This book is a vital reference source for researchers, lecturers, professors, students,

and developers, who have interest in secure computing and recent advanced in real life applications.

Fan Fiction and Fan Communities in the Age of the Internet Kristina Busse, 2014-09-17 Fans have been responding to literary works since the days of Homer's *Odyssey* and Euripedes' *Medea*. More recently, a number of science fiction, fantasy, media, and game works have found devoted fan followings. The advent of the Internet has brought these groups from relatively limited, face-to-face enterprises to easily accessible global communities, within which fan texts proliferate and are widely read and even more widely commented upon. New interactions between readers and writers of fan texts are possible in these new virtual communities. From *Star Trek* to *Harry Potter*, the essays in this volume explore the world of fan fiction--its purposes, how it is created, how the fan experiences it. Grouped by subject matter, essays cover topics such as genre intersection, sexual relationships between characters, character construction through narrative, and the role of the beta reader in online communities. The work also discusses the terminology used by creators of fan artifacts and comments on the effects of technological advancements on fan communities. Instructors considering this book for use in a course may request an examination copy here.

Designing Embedded Internet Devices Dan

Eisenreich,Brian DeMuth,2003 Embedded internet and internet appliances are the focus of great attention in the computing industry, as they are seen as the future of computing. The design of such devices presents many technical challenges. This book is the first guide available that describes how to design internet access and

communications capabilities into embedded systems. It takes an integrated hardware/software approach using the Java programming language and industry-standard microcontrollers. Numerous illustrations and code examples enliven the text. This book shows how to build various sensors and control devices that connect to the TINI interfaces, explains how to write programs that control them in Java, and then ties them all together in practical applications. Included is a discussion on how these technologies work, where to get detailed specifications, and ideas for the reader to pursue beyond the book. The first guide to designing internet access and communications capabilities into embedded systems Takes an integrated hardware/software approach using the Java programming language an industry-standard

Electronic Government Marijn Janssen,Hans Jochen Scholl,Maria A. Wimmer,Yao-Hua Tan,2011-08-19 This book constitutes the refereed proceedings of the 10th International Conference, EGOV 2011, held in Delft, The Netherlands, in August/September 2011. Internet of Things: Novel Advances and Envisioned Applications D. P. Acharjya,M. Kalaiselvi Geetha,2017-04-19 This book focuses on a combination of theoretical advances in the Internet of Things, cloud computing and its real-

life applications to serve society. The book discusses technological innovations, authentication, mobility support and security, group rekeying schemes and a range of concrete applications. The Internet has restructured not only global interrelations, but also an unbelievable number of personal characteristics. Machines are increasingly able to control innumerable autonomous gadgets via the Internet, creating the Internet of Things, which facilitates intelligent communication between humans and things, and among things. The Internet of Things is an active area of current research, and technological advances have been supported by real-life applications to establish their soundness. The material in this book includes concepts, figures, graphs, and tables to guide researchers through the Internet of Things and its applications for society.

The Millennium Election Lynda Lee Kaid, 2003 The Millennium Election highlights some of the most important campaign communication from the 2000 elections, looking at candidates' political messages, the media's campaign coverage, the impact of the Internet, and the political socialization of young voters. The authors show that we still have much to learn about traditional candidate-voter interactions as well as new forms of political communication--and these forms must work together to engage a new generation of voters. Frontiers in New Media Research Francis L.F. Lee, Louis Leung, Jack Linchuan Qiu, Donna S.C. Chu, 2013-05-07 This volume puts together the works of a group of distinguished scholars and active researchers in the field of media and communication studies to reflect upon the past, present, and future of new media research. The chapters examine the implications of new media technologies on everyday life, existing social institutions, and the society at large at various levels of analysis. Macro-level analyses of changing techno-social formation – such as discussions of the rise of surveillance society and the fifth estate – are combined with studies on concrete and specific new media phenomena, such as the rise of Pro-Am collaboration and fan labor online. In the process, prominent concepts in the field of new media studies, such as social capital, displacement, and convergence, are critically examined, while new theoretical perspectives are proposed and explicated. Reflecting the inter-disciplinary nature of the field of new media studies and communication research in general, the chapters interrogate into the problematic through a range of theoretical and methodological approaches. The book should offer students and researchers who are interested in the social impact of new media both critical reviews of the existing literature and inspirations for

developing new research questions.
