The Art of Islamic Banking and Finance Yahia Abdul-Rahman, 2009-12-09 A detailed look at the fast-growing field of Islamic banking and finance The Art of Islamic Banking and Finance is a modern American take on what it means to incorporate Islamic finance principles into everyday banking and investment techniques by introducing a new brand of banking for all people of all faiths: The Riba-Free (RF) banking. The author is considered the father of RF (Islamic) banking in America. He has been a banker and an Imam/scholar for over 40 years in America since 1968. He started the tedious process with a finance company, LARIBA, in Pasadena, California in 1987. This is the first book ever in the field to trace the origins of prohibiting the renting of money at a price called interest rate and over-indulging in debt. The book reviews in great details the theological foundations of prohibiting interest in the Jewish Bible, the Christian Bible, and the Qur'aan. The author then discusses money and how fiat money is created, the role of the Federal Reserve, and the banking system in America. The book also discusses for the first time ever how to include an important aspect of RF (Islamic) finance using commodity indexation and marking the items to be financed to market in order to avoid participating in economic bubbles. The author discusses how these rules work, how they affect consumer behavior, and how they change the role of the banker/financier. Covers a new pioneering model that is based on the Law (Shari'aa) and how it is applied in every transaction from joint ventures and portfolio management to home mortgages and personal financing Shows how to incorporate the Law (Shari'aa) into American financing and banking systems Points to RF (Islamic) finance and banking as a way to emphasize socially responsible investing The Art of Islamic Banking and Finance also includes a discussion on the emergence of a culture of RF (Islamic) banking and finance today, which is based on the real Judeo-Christian-Islamic spirit and very effective when compared to twentieth-century models that use financial engineering and structuring techniques to circumvent the Law (Shari'aa). The book also includes case studies based on the actual experience of the author and detailed analysis of the superior results realized by applying this new brand of banking to financing.

The Art of RF (Riba-Free) Islamic Banking and Finance Yahia Abdul-Rahman, 2014-11-05 Updated and expanded insights into Islamic banking and finance From Yahia Abdul-Rahman-the father of Riba-Free (RF) banking-comes the expanded edition of the definitive resource that offers an understanding for applying Islamic banking and financial practices. No matter what your faith or religious beliefs, the book shows how to take a modern American approach to incorporating Islamic financial principles into banking and investment techniques. The Art of RF (Riba-Free) Islamic Banking and Finance describes the emergence of a culture of Islamic banking and finance today, which is based on the real Judeo-Christian-Islamic spirit and has proven very effective when compared to 20th century models that use financial engineering and structural techniques to circumvent the Shari'aa Law. The author also reveals information about how fiat money is created, the role of the Federal Reserve, and the US banking system. Abdul-Rahman includes a wealth of real-life examples and offers an analysis of how this new brand of banking and financing yields superior results. Offers the fundamentals on Riba-Free (RF) banking Shows how to apply RF to everything from joint ventures and portfolio management to home mortgages and personal finance Reveals what it takes to incorporate Shariah Law into US financial systems Includes information on why RF banking is a socially responsible way to invest Thoroughly revised and updated, this resource offers a handbook for applying Shari'aa law to American banking and finance.

Land, Law and Islam Hilary Lim, 2013-07-18 In this pioneering work Siraj Sait and Hilary Lim address Islamic property and land rights, drawing on a range of socio-historical, classical and contemporary resources. They address the significance of Islamic theories of property and Islamic land tenure regimes on the 'webs of tenure' prevalent in the Muslim societies. They consider the possibility of using Islamic legal and human rights systems for the development of inclusive, pro-poor approaches to land rights. They also focus on Muslim women's rights to property and inheritance systems. Engaging with institutions such as the Islamic endowment (waqf) and principles of Islamic microfinance, they test the workability of 'authentic' Islamic proposals. Located in human rights as well as Islamic debates, this study offers a well researched and constructive appraisal of property and land rights in the Muslim world.

