*India Connected* Ravi Agrawal,2018-10-01 Former chief CNN India correspondent and award-wining journalist Ravi Agrawal takes readers on a journey across the Subcontinent, through its remote rural villages and its massive metropolises, seeking out the nexuses of change created by smartphones, and with them connection to the internet. As always with India, the numbers are staggering: in 2000, 20 million Indians had access to the internet; by 2017, 465 million were online, with three Indians discovering the internet every second. By 2020, India's online community is projected to exceed 700 million, and more than a billion Indians are expected to be online by 2025. In the course of a single generation, access to the internet has progressed from dial-up connections on PCs, to broadband access, wireless, and now 4G data on phones. The rise of low-cost smartphones and cheap data plans has meant the country leapfrogged the baby steps their Western counterparts took toward digital fluency. The results can be felt in every sphere of life, upending traditions and customs and challenging conventions. Nothing is untouched, from arranged marriages to social status to business start-ups, as smartphones move the entire economy from cash-based to credit-based. Access to the internet is affecting the progress of progress itself. As Agrawal shows, while they offer immediate and sometimes mind-altering access to so much for so many, smartphones create no immediate utopia in a

culture still driven by poverty, a caste system, gender inequality, illiteracy, and income disparity. Internet access has provided greater opportunities to women and changed the way in which India's many illiterate poor can interact with the world, but it has also meant that pornography has become more readily available. Under a government keen to control content, it has created tensions. And in a climate of hypernationalism, it has fomented violence and even terrorism. The influence of smartphones on the world's largest democracy is nonetheless pervasive and irreversible, and India Connected reveals both its dimensions and its implications.

Competition Law in India Abir Roy,2024-03-12 In the last few years, the Competition Commission of India has been extremely assertive in its enforcement outlook, especially in the digital markets. Additionally, the relevance of competition law in India continues to grow in importance as investment activity increases. This comprehensive, practical guide outlines the highly distinctive manner in which competition law is interpreted in this major global market. Highlighting the key aspects of Indian competition law, a leading competition law practitioner describes elements of Indian competition law encompassing the following: the dual regulatory-judicial nature of the Competition Commission; investigatory powers of the Commission's Director General; mandated business conduct policies (e.g., active risk management procedures); availability of sanctions, remedies, and private actions; cartels and leniency programmes; extraterritorial application of the Competition Commission; merger review; pricing and non-pricing abuse; approach in digital markets; appeal process; fines – companies, directors and officers; fines for non-cooperation or furnishing

false information; and liability of state-owned enterprises. Analysis of numerous leading cases decided by the Indian competition authorities enhances the book's practical value. This comprehensive guide provides an incomparable overview of practice in a key jurisdiction that is increasingly becoming one of the most important in the international recognition and enforcement of competition law. As a guide to the 'landscape' of competition law in India, it has no peers. The book will be of inestimable value to professionals in this area of legal practice, whether in law firms, corporations, academia, government or the judiciary, as well as to investors, economists and business executives.

   **Indian Journalism in a New Era** Shakuntala Rao,2018-12-24 In the ever-changing information environment of the early twenty-first century, citizens and journalists alike are eagerly adapting to new technologies, and India is no different. The country's communication revolution in the post-liberalization era has led to one of the largest media markets in the world. Further, changes in media ownerships and the blending of news with opinions have impacted established practices of reporting. Given the breadth and scope of India's media, there is little meaningful literature available about journalism practised in the country today. Indian Journalism in a New Era brings together informative and critical contributions about contemporary Indian journalism from twenty-one Indian and global scholars and journalists. The book is divided into four different sections, each addressing one relevant aspect: history and evolving changes; social media and e-journalism; marginalization; and pedagogy, ethics, and public sphere. The contributors address issues like changes in journalism practices, socio-economic conditions of the Indian state, and minority politics. Holistically, the volume focuses on the ways to approach and analyse the enormity and scope in Indian journalism, media technology, and global relations.

   The Smartphone Elizabeth Woyke,2014 We think we know everything about smartphones. We use them constantly. We depend on them for every conceivable purpose. We are familiar with every inch of their compact frames. But there is more to the smartphone than meets the eye. How are smartphones made? How have they shaped the way we socialise? And who tracks the movements they record? These are just some of the questions that journalist Elizabeth Woyke answers in an illuminating look at this feature of our day-to-day lives. Features interviews with key figures in industry.

   **Mobile Communication in Asian Society and Culture** Ming Xie,Chin-Chung Chao,2023-09-27 Xie and Chao present a collection of research on mobile communication in Asian communities and countries such as Bangladesh, China, India, Japan, and South Korea. With chapters written by scholars from diverse cultural and institutional backgrounds, this book provides both localized and comparative perspectives on mobile communication research. Exploring the way mobile apps are used in daily life in Asian countries, Xie, Chao, and their contributors analyze how mobile apps improve lives, help people build relationships, sustain communities, and change society for the better. They look at areas including the role of mobile apps in public service delivery and access, family communication, cultural norms and identities, organizational communication, and intercultural communication. The investigation of these topics elevates the understanding of the cultural, familial, interpersonal, organizational, and intercultural consequences of mobile communication in a global context. Through examining mobile apps use

in regard to scale, scope, depth, complexity, and distinctiveness within the Asian context, this book furthers the research agenda of mobile communication and enriches our understanding of current practice and future direction of mobile communication. This book serves as a useful reference for scholars and students interested to learn more of the development and application of mobile communication from a global and comparative perspective.

