Do you say you want to spend less time on your phone—but have no idea how to do so without giving it up completely? If so, this book is your solution. Award-winning journalist Catherine Price presents a practical, hands-on plan to break up—and then make up—with your phone. The goal? A long-term relationship that actually feels good. Keep Your Android Phone Running All Day Steven Mann, 2011-06 One of the biggest complaints on all of these new fancy smart phones is that the battery gets drained very quickly. I noticed this from day one with my recent Android phone purchase. However, after a day of tweaking every single possible setting to conserve power without losing performance or functionality, I can now run my Android phone for over 24 hours before needing a charge. I was able to tweak my phone and make a huge difference. Some settings are very obvious while other tricks, tips, and settings may not be. I thought that a guide book like this would help others and provide people with some things to think about or change in order to preserve battery life and enjoy their phone experience - without having to run for a charger.

Make Time Jake Knapp, John Zeratsky, 2018-09-25 From the New York Times bestselling authors of *Sprint* comes “a unique and engaging read about a proven habit framework [that] readers can apply to each day” (Insider, Best Books to Form New Habits). “If you want to achieve more (without going nuts), read this book.”—Charles Duhigg, author of *The Power of Habit* Nobody ever looked at an empty calendar and said, The best way to spend this time is by cramming it full of meetings! or got to work in the morning and thought, Today I'll spend hours on Facebook! Yet that's exactly what we do. Why? In a world where information refreshes endlessly and the workday feels like a race to react to other people's priorities faster, frazzled and distracted has become our default position. But what if the exhaustion of constant busyness wasn't mandatory? What if you could step off the hamster wheel and start taking control of your time and attention? That's what this book is about. As creators of Google Ventures' renowned design sprint, Jake and John have helped hundreds of teams solve important problems by changing how they work. Building on the success of these sprints and their experience designing ubiquitous tech products from Gmail to YouTube, they spent years experimenting with their own habits and routines, looking for ways to help people optimize their energy, focus, and time. Now they've packaged the most effective tactics into a four-step daily framework that anyone can use to systematically design their days. *Make Time* is not a one-size-fits-all formula. Instead, it offers a customizable menu of bite-size tips and strategies that can be tailored to individual habits and lifestyles. *Make Time* isn't about productivity, or checking off more to-dos. Nor does it propose unrealistic solutions like throwing out your smartphone or swearing off social media. Making time isn't about radically overhauling your lifestyle; it's about making small shifts in your environment to liberate yourself from constant busyness and distraction. A must-read for anyone who has ever thought, If only there were more hours in the day..., *Make Time* will help you stop passively

reacting to the demands of the modern world and start intentionally making time for the things that matter.

When to Get My Kid a Phone Drew Hill, 2020-09-07 Determining when to get your child a smartphone is a complicated yet critical decision. Parents today are facing new challenges as technology and our children's access to it gives rise to new worries and concerns. Thoughtful parents wonder how to steward technology well and protect their children from potential pitfalls. When is the right time to give your child access to such powerful tools? Pastor and author Drew Hill encourages parents that instead of being controlled by fear and forbidding access to all electronic devices, moms and dads can use this question to propel them into deeper relationships with their children. As they navigate important questions of teaching responsibility and guarding against potential dangers, parents are invited to view phone usage as a gradual training process much like their child learning to drive a car. Ultimately, this journey of shepherding a child's personal phone usage is a picture of the overall goal of parenting—prayerfully preparing to one day release children into the adult world and trust that they have a good forever Father watching over them.