A Worthy Muslim Amir Makin, 2008 Nearly 60% of Muslims born in America who choose to practice Islam are African Americans. Yet their understanding of using Islam in the struggle to overcome institutional racism and its many symptoms are rarely discussed. This book explains how oppressed communities can handle and overcome oppression by seriously examining the practice of true Islam. The author analyzes the difference between what is incorrectly perceived as Islam and the way of life called Al Islam while also detailing how different prophets implemented Quranic teachings when standing against injustice. Information is then used to examine real world situations of oppression that occur in today's climate with a particular emphasis on the disadvantaged and impoverished of American society from not only a socioeconomic standpoint, but a psychological and spiritual vantage as well. Does Islam obligate its adherents to confront racial supremacy? Why have some Muslim African Americans abandoned the fight for social justice? These topics and more are addressed here.

30 Rights of Muslim Women Daisy Khan, 2024-05-21 This authoritative "go-to" publication aims to educate women on how to express their rights within Islam. Perfect for enabling activists to integrate an egalitarian Islamic belief system into their movements. The most effective means of improving Muslim women's lives is connecting them to their deeply held beliefs that affirm human dignity and gender equality at the core of the Islamic faith. But Muslim women lack this information that enlightens and vouches for their sacred rights, and they have no accessible tools that encourage faith-based activism consistent with the Islamic faith. To protect them from being misrepresented by or outside their communities, there is a need to provide pre-packaged, easy-to-understand literacy tools to women so they can lead lives of choice, dignity, and opportunity. 30 Rights of Muslim Women aims to fill this gap.

Arab Media, 2005

Al-Shura Ahmad Al-Raysuni, 2011 Muslims remain largely unaware of the importance and value of the Qur'anic principle of al-Shura (mutual consultation) and the significant role it can play in the advancement and reform of Muslim society. In this work, the author attempts to introduce and examine key meanings and practices of al-Shura, trace its historical evolution, and explore ways in which the principle can be introduced, institutionalized and applied in Muslim societies. There is no doubt that al-Shura has been sidelined throughout the Muslim world and the reasons for this are both historically and politically complex. According to the author, although much has been written on the subject, in reality it has been at best ineffectively applied and at worst heedlessly ignored. Even today it is a hotly contested issue. As al-Shura is increasingly associated with democratic participation in

a decision-making process, debate has ignited with critics challenging the notion of equating the principle with western notions of democracy, with others claiming that the principle allows for a meaning that breaks the grip of centralized power. These and other issues are investigated with careful scholarship. Al-Raysuni concludes that al-Shura should be adopted as a way of life for all Muslims to protect their interests and as a vital tool for reconstruction and reform. In doing so he addresses the subject from some intriguing new angles, giving insight into areas hitherto little, if at all, examined.

Islamic Finance in the Light of Modern Economic Theory Suren Basov, M. Ishaq Bhatti, 2016-12-01 This book provides researchers and students with an understanding of the basic legal tenets of the Islamic finance industry, studying the real economic effects of those tenets using the tools of the modern economic theory. Split into four parts, the book begins with an introduction to the history and a legal framework for Islamic banking, covering typical Islamic financial products such as Sukuk and Takaful and examining the structure of Islamic financial institutions. It then analyzes and discusses the Miller-Modigliani Theorem, which is of direct relevance to Islamic banks which are prohibited to charge interest and often have to rely on profit-loss sharing agreements. Part III of the book introduces the reader to modern mechanism design theory, paying particular attention to optimal contracting under hidden action and hidden information, and final part of the book applies the tools of economic theory to understand performance of Islamic financial institutions such as Islamic banks and Takaful operators. *Islamic Finance in Light of Modern Economic Theory* brings together all the necessary technical tools for analyzing the economic effects of Islamic frameworks and can be used as an advanced textbook for graduate students who wish to specialize in the area, as a reference for researchers and as a tool to help economists improve the design of Islamic financial institutions.

