*The Death of Old Yokohama* Otis M Poole,2010-10-18 It was almost noon in the picturesque city of Yokohama on Saturday, September 1st 1923 when the first sway of one of the world's most destructive earthquakes was felt. The first great shock lasted for four minutes and in that time every building in the city was destroyed, together with 100,000 of its Japanese inhabitants and one eighth of its foreign community. Other shocks followed and then fire which swept through the ruins with hurricane speed, suffocating and burning to death thousands trapped in wreckage or trying to flee. A first-hand account of the disaster told by a survivor, this accurate and authentic account was written immediately after the earthquake and is here published with only minor additions and corrections

**Jishin** Lee Riordan,2011-09-13 In 1923, one of the greatest natural disasters ever recorded struck one of the most densely populated areas in the world. In *Jishin*, author Lee Riordan recreates this calamity, the Great Kanto Earthquake, providing both stirring adventure and touching romance. This book vividly describes the shaking and shuddering of the quake itself, during which thousands died, as much of the cities of Tokyo and Yokohama collapsed around their inhabitants. In the ensuing fires, many more perished as insatiable flames tore through the cities, destroying property and life. This gripping historical novel retells the story of the terrible quake that took over 140,000 lives. *Jishin* is also the story of Tatiana, the Russian countess, and Hugh, the American professor, who discover their love for one another against the backdrop of this destruction. The author built his tale on the recollections of Tatiana and Hugh, who were his parents, providing the book with an authenticity that gives it unusual poignancy and realism.

**The Great East Japan Earthquake** World Health Organization. Regional Office for the Western Pacific,World Health Organization. Regional Office for the Western Pacific. Division of Health Security and Emergencies,World Health Organization,2011 This publication was produced for the people of Japan, especially those whose lives have been affected by this disaster. This consolidation of the information was generated by a team of professionals based in the Western Pacific Regional Office of the World Health Organization (WHO). We hope this publication will serve as a useful reference when documenting lessons learnt from the Japan disaster, and will become a tool for both Japan and the international community for future disaster response efforts. It is important to highlight that the main sources of information for this publication were the Situation Reports published by the WHO Regional Office at that time, which were based not only on official information but also on media reports in Japanese. A team of dedicated volunteers assisted with data retrieval and translation, capturing the nuance of the culture and the information being reported. The data collected were supplemented with first-hand information collected from the areas affected by the earthquake and tsunami during two field missions conducted by staff of the WHO Regional Office. As the long-term recovery activities continue in Japan, WHO continues its health situation monitoring and the accumulation of knowledge and experiences in health system and service recovery following a massive disaster event. Hopefully, we will have more information to share as we continue to work with the Japanese people in the recovery stage.--P. iii.

**The Fukushima and Tohoku Disaster** School of Societal Safety Sciences,2017-10-26 The Fukushima and Tohoku Disaster: A Review of the Five-Year Reconstruction Efforts covers the outcome of the response, five years later, to the disasters associated with the Great East Japan earthquake on March 11, 2011. The 3.11 disaster, as it is referred to in Japan, was a complex accident, the likes of which humans had never faced before. This book evaluates the actions taken during and after the earthquake, tsunami, and nuclear accident, for which the Japanese government and people were not prepared. The book also provides recommendations for preparing and responding to disasters for those working and living in disaster-prone areas, making it a vital resource for disaster managers and government agencies. Includes guidelines for governments, communities and businesses in areas where similar complex disasters are likely to occur Provides information, propositions, suggestions and advice from the people that were involved in

making suggestions to the Japanese government Features case studies (both pre- and post-disaster) of three simultaneous disasters: the Great East Japan earthquake, the resulting tsunami, and the Fukushima Nuclear Power Plant disaster

OECD Territorial Reviews: Japan 2016 OECD,2016-04-11 Japan is embarked on a demographic transition without precedent in human history: the population is both declining and ageing rapidly. This raises important questions about the country's future economic geography, as public policies will need both to respond to these shifts and also to shape them.

*Defenders of Japan* Garren Mulloy,2021-12-01 Japan's post-war armed forces are a paradox, both embarrassing remnants of the past and valuable repositories of experience. This book charts the development of the Japan Self-Defense Forces (JSDF) from 1954 as both unorthodox military institutions and servants of a civil society that decries militarism. Investigating JSDF contributions to Japanese and global security, the evolution of such contributions during and after the Cold War, and their possible reconfiguration for Japan's security needs ahead, Garren Mulloy offers insight into the Forces' past, present and future. He explores the characteristics and contradictions of Japanese policy, including novel approaches in response to an increasingly assertive China, the latent threat of North Korea and contributory pressure from the US. Though the American alliance remains the core of Japanese security, new partnerships and international overtures will also shape the Forces' place in Prime Minister Abe's new vision of 'proactive contributions to peace'. *Defenders of Japan* deconstructs how the JSDF have adapted and will continue to adapt within domestic norms, caught between unresolved legacies of Japan's imperial past and a dynamically shifting balance of future global power.

