The Inventor Says Kevin Lippert, 2017-10-17 The sixth in our popular Words of Wisdom series, *The Inventor Says* invites readers to a gathering of history's most brilliant creative minds, where inventors past and present jostle, compete, contradict, and compliment each other. Groundbreakers such as Leonardo da Vinci, Benjamin Franklin, Henry Ford, Ada Lovelace, the Wright Brothers, and Sejong the Great converse with the twentieth century's most ingenious tinkerers and thinkers, from Buckminster Fuller, Ruth Handler (creator of the Barbie doll), Nikola Tesla (who cuts Thomas Edison down to size for his lack of scientific discipline), and Apple's Steve Wozniak to contemporary figures like Lisa Seacat DeLuca, IBM's most prolific female inventor. These intrepid innovators discuss their childhood, inspirations, working habits, failure as a productive stage in the creative process, and much more, in a collection that will inspire readers to hatch a few brilliant ideas of their own. As Edwin Land advised: Don't undertake a project unless it is manifestly important and nearly impossible.

The Quotable Edison offers a wealth of his insightful, enlightening, and sometimes humorous comments and witticisms on a wide range of subjects, from business to politics, from religion to nutrition, from advice to boys to opinions on women's clothing.

My Inventions Nikola Tesla, 2024-01-30 The investors showed little interest in Tesla's ideas for new types of motors and electrical transmission equipment and also seemed to think it was better to develop an electrical utility than invent new systems. They eventually forced Tesla out leaving him penniless. He even lost control of the patents he had generated since he had assigned them to the company in lieu of stock. He had to work at various electrical repair jobs and even as a ditch digger for \$2 per day. Tesla considered the winter of 1886/1887 as a time of terrible headaches and bitter tears. During this time, he questioned the value of his education. Chapter 1 My Early Life: The progressive development of man is vitally dependent on invention. It is the most important product of his creative brain. Its ultimate purpose is the complete mastery of mind over the material world, the harnessing of the forces of nature to human needs. This is the difficult task of the inventor who is often misunderstood and unrewarded. But he finds ample compensation in the pleasing exercises of his powers and in the knowledge of being one of that exceptionally privileged class without whom the race would have long ago perished in the bitter struggle against pitiless elements. Speaking for myself, I have already had more than my full measure of this exquisite enjoyment, so much that for many years my life was little short of continuous rapture. I am credited with being one of the hardest workers and perhaps I am, if thought is the equivalent of labor, for I have devoted to it almost all of my waking hours. But if work is interpreted to be a definite performance in a specified time according to a rigid rule, then I may be the worst of idlers. Every effort under compulsion demands a sacrifice of life-energy. I never paid such a price. On the contrary, I have thrived on my thoughts. In

attempting to give a connected and faithful account of my activities in this series of articles which will be presented with the assistance of the Editors of the Electrical Experimenter and are chiefly addressed to our young men readers, I must dwell, however reluctantly, on the impressions of my youth and the circumstances and events which have been instrumental in determining my career. Our first endeavors are purely instinctive, promptings of an imagination vivid and undisciplined. As we grow older reason asserts itself and we become more and more systematic and designing. But those early impulses, although not immediately productive, are of the greatest moment and may shape our very destinies. Indeed, I feel now that had I understood and cultivated instead of suppressing them, I would have added substantial value to my bequest to the world. But not until I had attained manhood did I realize that I was an inventor..

My Inventions Nikola Tesla, 2019-01-31 The progressive development of man is vitally dependent on invention. Visionary, pioneer, and eccentric genius, Nikola Tesla was the quintessential scientist of the late 19th and early 20th centuries. Two of his creations, the induction motor and the Tesla coil, underpin the technology of the modern world. First published as six articles in the Electrical Experimenter magazine, *My Inventions* tells the story of Tesla's life, from his humble beginnings in Croatia to his migration to the United States, and describes his revolutionary feats of invention and pivotal breakthroughs in the world of engineering. This book takes you on an inspirational journey into one of the world's greatest and most unconventional minds.

So Said Ben ,2007-09 Profiles Benjamin Franklin who was an inventor, scientist, printer, and statesman.