Handbook on Islam and Economic Life M. Kabir Hassan, Mervyn K. Lewis, 2014-12-31 *Handbook on Islam and Economic Life* is a unique study, one of the first of its kind to consider Islam within a broader economic sphere. Covering a wide breadth of topics and research, it explores how Islam impinges upon and seeks to shape major aspects

Islamic Social Finance Valentino Cattelan, 2018-08-06 The current dynamics of world economy show remarkable changes in the socio-economics of credit provision and entrepreneurship. If the emergence of the sharing economy is fostering innovative models of collaborative agency, networking and venture business, economic actors are also looking for a more sustainable development, able to foster profitability as well as community welfare. This book investigates Islamic social finance as a paramount example of this economy under change, where the balance between economic efficiency and social impact is contributing to the transformation of the market from an exchange- to a community-oriented institution. The collected essays analyse the social dimension of entrepreneurship from an Islamic perspective, highlighting the extent to which the rationales of sharing, distribution and cooperation, affect the conceptualization of the market in Islam as a place of shared prosperity. Moving from the conceptual roots of this paradigm to its operative branches, the contributing authors also connect the most recent trends in the financial market to Shari'ah-based strategies for community welfare, hence exploring the applications of Islamic social finance from the sharing economy, FinTech and crowdfunding to microcredit, waqf, zakat, sukuk and green investments. An illuminating reference for researchers, practitioners and policy-makers dealing with the challenges of a global market where not only is diversity being perceived as a value to be fostered, but also as an important opportunity for a more inclusive economy for everybody.

Islamic Monetary Economics and Institutions Muhamed Zulkhibri, Turkhan Ali Abdul Manap, Aishath Muneeza, 2019-10-01 This edited volume explores theoretical and empirical issues related to monetary economics and policy in the Islamic financial system. Derived from the Conference on Islamic Monetary Economics and Institutions: Theory and Practice 2017 held in Malé, Maldives, the enclosed papers highlight several options for authorities and regulatory bodies regarding monetary policy and regulation, as well as discussing how Islamic monetary policy affects growth, financial stability and resilience to shocks in practice. The inter-linkage between Islamic monetary policy and other markets are also explored. The subject of Islamic economics has gained considerable attention in the last four decades with the emergence of Islamic financial institutions around the world. This phenomenon has motivated economists to develop a comprehensive theoretical framework of modern monetary economics for Islamic economic system. An important characteristic of the Islamic economic system is the abolition of interest from the financial system. Islamic monetary economics is distinguished from conventional monetary economics due to the absence of interest. Therefore, under the Islamic economic system, monetary policy has to depend on other tools. In the early theoretical literature on Islamic monetary economics, many have discussed the role of money in Islamic economic system, while the number of empirical studies on Islamic monetary economics is a relatively new phenomenon. According to Islamic scholars, there are three main goals of Islamic monetary policy: a) economic well-being with full employment and optimum rate of economic growth; b) socioeconomic justice and equitable distribution of income and wealth and c) stability in the value of money. Hence, the Islamic monetary policy has several socioeconomic and ethical implications. Featuring regional case studies, this book serves as a valuable resource for academics, scholars, practitioners and policy makers in the areas of Islamic economics and finance.

Reading the Bible in Islamic Context Daniel J Crowther, Shirin Shafaie, Ida Glaser, Shabbir Akhtar, 2017-11-08 In the current political and social climate, there is increasing demand for a deeper understanding of Muslims, the Qur'an and Islam, as well as a keen demand among Muslim scholars to explore ways of engaging with Christians theologically, culturally, and socially. This book explores the ways in which an awareness of Islam and the Qur'an can change the way in which the Bible is read. The contributors come from both Muslim and Christian backgrounds, bring various levels of commitment to the Qur'an and the Bible as Scripture, and often have significantly different perspectives. The first section of the book contains chapters that compare the report of an event in the Bible with a report of the same event in the Qur'an. The second section addresses Muslim readings of the Bible and biblical tradition and looks at how Muslims might regard the Bible - Can they recognise it as Scripture? If so, what does that mean, and how does it relate to the Qur'an as Scripture? Similarly, how might Christian readers regard the Qur'an? The final section explores different analogies for understanding the Bible in relation to the Qur'an. The book concludes with a reflection upon the particular challenges that await Muslim scholars who seek to respond to Jewish and Christian understandings of the Jewish and Christian scriptures. A pioneering venture into intertextual reading, this book has important implications for relationships between Christians and Muslims. It will be of significant value to scholars of both Biblical and Qur'anic Studies, as well as any Muslim seeking to deepen their understanding of the Bible, and any Christian looking to transform the way in which they read the Bible.