**The 2011 Japan Earthquake and Tsunami: Reconstruction and Restoration** Vicente Santiago-Fandiño,Shinji Sato,Norio Maki,Kanako Iuchi,2017-07-12 This book covers the restoration and reconstruction process and activities undertaken in Japan in the first five years since the 2011 Earthquake and Tsunami – a period widely considered to be the most intensive reconstruction phase within the 10-year restoration plan drawn up by the Japanese Government. The respective chapters explore technical, scientific, social and non-scientific (policy-related) aspects, including: reconstruction and restoration policies, infrastructure and designs for tsunami coastal defence, resilient urban areas and affected communities, housing and relocation schemes, disaster mitigation and evacuation measures, reactivation of the economy, revitalization of fisheries and coastal agriculture, and industry and tourism. The book also illustrates some of the achievements and failures in a broad range of projects and initiatives intended to address the above-mentioned issues, making it particularly relevant for experts, decision makers, students and other interested scholars.

*Facing the Wave* Gretel Ehrlich, 2014-03-11 Kirkus Best Books of the Year • Kansas City Star Best Books of the Year A passionate student of Japanese poetry, theater, and art for much of her life, Gretel Ehrlich felt compelled to return to the earthquake-and-tsunami-devastated Tohoku coast to bear witness, listen to survivors, and experience their terror and exhilaration in villages and towns where all shelter and hope seemed lost. In an eloquent narrative that blends strong reportage, poetic observation, and deeply felt reflection, she takes us into the upside-down world of northeastern Japan, where nothing is certain and where the boundaries between living and dying have been erased by water. The stories of rice farmers, monks, and wanderers; of fishermen who drove their boats up the steep wall of the wave; and of an eighty-four-year-old geisha who survived the tsunami to hand down a song that only she still remembered are both harrowing and inspirational. Facing death, facing life, and coming to terms with impermanence are equally compelling in a landscape of surreal desolation, as the ghostly specter of Fukushima Daiichi, the nuclear power complex, spews radiation into the ocean and air. *Facing the Wave* is a testament to the buoyancy, spirit, humor, and strong-mindedness of those who must find their way in a suddenly shattered world.

**The Blessings of Disaster** Michel Bruneau, 2022-11-08 Are we doomed? As individuals, certainly, eventually, inevitably. But as a species? As a civilization? Leading catastrophe engineer Michel Bruneau thinks perhaps not. *The Blessings of Disaster* draws on knowledge from multiple disciplines to illustrate how our civilization's future successes and failures in dealing with societal threats—be they pandemics, climate change, overpopulation, monetary collapse, and nuclear holocaust—can be predicted by observing how we currently cope with and react to natural and technological disasters. Maybe most importantly, this entertaining and often counter-intuitive book shows how we can think in better ways about disasters, to strengthen and extend our existence as both individuals and as a species. When it comes to rare extreme events, such as earthquakes, hurricanes, floods, tornados, volcanic eruptions, technological accidents, terrorist attacks, pandemics, and even existential threats, it is in our nature to set ourselves up for disasters because the gamble may be worth it. But only maybe. *The Blessing of Disaster* is the very real story of the relationship between humans and disasters – and it's not a simple one. Bringing together his decades-long career spanning the globe as an earthquake and disaster engineer, detailed catastrophe case studies from extreme events like Japan's Kobe earthquake and category 5 hurricanes in the American South, along with thoughtful and practical solutions, Bruneau provides a thorough examination of the structural challenges that face today's (and tomorrow's) world. How we cope with today's threats is indicative of what the future holds. Contrary to popular forecasts, it is not all gloom and doom – but some of it definitely is.

*In Mortal Hands* Stephanie Cooke, 2009-04-28 A provocative history of nuclear power explores the pros and cons of nuclear energy as a power source that has given way to international tension and weapons development, in a critical assessment that also considers nuclear energy's possible role in countering global warming.

**Take My Hand** Andrew Taylor-Troutman, 2012-01-27 *Take My Hand* is an invitation to experience a year of preaching through the eyes of a first-year pastor. Andrew Taylor-Troutman reflects on his experience of ministry as a dynamic exchange between his theological education and the people in the pews. Each chapter consists of Taylor-Troutman's reflections about a particular aspect of living as a faith community and concludes with a sermon exploring similar themes and ideas. As this book journeys through the Christian liturgical year, Taylor-Troutman considers a wide range of

contemporary church issues, including the role of children in worship and the communal practice of Sabbath. He discusses topics as diverse as the Rapture, the death penalty, and church league softball. Along the way, readers will laugh at Sunday morning bloopers, study biblical texts from new perspectives, wrestle with theological questions, and discover parallels between their own experience of faith and the life of this small, rural congregation. More than just a retrospective summary of events, *Take My Hand* poignantly illustrates how a pastor's work on Sunday morning grows out of his or her engagement with the hopes and fears of daily life, and the inspiring faith of men, women, and children in a church.
