Henry Vanderbilt Würdemann, Nelson Miles Black

**All about Color Blindness** Karen Rae Levine, 2013 Corey, a fourth-grader, explains how his color deficiency caused problems in kindergarten. Along the way Corey learns about the special way he sees colors. His color confusion is a physical condition that many people share. It has nothing to do with how smart he is and he doesn't let it get in his way. Corey's story is followed by a simple explanation of CVD--what it is, how many people have it, how they got it and the kind of problems it might cause. Find out about testing for CVD too. MOM'S CHOICE AWARD Next Generation Indie Book Award National Indie Excellence Book Award Endorsed by the nation's leading color vision experts: I'm happy to say that All About Color Blindness will give children and parents alike the information they need to understand the basics of color vision. - Dr. T.L. Waggoner, author of Color Vision Testing Made Easy [A]n easy to understand and scientifically correct introduction to the color vision world of kids with a color vision deficiency. Informative and useful for the kids themselves, and their parents, teachers and friends. -Michael S. Loop, Ph.D., U of Alabama School of Optometry Corey's insights are easy to read and very informative for color vision deficient children, as well as for their friends, parents and teachers who want to help. -Color Deficiency News, All About Vision

**Color Psychology in Treating Colour Blindness (Brain Mapping System)** Prof. N L Shraman, 2020-04-30 Person with colour deficiency can recognize all colours and read Ishihara Book. They can pass medical examinations of various services like police, defence, airforce, army. navy etc. Color psychology in Treating Colour Blindness and increasing colour perception is more than just one-sentence explanations of what each color represents. It's true that specific colors can influence the choices of individuals. Color can affect the brain's emotion sensors in many ways. It can call attention, inspire emotions, give assurance or tap into nostalgia. But the psychology of color is not that simple. A sentence like "yellow represents creativity and happiness" is not exactly color psychology—it's a generalized association. In reality, "yellow" can have different connotations depending on how it's used, what color it's placed next to and what tone of yellow it is. Yellow is not always happy and creative—sometimes, it's sickly and pale. The yellow in it is very strong—it catches your attention and makes you feel empowered. Combining this yellow with an image of a roaring lion makes an even stronger impact. To better understand why using the right colors is so important in content Treating Colour Blindness, it's best to first review the basics. Color psychology in Treating Colour Blindness is primarily based on how people feel about color, and that comes from how they experienced color as children and during the transition into adulthood.
