Regulation of Intracellular Ca2-release Channels by Ca2+ and Ca2+-binding Proteins Nael Nadif Kasri,2004 This is a Ph.D. dissertation. Almost everything we do is controlled by Ca2+, how we move, how our hearts beat and how our brains process information and store memories. Ca2+ is indeed a ubiquitous second messenger involved in a diversity of cellular activities such as muscular contraction, neurotransmitter release, synaptic plasticity, gene transcription, cell proliferation and apoptosis. The average cytosolic concentration of Ca2+ in resting cells ranges from 50nM to 100nM, reaching values close to 1uM when the cell is stimulated by a variety of physiological stimuli, while in the extracellular milieu this concentration is about 1mM. This large concentration gradient allows intracellular Ca2+ to work as a useful second messenger. Contents include: General Introduction, Objectives, Results, General Discussion, Summary.

Intelligent Network Video ,2008-09-10 Offering ready access to the security industry’s cutting-edge digital future, Intelligent Network Video provides the first complete reference for all those involved with developing, implementing, and maintaining the latest surveillance systems. Pioneering expert Fredrik Nilsson explains how IP-based video surveillance systems provide better image quality, and a more scalable and flexible system at lower cost. A complete and practical reference for all those in the field, this volume: Describes all components relevant to modern IP video surveillance systems Provides in-depth information about image, audio, networking, and compression technologies Discusses intelligent video architectures and applications Offers a comprehensive checklist for those designing a network video system, as well as a systems design tool on DVD Nilsson guides readers through a well-organized tour of the building blocks of modern video surveillance systems, including network cameras, video encoders, storage, servers, sensors, and video management. From there, he explains intelligent video, looking at the architectures and typical applications associated with this exciting technology. Taking a hands-on approach that meets the needs of those working in the industry, this timely volume, illustrated with more than 300 color photos, supplies readers with a deeper understanding of how surveillance technology has developed and, through application, demonstrates why its future is all about intelligent network video.

The Advent of Unmanned Electric Vehicles S. Van Themsche,2015-08-29 Explaining in detail how new e-mobility technologies work, and the system requirements which must be fulfilled for these new technologies to be implemented, this book augments this analysis with discussion of the business models, financing and social and economic conditions that will foster the emergence of a new e-mobility industry. New e-mobility technologies and business models will initiate changes in work patterns and in our personal choices on transportation means. This book looks at how smart cities may apply the “internet of things” to the transportation environment and how this may create a complete set of new technologies and service offerings that will enable the advent of the unmanned vehicle society. This e-mobility revolution will disrupt the transport market and bring opportunities and threats for many potential actors. These consequences are analysed within. This book is suitable for anyone interested in the e-mobility revolution and its impact on the future of cars, buses and trains.

Proceedings of 6th International Conference in Software Engineering for Defence Applications Paolo Ciancarini,Manuel Mazzara,Angelo Messina,Alberto Sillitti,Giancarlo Succi,2019-03-18 This book presents high-

quality original contributions on new software engineering models, approaches, methods, and tools and their evaluation in the context of defence and security applications. In addition, important business and economic aspects are discussed, with a particular focus on cost/benefit analysis, new business models, organizational evolution, and business intelligence systems. The contents are based on presentations delivered at SEDA 2018, the 6th International Conference in Software Engineering for Defence Applications, which was held in Rome, Italy, in June 2018. This conference series represents a targeted response to the growing need for research that reports and debates the practical implications of software engineering within the defence environment and also for software performance evaluation in real settings through controlled experiments as well as case and field studies. The book will appeal to all with an interest in modeling, managing, and implementing defence-related software development products and processes in a structured and supportable way.

Look for Me and I'll Be Gone John Edgar Wideman,2022-11-22 *A Wall Street Journal Top 10 Best Book of the Year* From John Edgar Wideman, a modern “master of language” (The New York Times Book Review), comes a stunning story collection that spans a range of topics from Michael Jordan to Emmett Till, from childhood memories to the final day in a prison cell. In Look For Me and I'll Be Gone, his sixth collection of stories, John Edgar Wideman imbues with energy and life the concerns that have consistently infused his fiction and nonfiction. How does it feel to grow up in America, a nation that—despite knowing better, despite its own laws, despite experiencing for hundreds of years the deadly perils and heartbreak of racial division—encourages (sometimes unwittingly, but often on purpose) its citizens to see themselves as colored or white, as inferior or superior. Never content merely to tell a story, Wideman seeks once again to create language that delivers passages like jazz solos, and virtuosic manipulations of time to entangle past and present. The story “Separation” begins with a boy afraid to stand alone beside his grandfather’s coffin, then wends its way back and forth from Pittsburgh to ancient Sumer. “Atlanta Murders” starts with two chickens crossing a road and becomes a dark riff, contemplating “Evidence of Things Not Seen,” James Baldwin’s report on the 1979-1981 child murders in Atlanta, Georgia. Comprised of fictions of the highest caliber and relevancy by a writer whose imagination and intellect “prove his continued vitality...with vigor and soul” (Entertainment Weekly), Look For Me and I'll Be Gone will entrance and surprise committed Wideman fans and newcomers alike.

