**Inventor Confidential** Warren Tuttle,2021-03-23 The road to licensing a profitable, innovative product or technology is riddled with curves, holes, and rocky cliffs. The President of the United Inventors Association shows inventors, innovators, and makers a better path towards monetizing your creations and how to avoid the get-rich-quick scammers. Every year, hundreds of thousands of eager inventors around the globe spend millions of dollars seeking assistance from inventor service companies and individuals claiming to be experts in the innovation and licensing fields, though their actual success rates are poor in relation to the dollar amounts they charge. The reality is, according to *Inventors' Digest™*, while 78% of new inventors believe they will make over a million dollars with their inventions, less than 1% actually do. Marketers prey on this scenario for their own financial gain. In *Inventor Confidential*, inventor advocate Warren Tuttle tips the odds back in the investor's favor, helping them: Gain a much broader picture of the many current challenges that inventors face these days. Understand the red flags to watch out for when individuals or companies charge up front for their coaching or help-to-market services. See how inventors can improve their odds of licensing success by following a thorough product development protocol, creating working prototypes, and filing U.S. patents. Get the insider perspective on how companies determine the quality of a product submission and if they want to work with the inventor. Learn the 30 steps to market if you want to go it alone. For anyone who has a great idea or invention and wants to monetize it but are not sure who to trust, *Inventor Confidential* will show them where to best spend their hard-earned money to maximize their odds for success.

Gertner's book offers fascinating evidence for those seeking to understand how a society should best invest its research resources." —The Wall Street Journal From its beginnings in the 1920s until its demise in the 1980s, Bell Labs-officially, the research and development wing of AT&T-was the biggest, and arguably the best, laboratory for new ideas in the world. From the transistor to the laser, from digital communications to cellular telephony, it's hard to find an aspect of modern life that hasn't been touched by Bell Labs. In The Idea Factory, Jon Gertner traces the origins of some of the twentieth century's most important inventions and delivers a riveting and heretofore untold chapter of American history. At its heart this is a story about the life and work of a small group of brilliant and eccentric men-Mervin Kelly, Bill Shockley, Claude Shannon, John Pierce, and Bill Baker-who spent their careers at Bell Labs. Today, when the drive to invent has become a mantra, Bell Labs offers us a way to enrich our understanding of the challenges and solutions to technological innovation. Here, after all, was where the foundational ideas on the management of innovation were born.
