Acetylene is of interest to fire underwriters because of its growing popularity as an illuminant and means of destruction. It gives. A clear white light by which even an illiterate man can readily dis cern the printed page and an uncultured man can catch an occa sional scintillation from the lines of Browning and as a means of destruction it is doing very nicely considering Its youth and inex perience. 3. Underwriters are attempting to regulate the style of capsule in which this essence of earthquake and volcanic eruption shall be confined and devices which have run the gauntlet of their criticism are known as approved. 4. *A Plan for a Single-Payer Health Care System* Charles Chen,2008-02 Approximately fifty million people in the United States have no health insurance. Dr. Charles Chen, an obstetrician and gynecologist for almost thirty years, agrees with many people in this country that health insurance should cover every citizen, not just those who can afford to pay the rates. A Plan for a Single Payer Health Care System takes an in-depth look at every aspect of our current health care system and provides a strategic plan, along with innovative solutions for reforming the system. In an easy-to-understand format, Dr. Chen provides clear definitions and the pros and cons of utilizing three potential health care systems. Dr. Chen presents the results from his research on several international health care systems and then proposes the best solution for America. He recommends several concrete ideas, including establishing a Department of the National Health Care System, requesting the support of large corporations who pay high medical premiums for employees, and allowing uninsured citizens to purchase a low-cost health plan from the government. The ability to receive medical treatment should be a basic human right. Dr. Chen's plan for improvement helps shine a bright light on a situation that has quickly become critical for this country. His plan will ultimately help ensure that all citizens have access to health insurance. Life Insurance 10X Valmark Financial Group,2017-09-27 The life insurance industry is on the precipice of a major shift. Just as Uber brought disruption to public car service, a consumer-focused approach is underway to replace the sales-oriented process we know today. Life insurance is the last product in the financial world that needs to come to consumers on their own terms. It drastically calls out for transformation that is built around the customer, not legacy systems of various life insurance companies, arcane paper-based processing, and data that is stale. In *Life Insurance 10X* we hear from 14 foremost professionals who are helping to usher in that change. Here they share specific processes and tools to make the end-to-end experience ten times better (10X) as policyholders search for, obtain and preserve a life insurance policy to safeguard their future and their wealth. An easy read for anyone outside the industry, it shines a light on what to look for (and look out for) yet is packed with real-life examples and specific recommendations to shepherd life insurance into the 21st century.
