**Cultural Astronomy In Latin America** Steven Gullberg,Cesar Augusto Zen Vasconcellos,2024-02-06 This book provides a unique view of Astronomy in Culture, Archaeoastronomy and Ethnoastronomy involving ancient civilizations in Latin America, emphasizing scientific and cultural knowledge combined with historical, cognitive, archaeological and anthropological aspects. Topics covered in the book include different associations of ancient civilizations with the stars and planets, whether in farming, architecture, social organization, beliefs, myths, religion, metric systems, calendar construction, shrines, and variations in astronomical research methods based on the types of material evidence available. Special attention is paid to the war cycles associated with observed celestial events, day-counting calendars, including movements in the sky and written evidences from codices, and in particular the Andean and Inca traditions of astronomically associated shrines, caves and celestial alignments of monuments and temples.

*Advancing Cultural Astronomy* Efrosyni Boutsikas,Stephen C. McCluskey,John Steele,2021-04-08 This collection of essays on cultural astronomy celebrates

the life and work of Clive Ruggles, Emeritus Professor of Archaeoastronomy at Leicester University. Taking their lead from Ruggles' work, the papers present new research focused on three core themes in cultural astronomy: methodology, case studies, and heritage. Through this framework, they show how the study of cultural astronomy has evolved over time and share new ideas to continue advancing the field. Ruggles' work in these areas has had a profound impact on the way that scholars approach evidence of the role of sky in both ancient and modern cultures. While the papers span many time periods and regions, they are closely connected by these three major themes, presenting methodological investigations of how we can approach archaeological, textual, and ethnographic evidence; describing detailed archaeoastronomical case studies; or stressing the importance of global heritage management. This work will appeal to researchers and scholars interested in the history and development of cultural astronomy.
