**Army's Future Combat System (FCS); Background and Issues for Congress** Andrew Feickert,2011-01 This is a print on demand edition of a hard to find publication. The Future Combat System (FCS) was a multi-year, multi-billion dollar program at the heart of the Army's transformation efforts. It was to be the Army's major R&D, and acquisition program consisting of 14 manned and unmanned systems tied together by an extensive commun. and info. network. The FCS program has been characterized as a high-risk venture due to the advanced technologies involved and the challenge of networking all of the FCS subsystems together. Contents of this report: (1) Program Origins; (2) Program Overview; Current FCS Program Status; Army's Modernization Strategy; Budget Issues; (3) Issues for Congress: MGVCancellation; Army Modernization Strategy and Spin Outs; Proposed Ground Combat Vehicles. **Tactical Display for Soldiers** National Research Council,Division of Behavioral and Social Sciences and Education,Board on Human-Systems Integration,Panel on Human Factors in the Design of Tactical Display Systems for the Individual Soldier,1997-01-17 This book examines the human factors issues associated with the development, testing, and implementation of helmet-mounted display technology in the 21st Century Land Warrior System. Because the framework of analysis is soldier performance with the system in the full range of environments and missions, the book discusses both the military context and the characteristics of the infantry soldiers who will use the system. The major issues covered include the positive and negative effects of such a display on the local and global situation awareness of the individual soldier, an analysis of the visual and psychomotor factors associated with each design feature, design considerations for auditory displays, and physical sources of stress and the implications of the display for affecting the soldier's workload. The book proposes an innovative approach to research and testing based on a three-stage strategy that begins in the laboratory, moves to controlled field studies, and culminates in operational testing.

The Story of a Common Soldier of Army Life in the Civil War Leander Stillwell,2020-03-07 I was born September 16, 1843, on a farm, in Otter Creek precinct, Jersey County, Illinois. I was living with my parents, in the little old log house where I was born, when the Civil war began. The Confederates fired on Fort Sumter on April 12, 1861, and thus commenced the war. On April 15, 1861, President Lincoln issued a call for 75,000 men, to aid in putting down the existing rebellion. Illinois promptly furnished her quota, and in addition, thousands of men were turned away, for the reason that the complement of the State was complete, and there was no room for them. The soldiers under this call were mustered in for three months' service only, for the government then seemed to be of the opinion that the troubles would be over by the end of that time. But on May 3, 1861, Mr. Lincoln issued another call for volunteers, the number specified being a little over 42,000, and their term of service was fixed at three years, unless sooner discharged. The same call provided for a substantial increase in the regular army and navy.

As above stated, the belief then was almost universal throughout the North that the war would amount to nothing much but a summer frolic, and would be over by the 4th of July. We had the utmost confidence that Richmond would be taken by that time, and that Jeff Davis and his cabinet would be prisoners, or fugitives. But the battle of Bull Run, fought on July 21, 1861, gave the loyal people of the Nation a terrible...

*The Dynamics of Doctrine* Timothy T. Lupfer,1981 This paper is a case study in the wartime evolution of tactical doctrine. Besides providing a summary of German Infantry tactics of the First World War, this study offers insight into the crucial role of leadership in facilitating doctrinal change during battle. It reminds us that success in war demands extensive and vigorous training calculated to insure that field commanders understand and apply sound tactical principles as guidelines for action and not as a substitute for good judgment. It points out the need for a timely effort in collecting and evaluating doctrinal lessons from battlefield experience. -- Abstract.
