based on components. \* Examples demonstrate how the 3 main component infrastructures EJB, CCM and COM+ compare \* Provides a mix of principles and concrete examples with detailed UML diagrams and extensive source code \* Forewords supplied by industry leaders: Clemens Syzperski and Frank Buschmann

*Thirst and Sodium Appetite* Sebastian Grossman,2012-12-02 Thirst and Sodium Appetite: Physiological Basis describes the phenomenon of thirst and the mechanisms that define the need for water. Thirst and appetite has generated much study and research about the physiological, endocrinological, and pharmacological mechanisms that influence water intake. However, in this book, other concerns have been emphasized, such as the significance of brain mechanisms in the subject matter. This book, consisting of 11 chapters, starts with a basic description of thirst then to an analysis of basic physiological mechanisms that determine water intake. Another topic also discussed in this book is various experimental paradigms that resulted to the dual-depletion theory of thirst. The neuroanatomical, neuroendocrinological, and neuropharmacological brain mechanisms are covered in three chapters of this book. These brain mechanisms respond to different peripheral signals that stimulate the thirst. The final chapters are dedicated to sodium appetite. Although it has lesser literature than thirst has, there have been significant developments in the understanding of the role of sodium appetite in extracellular thirst. The last chapter reviews the questions that has kept investigators at bay and recommends direction of where future research may go.

*Brain-Inspired Cognitive Architectures for Artificial Intelligence: BICA\*AI 2020* Alexei V. Samsonovich,Ricardo R. Gudwin,Alexandre da Silva Simões,2020-12-08 The book focuses on original approaches intended to support the development of biologically inspired cognitive architectures. It bridges together different disciplines, from classical artificial intelligence to linguistics, from neuro- and social sciences to design and creativity, among others. The chapters, based on contributions presented at the Eleventh Annual Meeting of the BICA Society, held on November 10-14, 2020, in Natal, Brazil, discuss emerging methods, theories and ideas towards the realization of general-purpose humanlike artificial intelligence or fostering a better understanding of the ways the human mind works. All in all, the book provides engineers, mathematicians, psychologists, computer scientists and other experts with a timely snapshot of recent research and a source of inspiration for future developments in the broadly intended areas of artificial intelligence and biological inspiration.

*SDL 2005: Model Driven* Andreas Prinz,Rick Reed,Jeanne Reed,2005-06-09 This volume contains the papers presented at the 12th SDL Forum, Grimstad, Norway. The SDL Forum was first held in 1982, and then every two years from 1985. Initially the Forum was concerned only with the Specification and Description Language that was first standardized in the 1976 Orange Book of the International Telecommunication Union (ITU). Since then, many developments took place and the language has undergone several changes. However, the main underlying paradigm has survived, and it is the reason for the success of the Specification and Description Language in many projects. This paradigm is based on the following important principles of distributed applications: Communication: large systems tend to be described using smaller parts that communicate with each other; State: the systems are described on the basis of an explicit notion of state; State change: the behavior of the system is described in terms of (local) changes of the state. The original language is not the only representative for this kind of paradigm, so the scope of the SDL Forum was extended quite soon after the first few events to also include other ITU standardized languages of the same family, such as MSC, ASN.1 and TTCN. This led to the current scope of System Design Languages covering all stages of the development process including in particular SDL, MSC, UML, ASN.1, eODL, TTCN, and URN. The focus is clearly on the advantages to users, and how to get from these languages the same advantage given by the ITU Specification and Description Language: code generation from high-level specifications.

**Ten Years a Nomad** Matthew Kepnes,2019-07-16 Part memoir and part philosophical look at why we travel, filled with stories of Matt Kepnes' adventures abroad, an exploration of wanderlust and what it truly means to be a nomad. Matt is possibly the most well-traveled person I know...His knowledge and passion for understanding the world is unrivaled, and never fails to amaze me. —Mark Manson, New York Times bestselling author of The Subtle Art of Not Giving a F\*ck Ten Years a Nomad is New York Times bestselling author Matt Kepnes' poignant exploration of wanderlust and what it truly means to be a nomad. Part travel memoir and part philosophical look at why we travel, it is filled with aspirational stories of Kepnes' many adventures. New York Times bestselling author of How to Travel the World on \$50 a Day, Matthew Kepnes knows what it feels like to get the travel bug. After meeting some travelers on a trip to Thailand in 2005, he realized that living life meant more than simply meeting society's traditional milestones, such as buying a car, paying a mortgage, and moving up the career ladder. Inspired by them, he set off for a year-long trip around the world before he started his career. He finally came home after ten years. Over 500,000 miles, 1,000 hostels, and 90 different countries later, Matt has compiled his favorite stories, experiences, and insights into this travel manifesto. Filled with the color and perspective that only hindsight and self-reflection can offer, these stories get to the real questions at the heart of wanderlust. Travel questions that transcend the basic how-to, and plumb the depths of what drives us to travel — and what extended travel around the world can teach us about life, ourselves, and our place in the world. Ten Years a Nomad is for travel junkies, the travel-curious, and anyone interested in what you can learn about the world when you don't have a cable bill for a decade or spend a month not wearing shoes living on the beach in Thailand.
