The Central Intelligence Agency Arthur B. Darling,Bruce D. Berkowitz,Allan E. Goodman,2007-06-05 This unique history offers the most detailed and best documented account of the early years of the CIA currently available. It reveals the political and bureaucratic struggles that accompanied the creation of the modern U. S. intelligence community. In addition, it proposes a theory of effective intelligence organization, applied both to the movement to create the CIA and to the form it eventually took. The period covered by this study was crucially important because it was during this time that the main battles over the establishment, responsibilities, and turf of the agency were fought. Many of these disputes framed the forty years, such as the relationship of the CIA to other government agency intelligence operations, the role of covert action, and Congressional oversight of the intelligence community. The sources upon which Darling drew for this study include the files of the National Security Council, the wartime files of the OSS, and interviews and correspondence with many of the principal players.

Introduction to Survey Quality Paul P. Biemer,Lars E. Lyberg,2003-05-27 Peruse the history of survey research and the essential concepts for data quality. With an emphasis on total survey error, the authors review principles and concepts in the field and examine important unresolved issues in survey methods. Spanning a range of topics dealing with the quality of data collected through the survey process, they focus on such key issues as: Major sources of survey error, examining the origins of each error source most successful methods for reducing errors from those sources Methods most often used in practice for evaluating the effects of the source on total survey error Implications of improving survey quality for organizational management and costs

General Walter Bedell Smith as Director of Central Intelligence, October 1950-February 1953 Ludwell Lee Montague,1992-08-01 This book continues the official history of the CIA begun in Arthur Darling's *The Central Intelligence Agency*. Ludwell Lee Montague's book is one of the first documents, along with Darling's history, to be declassified and made available under the CIA's Historical Review Program, launched in 1985. Montague was a leading government official who participated in the interdepartmental debate over the postwar organization of U.S. intelligence that occurred in 1945. He drafted many of the policies of the Joint Chiefs of Staff during this bureaucratic struggle, including JIC 239/5, the plan that was also the basis for the establishment of the Central Intelligence Group, the predecessor of the CIA. He served as General Smith's executive assistant when Smith was appointed Director of Central Intelligence in 1950. Montague contends that Smith is so important to the development of the intelligence community that the history of the community can legitimately be thought of as &pre-Smith and post-Smith.& The book focuses on the initiatives that Smith implemented in order to reform the U.S. intelligence community, which was under heavy criticism at the time for a series of intelligence failure. The reorganization of the intelligence community described here contains, with just a few exceptions, the predecessors of the major organizational components of today's CIA. This book serves as an important companion to Arthur Darling's book in that it provides both background material and Montague's opinion concerning how Darling's study came into existence. Most of this work survived the declassification process relatively intact to give us a detailed analysis of a critical period in the development of the intelligence community.
