Mathematics and Sports Joseph A. Gallian, 2010 This is an eclectic compendium of the essays solicited for the 2010 Mathematics Awareness Month Web page on the theme of 'Mathematics and Sports'. In keeping with the goal of promoting mathematics awareness to a broad audience, all of the articles are accessible to university-level mathematics students and many are accessible to the general public. The book is divided into sections by the kind of sports. The section on American football includes an article that evaluates a method for reducing the advantage of the winner to a coin flip in an NFL overtime game; the section on track and field examines the ultimate limit on how fast a human can run 100 metres; the section on baseball includes an article on the likelihood of streaks; the section on golf has an article that describes the double-pendulum model of a golf swing and an article on modelling Tiger Woods' career.

Dialectical Societies David Maybury-Lewis, Edward C Henderson Professor of Anthropology David Maybury-Lewis, 2013-10-01 The Gê-speaking tribes of Central Brazil have always been an anomaly in the annals of anthropology; their exceedingly simple technology contrasts sharply with their highly complex sociological and ideological traditions. Dialectical Societies, the outgrowth of extended anthropological research organized by David Maybury-Lewis, at long last demystifies Gê social structure while modifying and reinterpreting some of the traditional

ideas held about kinship, affiliation, and descent. Each of the seven contributors deals with a different lowland tribe, but all of them address an ideological focus on the dualistic tribal organization that is here defined as fundamental to the Gê As a collection, their work comprises a substantial revision of the hitherto undeveloped and largely ignored ethnography of Central Brazil.

**Gymnastics** Leonid Arkaev, Nikolai Suchilin, Nikolai G. Suchilin, 2004 This book answers in detail the many unanswered questions relating to high performance. Written by the world's leading gymnastics coach and his scientific advisor it explains the essential components for planning and preparation for high level results.

**Fluorine Chemistry at the Millennium** R.E. Banks, 2000-12-04 This volume brings together contributions by leading researchers covering a wide scope so characteristic of fluorine chemistry. It is a monograph of historical character comprising personalized accounts of progress and events in areas of particular interest. There is also much to interest and instruct chemists from other disciplines as a good proportion of the chapters contain a considerable amount of 'hard' referenced information relating to modern organic, organoelemental and inorganic chemistry. Historians of chemistry and technology will no doubt be tempted to dip into this book, and surely whoever addresses the task of commemorating Moissan's achievement at the 150-years stage will bless us all in some measure for its existence.

**Fungi and Food Spoilage** John I. Pitt, A.D. Hocking, 2012-12-06 This book is designed as a laboratory guide for the food microbiologist, to assist in the isolation and identification of common food-borne fungi. We emphasise the fungi which cause food spoilage, but also devote space to the fungi commonly encountered in foods

at harvest, and in the food factory. As far as possible, we have kept the text simple, although the need for clarity in the descriptions has necessitated the use of some specialised mycological terms. The identification keys have been designed for use by microbiologists with little or no prior knowledge of mycology. For identification to genus level, they are based primarily on the cultural and physiological characteristics of fungi grown under a standardised set of conditions. The microscopic features of the various fungi become more important when identifying isolates at the species level. Nearly all of the species treated have been illustrated with colony photographs, together with photomicrographs or line drawings. The photomicrographs were taken using a Zeiss WL microscope fitted with Nomarski interference contrast optics. We are indebted to Mr W. Rushton and Ms L. Burton, who printed the many hundreds of photographs used to make up the figures in this book. We also wish to express our appreciation to Dr D.L. Hawksworth, Dr A.H.S.

**The Artificial Pancreas** Ricardo S. Sánchez-Peña, Daniel R. Cherňavsky, 2019-04-15 The Artificial Pancreas: Current Situation and Future Directions presents research on the top issues relating to the artificial pancreas (AP) and its application to diabetes. AP is a newer form of treatment to accurately and efficiently inject insulin, thereby significantly improving the patient's quality of life. By connecting a continuous glucose monitor (CGM) to a continuous subcutaneous insulin infusion using a control algorithm, AP delivers and regulates the most accurate amount of insulin to maintain normal glycemic values. Featured chapters in this book are written by world leaders in AP research, thus providing readers with the latest studies and results.

*Drunk Stoned Brilliant Dead* Rick Meyerowitz, 2019-03-15  
Reprints and reminiscences from the magazine's first decade: "Fun to flip through . . . Where would American humor be without the National Lampoon?"—The New Yorker From its first issue in April 1970, the National Lampoon blazed like a comet, defining comedy as we know it today. To create *Drunk Stoned Brilliant Dead*, former Lampoon illustrator Rick Meyerowitz selected the funniest material from the magazine and sought out the survivors of its first electrifying decade to gather their most revealing and outrageous stories. The result is a mind-boggling tour through the early days of an institution whose alumni left their fingerprints all over popular culture: Animal House, Caddyshack, Saturday Night Live, Ghostbusters, SCTV, Spinal Tap, In Living Color, Ren & Stimpy, The Simpsons—even Sesame Street counts a few Lampooners among its ranks. This is the story of a band of young talents who "irrevocably rewrote the landscape of American humor" (Publishers Weekly). "A vivid picture of a tight-knit family of twentysomething humorists at the dawn of their careers." —Newsweek The other night I started laughing so hard I had to leave the room . . . And then I realized that I hadn't laughed so hard in 35 years, since I was a teenager, reading National Lampoon." —The Wall

Street Journal “If you grew up with the Lampoon, this book is a trip down memory lane like no other; if not, it will demonstrate that the much maligned 70s could produce humor that has never been surpassed.” —Vanity Fair

### **Paul V. McNutt and the Age of FDR** Dean J.

Kotlowski, 2015-01-02 This “definitive biography of Indiana Gov. Paul V. McNutt” shows the politician’s “importance on the national stage through the Great Depression and WWII (Indianapolis Star). The 34th Governor of Indiana, head of the WWII Federal Security Agency, and ambassador to the Philippines, Paul V. McNutt was a major figure in mid-twentieth century American politics whose White House ambitions were effectively blocked by his friend and rival, Franklin Delano Roosevelt. This historical biography explores McNutt’s life, his era, and his relationship with FDR. McNutt’s life underscores the challenges and changes Americans faced during an age of economic depression, global conflict, and decolonialization. With extensive research and detail, biographer Dean J. Kotlowski sheds light on the expansion of executive power at the state level during the Great Depression, the theory and practice of liberalism as federal administrators understood it in the 1930s and 1940s, the mobilization of the American home front during World War II, and the internal dynamics of the Roosevelt and Truman administrations.