  ICT Infrastructure and Computing Milan Tuba,Shyam Akashe,Amit Joshi,2023-09-25 This book proposes new technologies and discusses future solutions for ICT design infrastructures, as reflected in high-quality papers presented at the 8th International Conference on ICT for Sustainable Development (ICT4SD 2023), held in Goa, India, on August 3–4, 2023. The book covers the topics such as big data and data mining, data fusion, IoT programming toolkits and frameworks, green communication systems and network, use of ICT in smart cities, sensor networks and embedded system, network and information security, wireless and optical networks, security, trust, and privacy, routing and control protocols, cognitive radio and networks, and natural language processing. Bringing together experts from different countries, the book explores a range of central issues from an international perspective.

  *Digital Platforms and the Global South* Philippe Bouquillion,Christine Ithurbide,Tristan Mattelart,2023-12-01 This book addresses the issues raised by digital platforms in the Global South, with an emphasis on the cultural stakes involved. It brings together an interdisciplinary team of researchers – including political economists, socio-economists, geographers, media sociologists or anthropologists – who each explore these issues through an insightful case study at a local, national, regional or international scale. While studying the strategies of some of the main US-based Big Tech platforms or video streaming platforms towards the Global South, the chapters also consider the often-neglected active role local or regional actors play in the expansion of those Western digital players, and highlight the existence of a constellation of local or regional platforms that have emerged in Africa, Asia, Latin America or the Middle East. In addition to analysing the complex relationships of competition, collaboration or dependence between these diverse actors, this volume examines the ways in which the rise of these digital platforms has generated new forms of cultural entrepreneurship and participated in the reconfiguring of the conditions in which cultural contents are produced and circulated in the Global South. This volume will appeal to readers interested in the transnationalisation of cultural industries or in the social, political, economic, cultural and geopolitical dimensions of digital transformations and will be an important resource for students, teachers and researchers in media, communication, cultural studies, international relations and area studies programmes.

  Cyber Security in India Sandeep Kumar Shukla,Manindra Agrawal,2020-03-17 This book of 'directions' focuses on cyber security research, education and training in India, and work in this domain within the Indian Institute of Technology Kanpur. IIT Kanpur's Computer Science and Engineering Department established an 'Interdisciplinary Center for Cyber Security and Cyber Defense of Critical Infrastructures (C3I Center)' in 2016 with funding from the Science and Engineering Research Board (SERB), and other funding agencies. The work at the center focuses on smart grid security, manufacturing and other industrial control system security; network, web and data security;

cryptography, and penetration techniques. The founders are involved with various Indian government agencies including the Reserve Bank of India, National Critical Information Infrastructure Protection Center, UIDAI, CCTNS under home ministry, Ministry of IT and Electronics, and Department of Science & Technology. The center also testifies to the parliamentary standing committee on cyber security, and has been working with the National Cyber Security Coordinator's office in India. Providing glimpses of the work done at IIT Kanpur, and including perspectives from other Indian institutes where work on cyber security is starting to take shape, the book is a valuable resource for researchers and professionals, as well as educationists and policymakers.

Indian Business Case Studies Volume VI S B Mathur,Sudhakar Bokephode,D D Balsaraf,2022-06-15 It has been decades since many business schools outside India adopted the case study methodology for teaching almost all branches of management studies. This trend has been seen in India, too, where top management institutes have implemented the case study-based methodology as an important pedagogical tool in business education. The major issue in India, however, is a severe shortage of Indian case studies through which business schools can provide industry insights to students. This volume fills that gap. It has twenty Indian cases related to different aspects of business management. The cases cover some of the prominent disciplines of management like marketing, finance, human resource management, strategy management, operations management, accounting, and mergers and acquisitions. These cases best serve the purpose of adoption of 'case methodology' in classroom teaching or online lecture sessions for the faculty and students of business management.

It creates a knowledge base for the students, academicians, researchers and industry practitioners by analyzing the real research gaps and latest developments, trends, and research in the Indian tourism sector. The book also discusses recent initiatives taken by the Government of India to boost this particular sector. The book covers a very important part of syllabus of higher education programs in tourism like MBA (Travel Tourism), MTTM, MTM (IGNOU), MTA, BTS, BTA.

Gaming Culture(s) in India Aditya Deshbandhu,2020-05-13 This volume critically analyzes the multiple lives of the gamer in India. It explores the everyday of the gaming life from the player's perspective, not just to understand how the games are consumed but also to analyze how the gamer influences the products' many (virtual) lives. Using an intensive ethnographic approach and in-depth interviews, this volume situates the practice of gaming under a broader umbrella of digital leisure activities and foregrounds the proliferation of gaming as a new media form and cultural artifact; critically questions the term gamer and the many debates surrounding the gamer tag to expand on how the gaming identity is constructed and expressed; details participants' gaming habits, practices and contexts

from a cultural perspective and analyzes the participants' responses to emerging industry trends, reflections on playing practices and their relationships to friends, communities and networks in gaming spaces; and examines the offline and online spaces of gaming as sites of contestation between developers of games and the players. A holistic study covering one of the largest video game bases in the world, this volume will be of great interest to scholars and researchers of cultural studies, media and communication studies and science and technology studies, as well as be of great appeal to the general reader.

**Intangible assets and value capture in global value chains: the smartphone industry** World Intellectual Property Organization,Jason Dedrick,Kenneth L. Kraemer,2017 This report uses data on individual smart phones as well as industry data to identify which smartphone firms capture the most value. It finds that Apple captures most of the industry profits, thanks to its high prices, large profit margins and the volume of iPhone sales worldwide. Apple's success is explained as a result of its ability to develop its own intellectual property (IP) and take advantage of IP created by suppliers through a strategy of selling only a few models at high prices compared to competitors.
