The Orvis Guide to Fly Fishing for Carp Kirk Deeter, 2013 Carp are close, no matter where you are. Tantalizingly close. They will challenge you technically and test your patience, and make you question your fly fishing bona fides more than any other freshwater fish. And they get big. Really big. They'll put you into your backing fast. As Trout Unlimited's Chris Hunt says in his foreword, Enjoy the journey that comes with fly fishing for carp. And leave your 4-weight home. Sporting nicknames like the golden bonefish or the

grey ghost, carp are finally getting the attention from US flyrodders that they deserve. TROUT Magazine managing editor Kirk Deeter takes up the challenge from these non-native fish, examining their history, behavior, diet, and the challenges they pose for even the most accomplished fly fisherman. Covering everything from the approach, the presentation, how to effectively read both fish and water - even recipes for the best patterns to throw - Deeter introduces the most prolific freshwater gamefish to an US audience finally ready to stalk them.

A History of Carp Fishing Kevin Clifford, 1992

*Practical Carp Fishing* Julian Cundiff, 1993 Written in a down-to-earth style, this book covers everything the carp angler needs to know, from the fish itself and where to find it, through approaching a water, tackle, baits, snag fishing, striking, playing and netting, to photographing the catch.

**A Century of Carp Fishing** Chris Ball, Kevin Clifford, Tim Paisley, 2000

**Catch Carp and Tench** John Wilson, 2001 John Wilson is Britain's top angler and fishing writer, and the presenter of the Go Fishing television series. He brings his usual enthusiasm, energy, and experience to this indispensable guide to two of the most popular freshwater fish, providing all the advice and information you need to get more out of fishing.

Carp Jon Wood, 2012 Over the last few decades, carp fishing has grown from an elitist pursuit into one of the most popular branches of modern angling. Although techniques and baits have changed over the years, the same questions are at the forefront of the angler's mind: Where are the fish? What's happening under the water? What bait should I use? Jon Wood has taken the science out of Carp Fishing Science in order to answer these and other questions about location, feeding and bait. What we are left with is pure and simple carp fishing aimed at improving the angler's grasp of these three concepts that are key to successful carp fishing.

*Carp Fishing Science* Jon Woods, 2010-01 Carp anglers talk about watercraft all the time. But what exactly is that? Some would say it's applying understanding of the environment in which the carp lives and the fish itself to catch more of them. And how do we improve our watercraft? By studying how the behaviour of the carp changes as environmental variables fluctuate daily and seasonally. We can do this by spending time on the lake or river bank and by reading about it. Carp Fishing Science is unlike all other carp fishing books. It provides information which the angler can use in order to anticipate changes in the carp's behaviour, especially those related to nutrition and activity, therefore helping to improve the reader's watercraft. Jon Wood, marine biologist and experienced fish farm consultant, has written a book which looks at carp fishing from a very different point of view from all other publications; from that of the fish rather than the fisherman, which is really where it should be from. In Carp Fishing Science, he presents a distillation of more than two hundred scientific publications and has extracted the most valuable proven facts about the fish to allow the reader to know the animal in greater detail, modify strategies and put more fish on the bank. This book bridges a gap between that which has until now only been supposed and that which has been shown through scientific studies. The author delves into aspects of carp biology, fish physiology and environmental science in order to clarify some of the myths surrounding carp fishing and answers questions such as why and how carp feed, which substances have been shown to cause a positive feeding response to carp, how the fish uses each of

its senses and how the nutritional requirements of the carp change through the year. If you are a carp angler, a carp producer, a bait maker, a fisheries student, or just someone who has always wanted to think like a fish, then this book should be in your collection.
