**Intelligent Decision Technologies** Junzo Watada, Toyohide Watanabe, Gloria Phillips-Wren, Robert J. Howlett, Lakhmi C Jain, 2012-05-20 The Intelligent Decision Technologies (IDT) International Conference encourages an interchange of research on intelligent systems and intelligent technologies that enhance or improve decision making. The focus of IDT is interdisciplinary and includes research on all aspects of intelligent decision technologies, from fundamental development to real applications. IDT has the potential to expand their support of decision making in such areas as finance, accounting, marketing, healthcare, medical and diagnostic systems, military decisions, production and operation, networks, traffic management, crisis response, human-machine interfaces, financial and stock market monitoring and prediction, and robotics. Intelligent decision systems implement advances in intelligent agents, fuzzy logic, multi-agent systems, artificial neural networks, and genetic algorithms, among others. Emerging areas of active research include virtual decision environments, social networking, 3D human-machine interfaces, cognitive interfaces, collaborative systems, intelligent web mining, e-commerce, e-learning, e-business, bioinformatics, evolvable systems, virtual humans, and designer drugs. This volume contains papers from the Fourth KES International Symposium on Intelligent Decision Technologies (KES IDT'12), hosted by researchers in Nagoya University and other institutions in Japan. This book contains chapters based on papers selected from a large number of submissions for consideration for the conference from the international community. The volume represents the current leading thought in intelligent decision technologies.

*Industrial Applications of Affective Engineering* Junzo Watada, Hisao Shiizuka, Kun-Pyo Lee, Tsuyoshi Otani, Chee-Peng Lim, 2014-04-08 Industrial Applications of Affective Engineering introduces new analytical methods such as fluctuation, fuzzy logic, fractals, and complex systems, and pursuing interdisciplinary research that traverses a wide range of fields, including information engineering, human engineering, cognitive science, psychology, and design studies. The book is split into two parts: theory and applications. The book is a collection of the best papers from ISAE2013 (International Symposium of Affective Engineering) held at Kitakyushu, Japan and Japan Kansei Engineering Meeting on March 6-8, 2013.

**Design for Innovative Value Towards a Sustainable Society** Mitsutaka Matsumoto, Yasushi Umeda, Keijiro Masui, Shinichi Fukushima, 2012-04-03 Since the first EcoDesign International Symposium held in 1999, this symposium has led the research and practices of environmentally conscious design of products, services, manufacturing systems, supply chain, consumption, as well as economics and society. EcoDesign 2011 - the 7th International Symposium on Environmentally Conscious Design and Inverse Manufacturing - was successfully held in the Japanese old capital city of Kyoto, on November 30th – December 2nd, 2011. The subtitle of EcoDesign 2011 is to “design for value innovation towards sustainable society.” During this event, presenters discussed the way to achieve both drastic environmental consciousness and value innovation in order to realise a sustainable society.

**Design Creativity 2010** Toshiharu Taura,Yukari Nagai,2010-11-04 What is 'design creativity'? It is impossible to answer this question without considering why human beings can – and do – 'design'. Design creativity is instrumental in not only addressing social problems faced across the world, but also evoking an innate appreciation for beauty and a sense of personal contentment. Design Creativity 2010 comprises advanced research findings on design creativity and perspectives on future directions of design creativity research. The papers included were presented and discussed at the first ICDC (International Conference on Design Creativity), which was held at Kobe, Japan, in 2010. Design Creativity 2010 encourages readers to enhance and expand their activities in the field of design creativity.

