They know their history. And now they want their history back. 200,000 people of the Old Comers' clan boarded on Battleship Inferno to find their home again, Earth. It will be a long journey until the Old Comers will find their home again. Battleship inferno is the last stand. A space opera at its best.

The History of the Science-fiction Magazine Michael Ashley, 2000 This third volume in Mike Ashley's four-volume study of the science-fiction magazines focuses on the turbulent years of the 1970s, when the United States emerged from the Vietnam War into an economic crisis. It saw the end of the Apollo moon programme and the start of the ecology movement. This proved to be one of the most complicated periods for the science-fiction magazines. Not only were they struggling to survive within the economic climate, they also had to cope with the death of the father of modern science fiction, John W. Campbell, Jr., while facing new and potentially threatening opposition. The market for science fiction diversified as never before, with the growth in new anthologies, the emergence of semi-professional magazines, the explosion of science fiction in college, the start of role-playing gaming magazines, underground and adult comics and, with the success of Star Wars, media magazines. This volume explores how the traditional science-fiction magazines coped with this, from the

Serpent Galaxy David McElwrath, 2016-09-19 This books storyline is that of reptilians from the Andromeda Galaxy. The first earth ship to meet the reptilians was not a human ship but an advanced ship of the ancient and advanced race of the Vlar. The Vlar were a very high technology ancient race who expected to have no fear of the Snakes. However, the race of reptilians that were rapidly conquering all civilizations with which they came into contact were now a threat to all races, whatever their level of technology. A century ago, the Vlar never expected to be worried about the Snakes, as all civilizations called them. Their conquests had become so rapid and so had their takeover of advanced civilizations and their technology that they were now a threat to every being in the galaxy. The Vlar gave the earth humans some of their high-tech ships as a kind of last effort since they held the earth humans in such low regard. The Vlar thought of the earth humans as warlike, backward, and vicious animals who killed their own kind. However, there were very few options left open to the Vlar, so they gave the earth humans a few of their ships. The Snakes had millions of high-tech ships that carried thousands of Snake soldiers at several times the speed of light. The Vlar gave the earth humans a few dozen Vlar ships. The Snakes were over seven feet tall and weighed over five hundred pounds. They were equipped with fangs and claws like the Tyrannosaurus rex of old earth history. They liked to fight with hands or blade weapons to see the blood flow. They were cannibals in addition to being carnivores. They considered it honorable to eat your defeated foe, and they were not above eating their own children. The Snakes used massed ships in the millions to just roll over all the people they intended to conquer. It was expected of any failed Snake expeditions to commit suicide. The Snakes occupied over 1,400 planets and were continuing to conquer more as time went by. Apparently, none could stand before the Snakes. Could the small blue planet called earth have a chance to survive?

Millennium Judith Reeves-Stevens, Garfield Reeves-Stevens, 2002-05-12 Welcome, Emissary. As Benjamin Sisko picked his way over the wreckage that was his new command, a thousand questions, countless problems, dire reports, and the soon-to-be-familiar harangue of the Bajoran Liaison Officer clamored for his attention. From the shadows, a monk stepped out and greeted him. With all that had happened, it is no small wonder that Sisko took that greeting and relegated it to the back of his mind. Six years have passed. Despite the recent retaking of Deep Space 9™, it seems that the Federation is losing the Dominion war. As commander of a front-line post, Sisko focuses on the war effort, paying little attention to the latest rumor. The fabled lost Orbs of the Prophets have been recovered. Legend holds that these orbs are the key to unlocking a second wormhole -- a second Celestial Temple. In war, sometimes the little things you don't notice are your undoing. Now Benjamin Sisko, a man of science and a Starfleet officer -- and also the Emissary -- is swept up in the ultimate war of good versus evil. Every decision he makes draws him, his family, and his crew into the abyss. Faced with the possibility that he alone must decide the fate of life in the galaxy, Captain Sisko must unlock the truth behind the fabled Orbs of the Prophets or the future, the past, and even the present will wink out of existence!

Exploring Space: 1999 John Kenneth Muir, 2015-09-15 Starring internationally renowned actors Martin Landau, Barbara Bain, Barry Morse and Catherine Schell, the British-made *Space: 1999* was the only truly original space

adventure of the mid-1970s. Sandwiched between the demise of the original Star Trek and the opening of the Stars Wars series on the big screen, Space: 1999 featured a richly-visualized world where space was terrifying and mysterious, where not all problems were solvable by technology and the space travelers were very human. From the science fiction show's conception in 1973 to its cancellation in 1977, this reference work covers each of the 48 episodes in depth, including a full plot synopsis, writer, director, guest star credits, and critical commentary that examines both the episode and other shows that have used similar plotlines. The popularity of Space: 1999 memorabilia and its many fan clubs are fully discussed, along with the possibility of a future movie or reunion show that would tie up the loose ends caused by the show's abrupt cancellation.

The Inferno Fred Hoyle, Geoffrey Hoyle, 2015-06-24 Cameron, a tall, testy, whisky-drinking, nationalist-minded, Scottish physicist, may not have been an astronomer, but he knew the off things in the sky when he saw them. From an Australian mountaintop where he was advising on the location of a radiotelescope he saw what looked like Mars, in the wrong spot in the sky. But it wasn't Mars at all, it was a supernova ... no, not a supernova but a quasar. Knowing what would happen, Cameron dashed home to Scotland and found himself at a crossroads of his life. In the face of total catastrophe, and of intense heat, darkness and rain, he took over as natural leader with both the north and south of the United Kingdom turning to him for help. Sir Fred Hoyle, world-renowned astrophysicist, and his son, Geoffrey Hoyle, have set their newest science fiction thriller not only in London and Scotland, but also at the University of Charlottesville, and in Australia as well. The result is an intriguing, fast-paced novel written with a wry humour and offering some fascinating glimpses of and gibes at astronomy.