Getting the Barakah Abu Muawiyah Ismail Kamdar, 2015-03-25 Across the globe, Muslims complain about not having

any Barakah in their time. Many Muslims are constantly late for appointments, and rushing around without being able to accomplish much. Yet, if we move beyond blame and complaint, we can discover many ways through which we can manage our time well enough to accomplish everything we need to do and more. Islam is a religion which emphasizes self-discipline and accountability. A deeper understanding of Islam would lead to us being able to optimize the usage of our time. In this book, you will learn important tools for time management, merging them with Islamic concepts like Dua, Sabr, Tawakul, and the benefits of having a strong connection with one's Creator. The tools and tips covered are well-researched and based on the author's personal experiences. Each section includes Islamic quotations, tools, tips, personal experiences and action points making this a practical, yet uniquely spiritual guide to Time Management.

Books-in-Brief: Epistemological Integration Fathi Hasan Malkawi, 2015-01-01 The book is a program which seeks to construct an intellectual framework for Islamic methodology with a view to realizing practical training in the thoughtful investigation of issues related to knowledge in various fields. The book's title affirms the distinctive types of integration that characterize Islamic methodology, including integration of sources, means, and schools of thought, as well as existing realities with desired ideals etc. This is fully consistent with human nature, as variety is fundamental to the functions people perform and skills they master. The work essentially makes the case that fundamental to any Muslim recovery is laying the foundations of sound thinking and values that integrate the two main sources of knowledge: Revelation and Reality (that is the created worlds both physical, societal and psychological) under the umbrella of Tawhid. This concept of integration implies using both human theoretical conceptualization and practical experimental investigation whilst also affirming the need to apply human capabilities in understanding the divine text, and acquiring sound knowledge of the physical world in terms of its resources, as well as accumulated past and present human experiences. The aim being to vitalize human potential and creativity.

The Nasser D. Khalili Collection of Islamic Art: Science, tools & magic Nasser D. Khalili Collection of Islamic Art, 1993

Methodology of Islamic Economics Necmettin Kizilkaya, 2019-11-05 In its pursuit to equip the reader with a basic knowledge of Islamic economics, this book divulges the micro-foundations of the discipline, and highlights the predominant schools of thought that exist in the field. It explains, in simple terms, what Islamic economics entails and how it can be studied as a science in relation to the Holy Quran, the Sunnah and the Islamic intellectual tradition based on these two sources. The book familiarizes the reader with knowledge of the basic maxims of the discipline. It then establishes the arguments that are presented by the proponents of religion-based economics, specifically Islam, and apprises readers about the aforementioned schools as they exist. A number of chapters consider the dimension of the dilemmas the discipline is facing, and the chronological progress of the field is reviewed, hence providing a comprehensive overview of the topic. The book deals with the issues about the origins of Islamic economics, the basic methodological questions, the use of the opportunities offered by fiqh in the methodological discussions and the main problems arising from the encounter with other cultures and civilizations. It offers practical solutions, despite the differing schools of thought, not unlike the development of conventional Economics where radical differences between Keynesian, Classical and Monetarist approaches existed. It concludes by incorporating some of the finest works that explain to the reader how Islamic economics may progress as a discipline. This guide will provide both students and researchers in Comparative Economic Studies, Islamic Economics and Islamic Finance with an essential overview of the field.

