The Webley Service Revolver Robert Maze,2012-08-20 The Webley .455in service revolver is among the most powerful top-break revolvers ever produced. First adopted in 1887, in various marques it was the standard-issue service pistol for British and Commonwealth armed forces for nearly fifty years; later versions in .38in calibre went on to see further service in World War II and beyond, as well as in a host of law-enforcement roles around the world into the 1970s. Developed to give British service personnel the ability to incapacitate their opponents in 'small wars' around the globe, the Webley used the formidable – and controversial – .455in cartridge, a variant of which was known as the 'manstopper'. Users found it offered good penetration and excellent stopping power with only mild recoil – indeed, it was rated superior to the US .45 Colt in stopping power. Featuring specially commissioned full-colour artwork and close-up photographs, this is the compelling story of the Webley revolver, the powerful pistol that saw service across the British Empire and throughout two world wars.

Munizioni Senza Bossolo Fouad Sabry,2022-12-02 Che cosa sono le munizioni senza bossolo Le munizioni senza bossolo, note anche come cartucce senza bossolo, sono un tipo di configurazione arma-cartuccia che elimina il bossolo. Il bossolo è il componente di una cartuccia per arma che è tipicamente responsabile di tenere insieme l'innesco, il propellente e il proiettile come una singola unità. Invece di utilizzare un bossolo, il propellente e l'innesco sono attaccati al proiettile in qualche altro modo, ad esempio all'interno o all'esterno del proiettile, a seconda della disposizione. Ciò elimina la necessità del bossolo. Military Handguns of Two World Wars John Walter,2003 In this companion volume to his Military Rifles of Two World Wars, renowned firearms expert John Walter examines in detail the handguns used by all nations that fought in WWII. He covers the full range from the Walther PPK, Luger and Smith and Wessons to the less well-known Turkish parabellum and Finish Lahti. At the end of the nineteenth century the supremacy of the revolver was being threatened by the semi-automatic pistol, the design that would predominate throughout two world wars and beyond. In this book John Walter provides detailed technical specifications and data for every gun manufactured, and gives a history of its development and use. Every entry is also accompanied by a photograph or technical drawing, and in some cases rare pictures of the guns in combat.
