Axial and Radial Magnetic Fields of Thick, Finite-length Solenoids Gerald V. Brown,1963 The axial and radial components of the magnetic field intensity of thick, finite-length solenoids were derived, and numerical results were computed for several combinations of coil thickness and length for two different current-density distributions. The triple integrals giving the field values were integrated twice analytically; the third integration was done numerically on electronic computers. The data are presented in tables and sample graphs.