Low-Current Systems Engineer’s Technical Handbook Habbieb T. Mansour,2016-03-02 It’s finally arrived: A book for engineers written by an engineer—and one that focuses on low-current systems. Habbieb T. Mansour, who has designed, built, and reviewed designs for hundreds of engineering projects, explores the design and construction of modern buildings in this guide that will help you: check on the quantity and quality of what is to be delivered before design documents go out for tendering; unify the design packages of various engineers within an organization; personalize the design of systems while complying with local and international codes and client requirements; and ask for or perform the tests that will ensure systems meet your expectations. This step-by-step methodology manual is precise and direct to the point, and it includes an appendix, photos and illustrations, and charts. Checklist templates at the end of each chapter help you check an engineer’s work. Whether you are a low-current engineer, information and communication technology engineer, electrical engineer, building service engineer, project manager, facility manager or engineering student, you’ll be equipped to learn and do your job with the Low- Current Systems Engineer’s Technical Handbook.

Practical IoT Hacking Fotios Chantzis,Ioannis Stais,Paulino Calderon,Evangelos Deirmentzoglou,Beau Woods,2021-03-23 The definitive guide to hacking the world of the Internet of Things (IoT) -- Internet connected devices such as medical devices, home assistants, smart home appliances and more. Drawing from the real-life exploits of five highly regarded IoT security researchers, Practical IoT Hacking teaches you how to test IoT systems, devices, and protocols to mitigate risk. The book begins by walking you through common threats and a threat modeling framework. You’ll develop a security testing methodology, discover the art of passive reconnaissance, and assess security on all layers of an IoT system. Next, you’ll perform VLAN hopping, crack MQTT authentication, abuse UPnP, develop an mDNS poisoner, and craft WS-Discovery attacks. You’ll tackle both hardware hacking and radio hacking, with in-depth coverage of attacks against embedded IoT devices and RFID systems. You’ll also learn how to:

- Write a DICOM service scanner as an NSE module
- Hack a microcontroller through the UART and SWD interfaces
- Reverse engineer firmware and analyze mobile companion apps
- Develop an NFC fuzzer using Proxmark3
- Hack a smart home by jamming wireless alarms, playing back IP camera feeds, and controlling a smart treadmill

The tools and devices you’ll use are affordable and readily available, so you can easily practice what you learn. Whether you’re a security researcher, IT team member, or hacking hobbyist, you’ll find Practical IoT Hacking indispensable in your efforts to hack all the things

CCTV Surveillance Herman Kruegle,2011-03-15 This revision of the classic book on CCTV technology, CCTV Surveillance, provides a comprehensive examination of CCTV, covering the applications of various systems, how to design and install a system, and how to choose the right hardware. Taking into account the ever-changing advances in technology using digital techniques and the Internet, CCTV Surveillance, Second Edition, is completely updated with the recent advancements in digital cameras and digital recorders, remote monitoring via the Internet, and CCTV integration with other security systems. Continuing in the celebrated tradition of the first edition, the second edition is written to serve as a useful resource for the end-user as well as the technical practitioner. Each chapter begins with an overview, and presents the latest information on

the relevant equipment, describing the characteristics, features and application of each device. Coverage of aging or obsolete technology is reduced to a historical perspective, and eight brand new chapters cover digital video technology, multiplexers, integrated camera-lens-housing, smart domes, and rapid deployment CCTV systems. Serves as an indispensable resource on CCTV theory Includes eight new chapters on the use of digital components and other related technologies that have seen a recent explosion in use Fully illustrated, the book contains completely updated photographs and diagrams that represent the latest in CCTV technology advancements

Symmetry-Adapted Machine Learning for Information Security James (Jong Hyuk) Park,2020-12-15 Symmetry-adapted machine learning has shown encouraging ability to mitigate the security risks in information and communication technology (ICT) systems. It is a subset of artificial intelligence (AI) that relies on the principles of processing future events by learning past events or historical data. The autonomous nature of symmetry-adapted machine learning supports effective data processing and analysis for security detection in ICT systems without the interference of human authorities. Many industries are developing machine-learning-adapted solutions to support security for smart hardware, distributed computing, and the cloud. In our Special Issue book, we focus on the deployment of symmetry-adapted machine learning for information security in various application areas. This security approach can support effective methods to handle the dynamic nature of security attacks by extraction and analysis of data to identify hidden patterns of data. The main topics of this Issue include malware classification, an intrusion detection system, image watermarking, color image watermarking, battlefield target aggregation behavior recognition model, IP camera, Internet of Things (IoT) security, service function chain, indoor positioning system, and crypto-analysis.
