The Spy Who Hated Me! Shaun Chapman,2015-12-11 James Spillaney, part spy, part detective, passing life in a world where he doesn’t fit in. It was the 1950s, heralded in by the Roswell crash in 1947. In a world where science had suddenly exploded onto the scene with so many technological advancements, it was hard to keep up. It’s a world of controversy, deceit, and lies (and that was only from the politicians); of valve phones and hydrogen-powered steam engines thundering around the globe on a super rail track system started by the Germans before the war, the International Train Transport System (ITTS); and of art deco edifices reminiscent of the ’20s. But underneath it all—underneath the shining metropolises scattered around the earth, which were examples of man’s ingenuity and brilliance of mind—was an undercurrent of iniquity and murder, controlled by a few or, as James puts it, “the pond scum of the universe.” Spillaney will do everything he needs to resolve a case, and if that means ‘bustin’ some nuts,’ then so be it. He has more enemies than hairs on a camel’s back; their weapons of choice are bullets, knives, bricks, and machetes. He has an ex-wife, who hates him and wants him dead, the Spy Factory wanting to torture and murder him, a criminal organization wanting him removed

permanently and an assorted bunch of undesirables, lunatics, and corporate thugs. They all step over the line just to make his life miserable. Not that James could give a damn. He just takes life one day at a time. As he puts it, “the world is not sane enough.”

**The Scientist and the Spy** Mara Hvistendahl,2021-02-02 A riveting true story of industrial espionage in which a Chinese-born scientist is pursued by the U.S. government for trying to steal trade secrets, by a finalist for the Pulitzer Prize in nonfiction. In September 2011, sheriff's deputies in Iowa encountered three ethnic Chinese men near a field where a farmer was growing corn seed under contract with Monsanto. What began as a simple trespassing inquiry mushroomed into a two-year FBI operation in which investigators bugged the men's rental cars, used a warrant intended for foreign terrorists and spies, and flew surveillance planes over corn country—all in the name of protecting trade secrets of corporate giants Monsanto and DuPont Pioneer. In *The Scientist and the Spy*, Hvistendahl gives a gripping account of this unusually far-reaching investigation, which pitted a veteran FBI special agent against Florida resident Robert Mo, who after his academic career foundered took a questionable job with the Chinese agricultural company DBN—and became a pawn in a global rivalry. Industrial espionage by Chinese companies lies beneath the United States' recent trade war with China, and it is one of the top counterintelligence targets of the FBI. But a decade of efforts to stem the problem have been largely ineffective. Through previously unreleased FBI files and her reporting from across the United States and China, Hvistendahl describes a long history of shoddy counterintelligence on China, much of it tinged with racism, and questions the role that corporate influence plays in trade secrets theft cases brought by the U.S. government. *The Scientist and the Spy* is both an important exploration of the issues at stake and a compelling, involving read.
