Five Basic Institution Structures and Institutional Economics Shaorong Sun, 2016-01-12 This book discusses a development in institutional economics and management science, which provides engineering methods for institution design. Based on the "Sun Diagram" created by the author, it uses graphics and calculations to explain that there are only five fundamental management institution structures, each of which has a particular management effect. It also demonstrates that production activities should be managed with different institutions according to the differences in externalities. This significant book suggests ways of using institution design to tackle the key challenges faced by societies today, such as environmental pollution, over-consumption of natural resources, carbon emissions, world peace issues and stagnating productivity levels.

Institutional Reforms in the Public Sector Mahabat Baimyrzaeva, 2012-10-11 What does it take to build and sustain effective government institutions? What have we learnt about the attempts to design and redesign public sector institutions in different countries? What works and what doesn't, and why? This book intends to answer these questions and presents analytical tools essential in planning for institutional reform,

Institutional Work Thomas B. Lawrence, Roy Suddaby, Bernard Leca, 2009-07-16 The 'institutional' approach to organizational research has shown how enduring features of social life - such as marriage and bureaucracy - act as mechanisms of social control. Such approaches have traditionally focused attention on the relationships between organizations and the fields in which they operate, providing strong accounts of the processes through which institutions govern action. In contrast, the study of institutional work reorients these traditional concerns, shifting the focus to understanding how action affects institutions. This book sets a research agenda within the field of institutional work by analyzing the ways in which individuals, groups, and organizations work to create, maintain, and disrupt the institutions that structure their lives. Through a series of essays and case studies, it explores the conceptual core of institutional work, identifies institutional work strategies, provides exemplars for future empirical research, and embeds the concept within broader sociological debates and ideas.

The New Institutional Politics Jan-Erik Lane, Svante O. Ersson, 2000 The New Institutional Politics explores how political institutions matter for political, economic and social outcomes and estimates their impact in relation to other major factors such as culture and social structure.

Institutional Theory and Organizational Change Staffan Furusten, 2023-01-10 Fully revised and refined, this new edition of Institutional Theory and Organizational Change considers the developments in the field of institutional organization theory over the past decade. With each chapter being significantly updated, the book explains what the institutional organization approach means by bringing special attention to how the institutional environment is made up and how organizations are governed by it.

Institutional Investors and Corporate Governance Theodor Baums, Richard M. Buxbaum, Klaus J. Hopt, 1994 The volume contains 23 articles by international experts, both scholars and practitioners dealing with the development of institutional investors (such as banks, insurances, investment companies,

pension funds etc.), their investment and voting policies, the impact on managements of the companies concerned and related issues. The consequences of the international development on capital markets as well as policy implications for the respective national legislations are treated.

New Themes in Institutional Analysis Georg Krücken, Carmelo Mazza, Renate E. Meyer, Peter Walgenbach, 2017-08-25 Institutional theory has become one of the dominant organizational approaches in recent decades. Its roots can be traced to Europe, and an important intellectual objective of this book is to examine North American theory strands and reconnect them with European research traditions. In addition, this book focuses on how organizations and individuals handle heterogeneous and challenging social conditions which are subsequently reflected in various forms of change.

Institutional Design David L. Weimer, 1995-03-31 Policy scientists have long been concerned with understanding the basic tools, or instruments, that governments can use to accomplish their goals. The initial interest in inductively developing comprehensive lists of generic instruments for policy analysis soon gave way to efforts to discover more parsimonious, but still useful, specifications of the elementary components out of which instruments can be assembled. Moving from a generic instrument to a fully specified policy alternative, however, requires the designer to go much beyond the elementary components. Rather than directly specifying some of these details, the designer may instead set the rules by which they will be specified. The creation of these specifications and rules can be thought of as institutional design. This book helps scholars and policy analysts formulate more effective policy alternatives by a better understanding of institutional design. The feasibility and effectiveness of policies depend on the political, economic, and social contexts in which they are embedded. These contexts provide an environment of existing institutions that offer opportunities and barriers to institutional design. A fundamental understanding of institutional design requires theories of institutions and institutional change. With a resurgence of interest in institutions in recent years, there are many possible sources of theory. The contributors to this volume draw from the variety of sources to identify implications for understanding institutional design.

Organizational Innovation and Change Cecilia Rossignoli, Mauro Gatti, Rocco Agrifoglio, 2015-10-07 This book explores a range of critical issues and emerging topics relevant to the linkages between information technologies and organizational systems. It encourages debate and opens up new avenues of inquiry in the fields of Information Systems, organization and management studies by investigating selected themes of growing research interest from multiple disciplinary perspectives such as organizational innovation and impact, information technology, innovation transfer, and knowledge management. The volume is divided into two sections, each of which focuses on a specific theme: ICT, organizational innovation and change; and ICT and knowledge management. The content of each section is based on a selection of the best papers (original double-blind peer-reviewed contributions) presented at the annual conference of the Italian chapter of the AIS, held in Genoa, Italy in November 2014.

