📖 **A Cultural History of Hair in the Age of Empire** Sarah Heaton,2020-12-10 Hair, or lack of it, is one the most significant identifiers of individuals in any society. In antiquity, the power of hair to send a series of social messages was no different. This volume covers nearly a thousand years of history, from Archaic Greece to the end of the Roman Empire, concentrating on what is now Europe, North Africa, and the Near East. Among the key issues identified by its authors is the recognition that in any given society male and female hair tend to be opposites (when male hair is generally short, women’s is long); that hair is a marker of age and stage of life (children and young people have longer, less confined hairstyles; adult hair is far more controlled); hair can be used to identify the ‘other’ in terms of race and ethnicity but also those who stand outside social norms such as witches and mad women. The chapters in A Cultural History of Hair in Antiquity cover the following topics: religion and ritualized belief, self and society, fashion and adornment, production and practice, health and hygiene, gender and sexuality, race and ethnicity, class and social status, and cultural representations.

📖 **African Skin and Hair Disorders, An Issue of Dermatologic Clinics**, Nonhlanhla P Khumalo,2014-05-23 People of African ancestry have sensitive skin and may suffer from a wide variety of skin disorders. Hair disorders are also common and differ from those suffered by Caucasians. This issue of the Dermatologic Clinics focuses on the most common skin and hair disorders seen in black skin, with articles focusing on acne scarring, alopecia, keloids, and skin pigmentation. There are also articles addressing moisturizers for the skin and the effect of hair treatments on the hair and scalp. Also discussed is the sociohistoric issues that can cloud the scientific understanding of clinical entities. Emphasis is often put on race and yet a very clear distinction should be made between race and quantifiable entities such as pigment and hair curl as determinants for skin/hair disease predilection; this is quite distinct from race as a surrogate for social class and a disease determinant for most medical conditions and malignancies.

📖 **Hair Tells a Story** Margo Maine,2023-01-16 The body is the canvas upon which women paint their secrets, their hopes and dreams, pain and disappointments. Hair has long played a role in the struggles for power, self-determination and autonomy--serving as a nonverbal language that represents women’s lives. However, pain, anxiety, racism, sexism and rigid beauty standards can too often underlie these stories. Modern events like the Black Lives Matter movement and the COVID-19 pandemic have exposed societal barriers that prevent the free and equitable expression of hair. Although countless books and articles address body image, the personal psychology and the meaning of hair have been missing. This work empowers women to understand complex hair-head-heart connections, and pressures. Above all, the text emphasizes that hair is never just hair.