**Intelligent Decision Technologies** Ireneusz Czarnowski,Robert J. Howlett,Lakhmi C. Jain,2020-06-11 This book gathers selected papers from the KES-IDT-2020 Conference, held as a Virtual Conference on June 17–19, 2020. The aim of the annual conference was to present and discuss the latest research results, and to generate new ideas in the field of intelligent decision-making. However, the range of topics discussed during the conference was definitely broader and covered methods in e.g. classification, prediction, data analysis, big data, data science, decision support, knowledge engineering, and modeling in such diverse areas as finance, cybersecurity, economics, health, management and transportation. The Problems in Industry 4.0 and IoT are also addressed. The book contains several sections devoted to specific topics, such as Intelligent Data Processing and its Applications High-Dimensional Data Analysis and its Applications Multi-Criteria Decision Analysis – Theory and Applications Large-Scale Systems for Intelligent Decision-Making and Knowledge Engineering Decision Technologies and Related Topics in Big Data Analysis of Social and Financial Issues Decision-Making Theory for Economics

Intelligent Decision Technologies Junzo Watada,Gloria Phillips-Wren,Lakhmi C. Jain,Robert J. Howlett,2011-11-19 Intelligent Decision Technologies (IDT) seeks an interchange of research on intelligent systems and intelligent technologies which enhance or improve decision making in industry, government and academia. The focus is interdisciplinary in nature, and includes research on all aspects of intelligent decision technologies, from fundamental development to the applied system. This volume represents leading research from the Third KES International Symposium on Intelligent Decision Technologies (KES IDT'11), hosted and organized by the University of Piraeus, Greece, in conjunction with KES International. The symposium was concerned with theory, design, development, implementation, testing and evaluation of intelligent decision systems. Topics include decision making theory, intelligent agents, fuzzy logic, multi-agent systems, Bayesian networks, optimization, artificial neural networks, genetic algorithms, expert systems, decision support systems, geographic information systems, case-based reasoning, time series, knowledge management systems, rough sets, spatial decision analysis, and multi-criteria decision analysis. These technologies have the potential to revolutionize decision making in many areas of management, healthcare, international business, finance, accounting, marketing, military applications, ecommerce, network management, crisis response, building design, information retrieval, and disaster recovery for a better future. *New Fashion Illustration* Dopress Books, 2016 *New Fashion Illustration* is a visually-stunning collection of illustrated art that encapsulates the marriage of imagination and haute couture. The artwork within ranges from fantastical haute couture to the practical and every-day; some rendered in lush watercolor, others in stark black and white, both figurative and abstract, all expressing the same sharp eye for style, design, and aesthetic beauty. It includes advertising, editorial art, and personal work, conceptual designs as well as pieces realized by some of the biggest brands in the world. Features work by 24 artists, including Sara Vera Lecaro, Masaki Mizuno, Nicole Jarecz, David Despau, oldie, and Pippa McManus.

**Picturing Research** Linda Theron, Claudia Mitchell, Ann Smith, Jean Stuart, 2012-01-01 *Picturing research: drawing as visual methodology* offers a timely analysis of the use of drawings in qualitative research. Drawing can be a method in itself, as in the research area of Visual Studies, and also one that complements the use of photography, video, and other visual methodologies. This edited volume is divided into two sections. The first section provides critical commentary on the use of drawings in social science research, addressing such issues of methodology as the politics of working with children and drawing, ethical issues in working with both adults and children, and some of the interpretive considerations. The second section, in its presentation of nine research-based case-studies, illustrates the richness of drawings. Each case study explores participatory research involving drawings that encourages social change, or illustrates participant resilience. These case studies also highlight the various genres of drawings including cartoons and storyboarding. The book draws on community-based research from a wide variety of contexts, most in South Africa, although it also includes work from Rwanda and Lesotho. Given the high rates of HIV&AIDS in sub-Saharan Africa, it should not be surprising that many of the chapters take up concerns such as the preparation of teachers and community health workers in the age of AIDS, and the experiences of orphans and vulnerable children. Moving further afield, this book also includes work done with immigrant populations in Canada, and with tribunals in Somalia and Australia. *Picturing research* is an important resource for novice and experienced researchers interested in employing qualitative methodology that encourages rich (yet low-tech) visible data and that offers a participatory, enabling experience for participants and their communities.