Reclaiming Participatory Governance Adrian Bua, Sonia Bussu, 2023-05-12

Reclaiming Participatory Governance offers empirical and theoretical perspectives on how the relationship between social movements and state institutions is emerging and developing through new modes of participatory governance. One of the most interesting political developments of the past decade has been the adoption by social movements of strategies seeking to change political institutions through participatory governance. These strategies have flourished in a variety of contexts, from anti-austerity and pro-social justice protests in Spain, to movements demanding climate transition and race equality in the UK and the USA, to constitutional reforms in Belgium and Iceland. The chief ambition and challenge of these new forms of participatory governance is to institutionalise the prefigurative politics and social justice values that inspired them in the first place, by mobilising the bureaucracy to respond to their claims for reforms and rights. The authors of this volume assess how participatory governance is being transformed and explore the impact of such changes, providing timely critical reflections on: the constraints imposed by cultural, economic and political power relations on these new empowered participatory spaces; the potential of this new wave of participatory democracy to reimagine the relationship between citizens and traditional institutions towards more radical democratic renewal; where and how these new democratisation efforts sit within the representative state; and how tensions between the different demands of lay citizens, organised civil society and public officials are being managed. This book will be an important resource for students and academics in political science, public administration and social policy, as well as activists, practitioners and policymakers interested in supporting innovative engagement for deeper social transformation. Chapter 11 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

Guardians of Public Value Arjen Boin, Lauren A. Fahy, Paul 't Hart, 2021 This open access book presents case studies of twelve organisations which the public have come to view as institutions. From the BBC to Doctors Without Borders, from the Amsterdam Concertgebouw Orchestra to CERN, this volume examines how some organisations rise to prominence and remain in high public esteem through changing and challenging times. It builds upon the scholarly tradition of institutional scholarship pioneered by Philip Selznick, and highlights common themes in the stories of these highly diverse organizations; demonstrating how leadership, learning, and luck all play a role in becoming and remaining an institution. This case study format makes this volume ideal for classroom use and practitioners alike. In an era where public institutions are increasingly under threat, this volume offers concrete lessons for contemporary organisation leaders. Arjen Boin is Professor of Public Institutions and Governance at the Department of Political Science, Leiden University, Netherlands. Paul 't Hart is Professor of Public Administration at the Utrecht School of Governance, Utrecht University, Netherlands. Lauren A. Fahy is a PhD Fellow at the Utrecht School of Governance, Utrecht University, Netherlands.

Media Management and Digital Transformation Arne L. Bygdås, Stewart Clegg, Aina Landsverk Hagen, 2019-05-01 Media Management and Digital Transformation provides novel and empirically rich insights into the

tensions, struggles and innovations of news making and managing in media organizations. From an empirically grounded perspective this book investigates how the 'buzz' of new technology tends to prevent management from seeing which changes are needed and indeed possible to make in the newsroom. It presents ground-breaking research showing that fostering ingenious, innovative solutions can be created from within organizations by engaging and allowing employees to recognize problems, reflect and experiment with new ways of working, using technology as support for change. The research presented arises from a four-year action research project in collaboration with three small and medium-sized Norwegian newspapers, in addition to ethnographic research in newsrooms and on media organizations and phenomena in the USA and Europe. It includes among other empirical examples of newsrooms transitioning from a deadline-controlled workflow to an open-ended flowline production, and provides new tools and methods for fostering collaborative creativity and co-creative innovation practices. It also looks into newsrooms' attempts to strengthen their audience engagement, metrics performance and external collaborations with technology providers, journalism education and action researchers. With theoretical chapters, methodological insights and qualitative case studies of contemporary practices, this book is essential reading for students and practitioners involved with media management globally.

Evaluation and Development Robert Picciotto, 1998 This study illustrates the social and political principal that institutions matter. It explores not only how to get institutions to work efficiently, but also how to assess the proper relationship between institutions and development challenges through evaluative techniques.--Provided by publisher.

Strategic Management for Government Agencies Navin Girishankar, Migara De Silva, 1998 World Bank Discussion Paper No. 386. This paper presents a conceptual framework for the strategic management of government agencies in developing and transition economies. It delineates a working model of an efficient government agency for which core strategy, internal organizational design, and external environment are aligned. It then demonstrates how the objectives of public sector management are ideally based on assessments of areas of misalignment in government agencies.

Social Enterprise Sutia Kim Alter, 2003-08-11 The purpose of this publication is to distill the concepts, trends, and best practices in social enterprise development developed through case studies into models and guidelines for building new partnerships that will revolutionize the field in the decade to come. It explores the dynamics of an entirely new institutional entity, the social enterprise, and the role it is playing in the development of Latin America. It explores how institutions have combined a mix of social values and goals with commercial business practices and how they have come up with ownership models, income and capitalization strategies, and unique management and service systems designed to maximize social value. The logical framework and case studies within the monograph provide an opportunity to develop an illustrative typology with models.

Management of International Institutions and NGOs Eduardo Missoni, Daniele Alesani, 2013-12-17 International Institutions (IIs), International NGOs (INGOs) and Transnational Hybrid Organizations (THOs) play a hugely important

role in the modern world economy. Despite having been studied by scholars from a range of disciplines, these organizations have never before been approached from a management perspective. This ambitious book analyzes the management challenges associated with international cooperation and sheds light on how these organizations have evolved as the political, economic and business environments have changed around them. Covering an admirably broad canvas, the authors pursue two main objectives. Firstly, they explore the main management frameworks developed in the context of the corporate and national public/non-profit organizations and adapt them to the specificity of IIs and INGOs. This leads to the identification of a tailored approach to IO management based on their institutional and operational settings, stakeholder groups, core business, staff profile, and financial arrangements. Secondly, they bring theory into practice by linking frameworks to several case studies and best practices of organizations currently experimenting with management systems and tools, with case studies including the World Bank and the Gates Foundation. This comprehensive textbook is a must-own resource for students and academics involved with studying and working with international organizations.
