In Search of Lost Futures Magdalena Kazubowski-Houston, Mark Auslander, 2021-02-16 *In Search of Lost Futures* asks how imaginations might be activated through practices of autoethnography, multimodality, and deep interdisciplinarity—each of which has the power to break down methodological silos, cultivate novel research sensibilities, and inspire researchers to question what is known about ethnographic process, representation, reflexivity, audience, and intervention within and beyond the academy. By blurring the boundaries between the past, present, and future; between absence and presence; between the possible and the impossible; and between fantasy and reality, *In Search of Lost Futures* pushes the boundaries of ethnographic engagement. It reveals how researchers on the cutting edge of the discipline are studying absence and grief and employing street performance, museum exhibit, anticipation, or simulated reality to research and intervene in the possible, the impossible, and the uncertain.

Brave, Beautiful and Baring it All Rhyanna Watson, 2020-01-14 In this bold, compassionate title, yoga teacher, wellness trainer and social media sensation Rhyanna Watson - who has come out the other side of a lot of personal trauma both stronger and happier - explores how to strip back your protective layers, feel brave and beautiful again, and make the rest of your life the best of your life. Rhyanna's nurturing yet empowering text encourages us to get out of our heads and more into our bodies and hearts in order to reconnect with both ourselves and others - to feel less judged, more accepted; less flawed, more worthy; less insecure, more confident; less scared, more loved. As the title suggests, the key message is that it's only when we're willing to be brave, open our minds and hearts, get fit from the inside out, and both 'bare' it all (allowing ourselves to be

vulnerable when appropriate) and 'bear' it all (accepting both the good and the bad with patience and grace) that we will be able to feel our most beautiful and live our best lives. Being brave doesn't mean we have to jump out of planes or fight lions of course! It simply means being open enough to really get to know and love ourselves, stripped of all societal pressures and expectations. And when it comes to being beautiful, well, we're all beautiful in our own ways, so it's just about accepting our own truth and embracing and believing in ourselves!

The Theory of Almost Everything Robert Oerter, 2006-09-26 There are two scientific theories that, taken together, explain the entire universe. The first, which describes the force of gravity, is widely known: Einstein's General Theory of Relativity. But the theory that explains everything else—the Standard Model of Elementary Particles—is virtually unknown among the general public. In *The Theory of Almost Everything*, Robert Oerter shows how what were once thought to be separate forces of nature were combined into a single theory by some of the most brilliant minds of the twentieth century. Rich with accessible analogies and lucid prose, *The Theory of Almost Everything* celebrates a heretofore unsung achievement in human knowledge—and reveals the sublime structure that underlies the world as we know it.
