Blue Ocean Leadership (Harvard Business Review Classics) W. Chan Kim,Renée A. Mauborgne,2017-05-30 Ten years ago, world-renowned professors W. Chan Kim and Renee Mauborgne broke ground by introducing blue ocean strategy, a new model for discovering uncontested markets that are ripe for growth. In this bound version of their bestselling Harvard Business Review classic article, they apply their concepts and tools to what is perhaps the greatest challenge of leadership: closing the gulf between the potential and the realized talent and energy of employees. Research indicates that this gulf is vast: According to Gallup, 70% of workers are disengaged from their jobs. If companies could find a way to convert them into engaged employees, the results could be transformative. The trouble is, managers lack a clear understanding of what changes they could make to bring out the best in everyone. In this article, Kim and Mauborgne offer a solution to that problem: a systematic approach to uncovering, at each level of the organization, which leadership acts and activities will inspire employees to give their all, and a process for getting managers throughout the company to start doing them. Blue ocean leadership works because the managers' customers--that is, the people managers oversee and report to--are involved in identifying what's effective and what isn't. Moreover, the approach doesn't require leaders to alter who they are, just to undertake a different set of tasks. And that kind of change is much easier to implement and track than changes to values and mind-sets. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world--and will have a direct impact on you today and for years to come.

England, 1867: As half of the writing duo behind England's most infamous crime column, Miss Caroline Hardcastle has quite the scandalous reputation. It may have cost her a fiancé, but she would much rather bring attention to crimes against those ignored by society than worry about what the ton thinks of her. After Caro's dear friend is kidnapped, however, she has no choice but to work with Lord Valentine Thorn, the same man who broke her heart. Worse, when her actions put her father's business at risk, a marriage of convenience may be her only solution . . . but can she trust Val to stand by her? Or will their past repeat itself? Val—the new Viscount Wrackham—is in an untenable position: His father is demanding he find a respectable bride to secure the succession. Yet the only woman he's ever loved, Miss Caroline Hardcastle, is notorious for behaving improperly. And she's never forgiven him for his youthful transgressions, missteps made in the name of familial duty, but ones he still regrets to this day. As they grow closer to unmasking the culprit, Val sees an opportunity to show Caro he's a changed man. But can he convince her to give their love a second chance—before death does them part?

Blue Skin of the Sea Graham Salisbury,2008-12-24 Eleven interlinked stories tell the tale of a boy coming of age in Kailua-Kona, a Hawaiian fishing village. Sonny Mendoza is a little different from the rest of the men in his family. Salisbury explores characters like Aunty Pearl, a full-blooded Hawaiian as regal as the queens of old; cool Jack, from L.A., who starts a gang and dares Sonny to be brave enough, cruel enough, to join; mysterious Melanie, who steals his heart; and Deeps, the shark hunter. But the most memorable character is the sea itself: inviting, unpredictable, deadly. Mendoza men are brave men, but Sonny's courage is of a different kind. Why can't he love and trust the water as the men of his family are meant to do?

Mothering a Bodied Curriculum Stephanie Springgay,Debra Freedman,2012-01-01 This collection considers how embodiment, mothering, and curriculum theory are related to practices in education that silence, conceal, and limit gendered, raced, and sexual maternal bodies. Advancing a new understanding of the maternal body, it argues for a 'bodied curriculum' — a practice that attends to the relational, social, and ethical implications of 'being-with' other bodies differently, and to the different knowledges such bodily encounters produce. Contributors argue that the prevailing silence about the maternal body in educational scholarship reinforces the binary split between domestic and public spaces, family life and work, one's own children and others' children, and women's roles as 'mothers' or 'others.' Providing an interdisciplinary perspective in which postmodern ideas about the body interact with those of learning and teaching, Mothering a Bodied Curriculum brings theory and practice together into an ever-evolving conversation.

This book fills that information gap as the first work that summarizes the state-of-the-art methods and instruments used for surface, subsurface, and abyssal ocean current measurements. Readers of this book will find a wealth of information on Lagrangian measurements, horizontal mapping, imaging, Eulerian measurements, and vertical profiling techniques. In addition, the book describes modern technologies for remote measurement of ocean currents and their signatures, including HF Doppler radar systems, satellite-borne sensors, ocean acoustic tomography, and more. Crucial aspects of ocean currents are described in detail as well, including dispersion of effluents discharged into the sea and transport of beneficial materials—as well as environmentally hazardous materials—from one region to another. The book highlights several important practical applications, showing how measurements relate to climate change and pollution levels, how they affect coastal and offshore engineering activities, and how they can aid in tsunami detection. Plastic Ocean Charles Moore,2011-10-27 The researcher who discovered the Great Pacific Garbage Patch--and remains one of today's key advocates for plastic pollution awareness--inspires a fundamental rethinking of the modern Plastic Age. In 1997, environmentalist Charles Moore discovered the world's largest collection of floating trash--the Great Pacific Garbage Patch (GPGP)--while sailing from Hawaii to California. Moore was shocked by the level of pollution that he saw. And in the last 20 years, it's only gotten worse--a 2018 study has found that the vast dump of plastic waste swirling in the Pacific Ocean is now bigger than France, Germany, and Spain combined--far larger than previously feared. In Plastic Ocean, Moore recounts his ominous findings and unveils the secret life of plastics. From milk jugs and abandoned fishing gear to polymer molecules small enough to penetrate human skin and be unknowingly inhaled, plastic is now suspected of contributing to a host of ailments, including infertility, autism, thyroid dysfunction, and certain cancers. An urgent call to action, Plastic Ocean's sobering revelations have been embraced by activists, concerned parents, and anyone alarmed by the deadly impact and implications of this man-made environmental catastrophe.

More Than This Patrick Ness,2013-09-10 From two-time Carnegie Medal winner Patrick Ness comes an enthralling and provocative new novel chronicling the life -- or perhaps afterlife -- of a teen trapped in a crumbling, abandoned world. A boy named Seth drowns, desperate and alone in his final moments, losing his life as the pounding sea claims him. But then he wakes. He is naked, thirsty, starving. But alive. How is that possible? He remembers dying, his bones breaking, his skull dashed upon the rocks. So how is he here? And where is this place? It looks like the suburban English town where he lived as a child, before an unthinkable tragedy happened and his family moved to America. But the neighborhood around his old house is overgrown, covered in dust, and completely abandoned. What's going on? And why is it that whenever he closes his eyes, he falls prey to vivid, agonizing memories that seem more real than the world around him? Seth begins a search for answers, hoping that he might not be alone, that this might not be the hell he fears it to be, that there might be more than just this. . . .
