Building JavaScript Games Arjan Egges,2014-09-30 Building JavaScript Games teaches game programming through a series of engaging, arcade-style games that quickly expand your JavaScript and HTML5 skills. JavaScript is in the top ten most-used programming languages world wide, and is the basis for applications that can run in any modern browser, on any device from smart phone to tablet to PC. Especial emphasis is given to touch-based interface, but all games also run using a regular mouse and keyboard setup. The four games you'll develop from reading this book are: Painter Jewel Jam Penguin Pairs Tick Tick These four games are casual, arcade-style games representing the aim-and-shoot, puzzle, maze, and platform styles of game play. The approach in Building JavaScript Games follows the basic structure of a game rather than the syntax of a language. From almost the very first chapter you are building games to run on your phone or other device and show to your friends. Successive projects teach about handling player input, manipulating game objects, designing game worlds, managing levels, and realism through physics. All told, you'll develop four well-designed games, making Building JavaScript Games one of the most enjoyable ways there is to learn about programming browser-based games. The final chapters in the book contain a very nice bonus of sorts. In them you will find excerpts from interviews with two prominent people from the game industry: Mark Overmars, who is CTO of Tingly Games and creator of GameMaker, and Peter Vesterbacka, the CMO of Rovio Entertainment - the creators of the Angry Birds franchise. Their insight and perspective round off what is already a fun and valuable book.

Puzzle Boxes Jeff Vollmer,2010-03-01 Unlocking the Secrets of the Puzzle Box &break;&break;Have you ever thought inside the box? These band-sawn boxes could be the most

intriguing and fun projects you've ever made. &break;&break;Author Jeff Vollmer describes his boxes as key-and-slide–cut a dovetail key, cut a slider piece, cut another key, cut another slider. That's the puzzle or combination you use to get to the chamber or heart of the box. &break;&break;Then you cut out the guts of the box to create a chamber. But wait, there's more! Then you cut another box from the guts, then another box or drawer from those pieces, then another and maybe another until things get too small to handle safely. &break;&break;Any type wood can be used to make these boxes–wood with holes, cracks, splits, insect and wormholes, spalting and burls. Jeff calls these flaws opportunities to become creative. &break;&break;Please note that the digital version of this book does not include the accompanying DVD.

Slider Pete Hautman,2017-09-12 Competitive eating vies with family expectations in a funny, heartfelt novel for middle-grade readers by National Book Award winner Pete Hautman. David can eat

an entire sixteen-inch pepperoni pizza in four minutes and thirty-six seconds. Not bad. But he knows he can do better. In fact, he'll have to do better: he's going to compete in the Super Pigorino Bowl, the world's greatest pizza-eating contest, and he has to win it, because he borrowed his mom's credit card and accidentally put $2,000 on it. So he really needs that prize money. Like, yesterday. As if training to be a competitive eater weren't enough, he's also got to keep an eye on his little brother, Mal (who, if the family believed in labels, would be labeled autistic, but they don't, so they just label him Mal). And don't even get started on the new weirdness going on between his two best friends, Cyn and HeyMan. Master talent Pete Hautman has whipped up a rich narrative shot through with equal parts humor and tenderness, and the result is a middle-grade novel too delicious to put down.