Handbook of Research on Islamic Social Finance and Economic Recovery After a Global Health Crisis Kassim, Salina, Othman, Anwar Hasan Abdullah, Haron, Razali, 2021-04-30 Social financial reporting as an economic tool presents the firm as a socio-economic unit with empowered social capital to enable a sustainable economic solution, particularly in response to the COVID-19 pandemic. Islamic social finance (ISF) is a corporate social responsibility initiative in the form of humanitarian and socio-development programs by Islamic financial institutions and Shariah-compliant corporations. ISF is applied through various methods and tools that structure based on Islamic Sharia Law. For example, Islamic social finance tools would either be philanthropic, involving activities such as zakat (obligatory alms-giving), Sadaqah (voluntary alms-giving/charity), and waqf (endowment) or ta'awun (cooperation-based activities), which include Qardh al-hasan (benevolent loan) and kafala (guarantee). Thus, Islamic social finance instruments play a vital role in alleviating poverty and addressing socio-economic issues such as illiteracy, unemployment, malnutrition, and health issues. As such, integrated ISF reporting can empower sustainable economic development and lead to recovery. The Handbook of Research on Islamic Social Finance and Economic Recovery After a Global Health Crisis provides insights on the role of Islamic social finance in supporting and facilitating economic recovery in the post-COVID-19 era as well as reducing poverty and addressing the challenges of socio-economic problems such as education, unemployment, malnutrition, and health issues. This book is ideally intended for practitioners, stakeholders, researchers, academicians, and students who are interested in improving their understanding on the role of Islamic social finance theoretically and empirically in solving the issue of poverty and developing excellent funds management to achieve economic empowerment with better environmental sustainability.

Macroeconomic Policy and Islamic Finance in Malaysia Azura Othman, Norhanim Mat Sari, Syed Othman Alhabshi, Abbas Mirakhor, 2017-10-10 This book offers an alternative framework for macroeconomic policy in Malaysia, derived from the universal principles of social justice espoused in the objectives of the Shariah. It attempts to holistically analyze issues related to public finance, which has been criticized for lack of transparency and justice in wealth distribution. This book explores these criticisms and discusses the principles of Islamic finance that may be applied to macroeconomic policymaking to create a better economy overall. It presents a case for a flat tax system, to make the economy more resilient to shocks, and financing methods that limit interest-rate-based debt contracts and allow greater risk sharing among the market participants on a broad scale. Using both qualitative and quantitative methods, this book models the Malaysian economy based on policies that apply the fundamental Islamic finance principle of risk sharing to demonstrate its benefits in spurring growth, promoting distributive justice, rendering the economy more stable, strengthening the potency of monetary policy, enhancing fiscal governance, and improving financial inclusion. The book will be of interest to students, policymakers, financial institutions, researchers, ministries of finance, central banks, securities commissions, and anyone interested in alternative economic paradigms.

Yearbook of Muslims in Europe Jørgen S. Nielsen, Jørgen Nielsen, Samim Akgönül, Ahmet Alibasi, Egdunas Raciūnas, 2012-10-12 The Yearbook of Muslims in Europe provides up-to-date factual information and statistics of the

situation of Muslims in 46 European countries.

Islamic Monetary Economics Taha Eğri, Zeyneb Hafsa Orhan, 2020-12-10 The existence of fiat currencies has long been cited as one of the major contributing factors to the challenges facing contemporary economies, and the current monetary system is not only a key source of exorable increases in interest rates but also a principal cause of inflation and decline in the value of money in many countries. The editors argue that an Islamic monetary system, with its specific money concepts, interest-free financial institutions, and monetary policy embedded in real growth, provides a solution to this conundrum. Contributions from many world-renowned experts consider a wide array of topics, ranging from the theoretical concepts of money and banking in conventional and Islamic economics to the historical journey of money from precious metals to plastic money and digital currency today. The book outlines the problems that sprout from interest-based banking and multiple debt structures. It then mirrors the Islamic concepts of money as well as idiosyncrasies of its monetary policy. Supported with meticulous research and empirical evidence, the book demonstrates the efficacy of Islamic monetary system in delivering real growth along with equitable distribution of wealth and prosperity in the economy. It additionally acquaints the readers with juristic debates about money and monetary policy. This is essential reading for both students and researchers in Islamic economics, banking, and finance, expertly promoting a fair and just economic system that emerges as a result of interest-free banking and monetary policy based on Islamic principles.
