The Magic Keys Albert Murray,2007-12-18 The Magic Keys winningly evokes the coming to maturity of one of the great characters in contemporary American literature: Scooter, the central protagonist of Albert Murray's highly acclaimed autobiographical novels *Train Whistle Guitar*, *The Spyglass Tree*, and *The Seven League Boots*. Growing up brilliant and curious in Alabama, Scooter was told he was destined for greatness. Now newly married and a graduate student in humanities at New York University, he goes about discovering just what he is destined to be great at. Anchored by Eunice, his “Mrs. Me,” Scooter makes the rounds of Manhattan's libraries, jazz hangouts, galleries, skyscrapers, and endlessly fascinating streets, meeting the people who will help him find his way: dapper Taft Edison, who is setting their down-home dialect onto the pages of his novel-in-progress; Joe States, a drummer who brings old expectations to Scooter's new life; and Jewel Templeton, no longer his girl but still a believer. When his budding career takes him back to Alabama, Scooter discovers both the promise of everyday bliss and intimations of adventures to come. In his inimitably musical, ardent prose, Murray captures the joyful rhythms of youth and the pulse of life at the moment when everything seems possible, in an exhilarating, tender, and masterfully crafted novel.

Sound Experiments Paul Steinbeck,2023-11-05 A groundbreaking study of the trailblazing music of Chicago's AACM, a leader in the world of jazz and experimental music. Founded on Chicago's South Side in 1965 and still thriving today, the Association for the Advancement of Creative Musicians (AACM) is the most influential collective organization in jazz and experimental music. In Sound Experiments, Paul Steinbeck offers an in-depth historical and musical investigation of the collective, analyzing individual performances and formal innovations in captivating detail. He pays particular attention to compositions by Muhal Richard Abrams and Roscoe Mitchell, the Association's leading figures, as well as Anthony Braxton, George Lewis (and his famous computer-music experiment, Voyager), Wadada Leo Smith, and Henry Threadgill, along with younger AACM members such as Mike Reed, Tomeka Reid, and Nicole Mitchell. Sound Experiments represents a sonic history, spanning six decades, that affords insight not only into the individuals who created this music but also into an astonishing collective aesthetic. This aesthetic was uniquely grounded in nurturing communal ties across generations, as well as a commitment to experimentalism. The AACM's compositions broke down the barriers between jazz and experimental music and made essential contributions to African American expression more broadly. Steinbeck shows how the creators of these extraordinary pieces pioneered novel approaches to

instrumentation, notation, conducting, musical form, and technology, creating new soundscapes in contemporary music.
